

THE MINI PAINT STATION

MADE IN USA

PATENTED

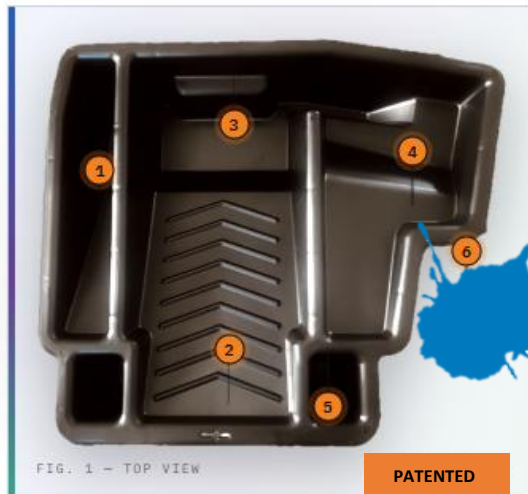

UPC 8 60014 93620 3

NEW FOR THE MINI-ROLLER AISLE

ONE TRAY. ZERO MESS.

Trim, cabinets, touch-ups, closets — the small jobs eat the most time in setup and cleanup. The Mini Paint Station holds the paint, loads the roller, parks the brush and catches the drips in **one molded piece that sits flat and stays put.**

No liner shuffle. No paint can balanced on a ladder shelf. No brush laid on somebody's countertop.

WHAT THE SHAPE DOES

- 1 Deep paint well**
Holds a working pour along the full side wall. Reload without leaving the ladder.
- 2 Chevron load ramp**
Ribbed grade rolls the nap out even, front to back, so the first pass isn't a heavy one.
- 3 Tool slot**
Parks a wet brush or a putty knife off the work surface, handle up and out of the paint.
- 4 Wipe ledge & drip return**
Angled shelf scrapes the brush clean; the run drains back into the well instead of the floor.
- 5 Corner cups**
Two square wells for a splash of color, screws, hardware or a soaking brush tip.
- 6 Flat, wide footprint**
Rigid molded base rests level on a step, a stair tread or a countertop without a tip.

WHY IT MOVES OFF THE SHELF

- **Impulse price point, repeat purchase.** Sits beside mini rollers, sleeves and trays — the highest-traffic corner of the paint aisle.
- **Made in the USA.** A domestic story on a category dominated by imported disposables.
- **Patent pending.** Protected geometry no private-label tray can copy.
- **Reusable and rinse-clean.** Line it or wash it — either way it comes back to the next job.

PRODUCT FACTS

ITEM	The Mini Paint Station
BRAND	Imagine The Solution
UPC	860014936203
STATUS	Patent issued
ORIGIN	Made in USA
MATERIAL	molded polymer
DIMENSIONS	L x W x H
FITS	Mini rollers up to 4.5"
MASTER PACK	12 units
MSRP	\$19.99

STOCK IT. SPEC IT. SHIP IT TODAY.

Wholesale, private label and retail placement inquiries welcome.
Samples available for buyers and pro crews.
