

## Your Partner for Safe & Successful Discharges

We bridge the gap between hospital discharge and long-term success. As a clinically-led resource, we help your patients navigate the complex landscape of senior living and home resources, ensuring they don't return to the ER due to a lack of support.

### HOW WE SUPPORT YOUR PATIENTS:

#### Placement & Resource Navigation

We vet and match patients with Assisted Living, Memory Care, or Independent Living options aligned with their specific clinical needs and budget.

#### The "Aging Toolkit" Assessment

We guide families through the maze of funding: understanding Medicare coverage, Medicaid waivers, and Long-Term Care insurance.

#### Clinical Advocacy

Led by an RN, we speak the language of your care team. We ensure medical orders are understood by the family and that the care environment is safe.

#### Urgent Response

We provide rapid-response consultations to keep your discharge timelines and length-of-stay (LOS) metrics on track.

## WHY PARTNER?

### Reduce Readmissions

Proper placement or home support reduces the "revolving door" of high-risk senior patients.

### Save Time

We handle the research, touring, and coordination, allowing clinicians to stay focused on care.

### Zero Cost to Families

Our free services provide expert guidance without financial barriers.
