

Buyer Group International, Inc. Announces Significant Mineralization Intersected Using XRF Technology at Flagship Exploration Project "Shambhala".

Sheridan, WY/ GLOBE NEWSWIRE / August 9th, 2022 / Buyer Group International, Inc. (OTC PINK:BYRG) is excited to announce multiple high grade intercepts at flagship exploration project "Shambhala" using the latest handheld model of XRF technology on the market: <u>Vanta Handheld XRF Spectrometer</u>

Highlights:

- 860 ppm Cobalt & 4660 ppm Zinc intercepted via outcropping feet from the Shambhala #71 tunnel.
- 9620 ppm Titanium, 113 ppm Palladium, 14 ppm Rhodium intercepted via tailings piles around Shambhala #71.
- 49 ppm Platinum and 15 ppm Rhodium intercepted via Shambhala #71 adit targeting supposed vein material. Rhodium successfully intercepted 4 times out of 4 attempts for a 100% success rate.

The XRF tests completed throughout the property were intended to target the presence of high grade PGM mineralization. Shambhala #71 Adit/Tunnel, surrounding outcroppings, and tailings piles were all closely inspected to perform these tests. The XRF results from all three locations have returned a number of readings that justify the continuation of an extensive exploration program. Rock ore samples have also been collected from all three target locations for 3rd party testing and further confirmation of these XRF results. Buyer Group in addition to this has a tentative date of August 8th set for Steven Cyros of Red Beryl Mining Company, Inc. to be onsite. The goal of this once again being further analysis of these XRF results & their corresponding locations. Steven Cyros will spend the week working alongside Buyer Group to plan out a more extensive exploration program based on these new findings.

On the XRF Results, Buyer Group Chief Executive Officer David A. Bryant commented: "We couldn't be more excited, last year we felt like we left Shambhala a little empty handed. The harsh snowstorms forced an early exit and insufficient testing. This year both us and the investors received the results needed, we are on the right track, there is high grade PGM mineralization present in and all around Shambhala!"
