

Napa might just have music royalty residing in our valley of golden hills and majestic oaks. That is if Coyote Creates remains with us, for talent such as this is not bound by geographical surroundings. The artist & rapport souls will surely find our Coyote and attempt to whisk her away to the big stage.

Myself, I first crossed paths with this talent in the music store. Coyote gave me a smile while I played some reels on banjo and I thought maybe she might consider recording on one of my projects? Yet of course I had no idea to whom I was addressing and I was stepping on land mines. With the tolerance and patience of a golden royal, Coyote took it with grace. After I had communicated my offer of recording we parted ways.

## ***Napa Music Industry Publication: Who Is Coyote Creates?***

I had a friend with me and I asked do you know the young lady? He replied that he had seen her at open mics and she was a teenager that worked at Starbucks. Can you imagine Dalton out in a mine field stomping on mines? For that is exactly what happened. This very profound and polished music artists took the miscommunication and misrepresentation I handed out quietly. Yet I am a lucky fool sometimes. For I saw her with her partner downtown and as always I am a people person, so adventure of meeting new people brought me to cross paths with Coyote once again.

Then the awakening occurred as I talked with this rare music talent for a second time. Discovering I had made this error of communication, that certainly Coyote was not a teenager. But a seasoned Music Artist whom payed her music dues in Nashville and other parts of the very big and wide music industry. After more investigation and my own personal self-inspection, I stepped off of the last landmine.

I learned through additional research that our Coyote Creates is a accomplished and a formidable music artist whom create's a music world of magical tunes that lead to different environments evolving an array of colors to your mind. Invoking contemplation and comparisons towards your own personal experiences.

As well I offer.... Equal too or surpassing other Artist's of the same thread from the impressionistic periods in the sixties. Music created by musicians such as Brian Wilson, the Moody Blues and The Beatles.

I listen reviewing two of Coyote Creates works, Lion Heart and The Mountains Are Here. The rhythms and grooves combined with the atmospheric textures of her productions are not just good music, they are an adventure in melodic combinations of her work on the guitar with her interlacing poetic vocals. And delivering as I have said a visioned world via music. These are royal treasures of song I say. Well worth the listen and the purchase.

Battle Wounds combines her work on piano and guitar giving us the build of tension and release as the vocal smooths the melodies over the top of the composition. Hearing the story of relationship questions we all have asked ourselves too. There is a vibrance to the song that gives to the listener a resolve orchestrated nicely. Each and every work provided on these two album compositions carries that Coyote Create's touch that I believe sets this Artist in the realm of grammies. For her musical works are sophisticated imprinting at times haunting memories. In Latin I must say Bene Factum! Very well done!

We have a very special music talent that lives with us in our valley. Sincerely, I find her giving us an impression of our valley in her songs and lyrics. Such as Highway Rain on her latest work on Apple Music which is my favorite. I highly recommend The Mountains Are Here for your first adventure into the music of this Artist Xóchitl (So-chee), Coyote Creates.
