OUR SERVICES

Cart Configuration

All of our 2 Seater and 4 Seater UTV's come plant ready with Tempered Glass, Horns, Fire Extinguishers, Seatbelts, Beacons and Reverse Alarms. Choose Worksite, Mud tires or Tracks depending on the terrain. A/C and Heat options are also available.

Water Trailers

500 gallon water trailers are perfect for dust control via the rear spray bar. Also perfect for standby fire protection and hydrastatic testing. Comes equipped with a 2"-4HP Honda driven Tsurumi pump, a 2" x 20' suction hose and a 1.5" x 75' fire hose. Additional fire hose available upon request!

Sandblasting Rigs

The ultimate solution for heavy-duty blasting! Engineered for performance, our 3-Cubic-Foot blasting pot and dryer combines power, precision, and flexibility. The Bobcat 185 CFM Compressor ensures robust air power delivery.

Rental Ready Options

THE SWAMP FROG DIFFERENCE

Maintenance

Our UTV's are routinely maintained with service records upon request. Carts on long-term rentals will be PM'd in the field by one of our technicians. They will perform a monthly inspection to check for any wear and tear or damaged items that need immediate attention.

Tracks vs Tires

Where traditional tires sink below the surface in extremely muddy situations, our tracked UTV's glide over any mess without the worry of getting stuck. Mud tires have a PSI of 3.90, where our tracks have only .88 PSI. This makes our tracked UTV's more efficient for getting your crew to sites where other wheeled vehicles can't go!
