

MAKE A DIFFERENCE.

IMPROVE CARE DELIVERY
IN YOUR COMMUNITY.

BENEFIT FINANCIALLY.

The transition from fee-for-service to value-based care is inevitable—it’s happening right now.

Earlier this year, CMS introduced the new ACO REACH (Realizing Equity, Access, and Community Health) model as part of its drive to move care from fee-to-service to relationships with accountability for quality and total cost of care by 2030.

If you act now, by participating in the right ACO REACH program, you can lead positive change for your patients and community, be an owner not an employee, and begin realizing financial benefit in 2023.

CMS' NEW ACO REACH PROGRAM

CMS launched the ACO REACH model in response to feedback from stakeholders and participants in early ACO programs. It is designed to advance health equity, stakeholder feedback, and participant experience. CMS is encouraging providers with a strong track record of direct patient care to participate in an ACO REACH program. The model’s goals are to:

BRING THE
BENEFITS OF
ACCOUNTABLE
CARE TO
UNDERSERVED
COMMUNITIES,

PROMOTE
PROVIDER
LEADERSHIP AND
GOVERNANCE,
AND

PROTECT THE
MEDICARE
BENEFICIARIES AND
DUAL-ELIGIBLES
THEY SERVE.

Typically, physicians only realize about 6% of the total care dollars². In the ACO REACH model physicians have clinical custody and financial control—and may benefit from the savings realized on 100% of all Medicare costs.

More information on the ACO REACH model is available at <https://innovation.cms.gov/innovation-models/aco-reach>.
