

DLS is a Canadian-based Solutions Integrator founded in 2000, specializing in Digital Transformation, Cloud, Cybersecurity and endpoint security solutions.

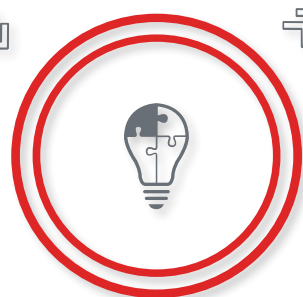

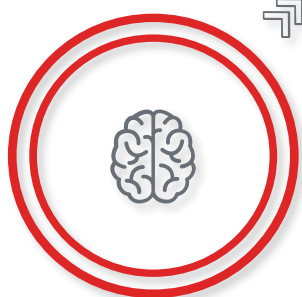

DLS provides full Project Management oversight, as well as customized implementation and deployment of numerous solutions. Our agnostic approach to clients' needs and requirements allows our team to fully tailor your options to your budget.

Our R&D team has patented vKey®, our endpoint Cybersecurity Platform, which has already been deployed globally by large security conscious organizations for years. This solution will transform any endpoint device into a clean, highly secure, self contained corporately managed work environment virtually impossible to compromise!

End-to-End Service and Solution Delivery
