

Full biography

François Bergeron - Vice-President, Partnerships, MEDTEQ+

François Bergeron is a science graduate from Université de Sherbrooke (PhD, 2006) and HEC Montréal (MBA, 2010). He began his career as a researcher in the development and validation of a new industrial laser technology for the treatment of cancer.

After his MBA, he immersed himself in entrepreneurship and co-founded Tactus Scientific INC, a start-up, developing micro and nano-manipulation technologies for scientific and medical applications.

François joined Innovitech and MEDTEQ+ in 2014 and now holds the position of VP Partnerships at MEDTEQ+, where he is increasing the impact of the consortium for its members through strategic agreements and the implementation of marketing tools for medtech and healthtech companies, in particular the MEDTEQ+ INVEST investment fund and the Beachhead™ network of clinical sites for the validation of industrial innovations.
