

## Through the Eyes of a Child

---

At Through the Eyes of a Child, we believe that each child is unique and precious. We treat each child's mind, body and spirit with respect, encouraging each child to develop his or her abilities at his or her own pace. We provide a well rounded, developmentally appropriate curriculum for each program, taking into account the individual interests of the children in each group. We delight in looking at the world through the eyes of each child in our care.

Through the Eyes of a Child Daycare Center, LLC is a state-licensed, privately owned, nonsectarian center for childcare and learning. We provide a warm, caring environment where children can learn and grow at their own pace, while interacting with others and learning from those they interact with. Our program and activities embrace the diversity that is within our community, sharing with children the cultures and histories that are the fabric of our lives.

Our goal is to provide the highest quality early care and education available. We pay careful attention to the development of an age appropriate curriculum, including ensuring a truly anti-bias environment. We teach respect for differences, whether the difference is gender, religion, race or ability.

We believe that the most important work of childhood is play, as it is through play that children construct meaning and learn about the world that surrounds them. We provide large quantities of time for children to engage in meaningful play activities.

We welcome you to Through the Eyes of a Child Daycare Center, and we're very glad you are here!
