"We are very pleased to see the continuation and consistency of the high-grade results at the Joker Mine that we saw last year around Shambhala #71 adit," said Dave Bryant, CEO of Buyer Group. We successfully intercepted high-grade rhodium, palladium, cobalt, and several other

minerals important to the United States' domestic supply chain in multiple tests. Considering the size of Project Shambhala, if this mineralized zone persists at depth, it could yield a significant supply of strategic metals.
