California Client Information Form Waiver Form 2023

What Reiki is

Reiki is a form of complementary, holistic care that enhances the body's healing ability.

What Reiki is not

Your practitioner is not a licensed physician. Reiki complements "healing arts services licensed by the state," i.e., it complements more traditional Western medicine provided by doctors, nurses, and hospitals. As a complementary or alternative medicine, Reiki does not require licensing by the state.

Nature of the services provided

Reiki session: The client lies down fully clothed. The practitioner(s) place their hands on or above the body and allow the Reiki to radiate from the hands.

Theory of treatment

Stress, trauma, and illness restrict the natural flow of "ki" (life force energy through the body). By restoring ki to the body, Reiki rejuvenates the body's ability to relax and destress and supports its ability to heal itself.

In addition to the practitioner radiating the Reiki energy through their hands, sessions may involve the practitioner sweeping their hands above the body in various ways or incorporating breath or vocal tones to break up energy blocks.

Today's event includes meditation. Any messages are for healing purposes only and do not indicate anyone to take action. All participants are responsible for their own thoughts and actions.

I understand that Reiki is a simple, gentle, hands-on energy technique used for stress reduction and relaxation. I understand that Reiki practitioners do not diagnose conditions, nor do they prescribe or perform medical treatment, prescribe substances, nor interfere with the treatment of a licensed medical professional. I understand that Reiki does not take the place of medical care. It is recommended that I see a licensed physician or licensed healthcare professional for any physical or psychological ailment I may have. I understand that Reiki can complement any medical or psychological care I receive. I also understand that the body has the ability to heal itself, and to do so, complete relaxation is often beneficial. I acknowledge that long-term imbalances in the body sometimes require multiple sessions in order to facilitate the level of relaxation needed by the body to heal itself.
