Dear Business Owner or Manager,

At BreatheWell Home Solutions, we understand that cleanliness in food-service environments is critical to health compliance, customer confidence, and operational success. We are pleased to offer **Daily, 4-Day, or 2-Day per week janitorial services** for your restaurant, supported by monthly pest management and indoor environmental quality monitoring. Beyond routine cleaning, our recurring service is designed to protect your space, your people, and your reputation. First impressions are formed instantly, and for restaurants, cleanliness directly impacts trust, comfort, health, and long-term success.

Our **recurring janitorial services** include detailed cleaning of commercial kitchens, prep areas, dining spaces, restrooms, storage rooms, and back-of-house areas. Services focus on surface sanitation, floor care, grease-prone zones, high-touch disinfection, and trash removal to support inspection-ready operations.

Our **monthly pest management services** address rodents and insects through inspections, targeted treatments, ongoing monitoring, and eco-friendly barrier protection around the exterior of the building and key entry points to help prevent pests from entering. Our **Indoor Environmental Quality (IEQ) Monitoring services** include visual assessments, Humidity and Moisture monitoring, and air and environmental condition tracking. Our IEQ Monitoring service is provided at no additional cost and is included as part of your package.

Partnering with us means peace of mind. While you focus on growing your business and serving your community, we ensure your space remains consistently clean, healthy, and inspection ready. We offer flexible scheduling, with flexible scheduling available before opening or after closing. Please refer to the pricing chart included in this packet for service options.

Sincerely,

BreatheWell Home Solutions
