COMMITMENT REGISTER

CODE COMPLIANT COMPANY SIGNATORIES

Please fill in all fields

The signing of this Commitment Register by the Organisation below Demonstrates and Records their Commitment in having become Compliant with the IPCA Ltd PMG 003.2:2014 Industry Code of Practice Incorporating the Panel Certification Scheme.

This CODE provides a framework to the Australian Insulated Panel Industry through practical industry specific guidance to adopt, adapt and transform ISP Sandwich Panels performance to address fire performance issues and fire fighter confidence in facilities constructed in accordance with the Code Specification and Certification requirements.

To demonstrate their commitment to the CODE, Code Compliant IPCA Ltd Members will:

- By signing this statement of commitment by the CEO or equivalent, publically demonstrate their intention to integrate the CODE into their business.
- Participate in the Industry promotion of this CODE within the organizations and externally.
- Make application for approval as Code Compliant companies and make relevant applications for approval of all work to be undertaken, in accordance with the CODE.
- Participate in the ongoing reviews of the CODE's operation to bring about further advancement through the review processes established by the CODE.

The Code of Practice objectives were formulated in addressing the challenges that were identified in consultation with the Fire Brigade and stakeholders. The stated objectives of the CODE are:

CODE OBJECTIVES

Compliance with this CODE will achieve a more fire stable structure and fire-fighter confidence in ISP Panel System, Systems, through:

- a) Establishing minimum principles and standards for:
 - i. The manufacture design specification and approval of facilities using incorporating such systems; and
 - ii. The manufacture and installation of the EPS-FR and all ISP used in such systems.
- b) Promoting strategies to address the risk of fire as well as the maintenance requirements and emergency planning procedures in facilities incorporating such systems; and
- c) Providing a recognizable "Code Branding Mark" that distinguishes EPS-FR and all ISP Panel
