The first day of school marked a fresh beginning, filled with hope and excitement. The campus came alive with smiling faces and eager minds. New opportunities, friendships, and dreams began to take shape. This academic year promises enriching learning experiences, abundant success, and joyful memories for every student.

School Assembly: Be the Best Version of Yourself!

Assembly was conducted on the theme "Be the Best Version of Yourself" under the guidance of Ms. Suseela from the Mathematics Department . The programme began with a meaningful speech by our respected teacher, who encouraged students to focus on self-improvement, confidence, and positive habits.

A thought-provoking skit highlighted the importance of believing in oneself and overcoming challenges. This was followed by an inspiring song that motivated everyone to strive for excellence and become better each day. The assembly concluded with a valuable message reminding us that success comes from continuous growth and effort. "Don't compare yourself with others; compare yourself with who you were yesterday."

A Small Balloon, A Big Smile

As the first day of school came to a joyful close, our students walked out of the school gates not just with new memories, but with bright balloons in their hands and happiness in their hearts. These balloons were more than a simple gift — they carried excitement, comfort, and the warmth of a loving school environment.

For many children, the first day of school is filled with mixed emotions. But as they left for home, their smiles told a beautiful story — a story of confidence, care, and a promise that school is a happy place to be.

The Global Connection – Learning Beyond the Classroom

As part of a home-based learning activity, students explored the concept of globalization by identifying everyday items used in their homes and discovering where they were made. They also traced how these products travel across countries before reaching their homes, helping them understand the journey of global trade and interconnected economies.

This simple yet meaningful activity encouraged students to connect textbook concepts with real-life experiences and observe how the world is linked through trade, transport, and technology. Learning can happen anywhere — even at home!

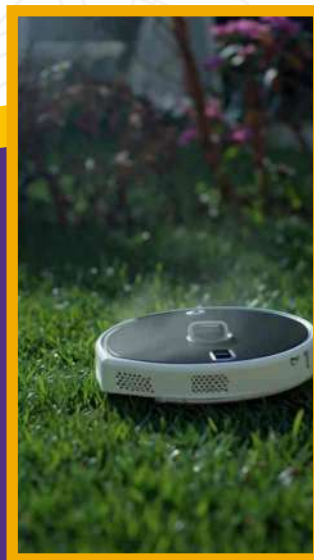

Discovering the smart technologies shaping our future!

The Grade 10 students participated in an engaging Gadget Review Activity, where they explored innovative technologies such as smart watches, robotic vacuum cleaners, companion robots, and AI-powered cooking robots.
