Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- 1) Visit the DVAuction web site at www.dvauction.com
 - 2) Click on the "Register" tab
 - 3) Enter a user name, password and your contact information.
 - 4) Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
 - Complete the process by filling out the Banking & Lending information requested.
 - Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
 - If you would prefer to be approved using your credit card, call (402) 316-5460.
 - Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

MOTELS:

Pump and Pantry.....308/346-4607

Rodeo Inn.....308/346-4408

INSPECTION OF CATTLE:

Choat Cattle Company bulls can be viewed anytime at the St. Edward, NE location. Arrowsmith Red Angus bulls can be viewed at the Bassett, NE ranch anytime prior to the sale. Call for an appointment. The offering will be moved to the Burwell Livestock Market on March 1, 2014.

TERMS AND CONDITIONS:

All cattle sell according to the suggested Terms and Conditions of the American Red Angus Association.

RETAINED INTEREST:

Choat Cattle Company will retain 1/3 semen interest in all of the bulls in their offering. Semen will be collected at Choat Cattle Company's expense and at the buyer's convenience. The buyer has full possession and salvage value of the bull.

HEALTH:

All bulls are guaranteed breeders and healthy sale day. Interstate health papers and brand release papers will be provided on all cattle selling. All bulls sell fertility tested and with scrotal measurements available sale day. Heifers are bangs vaccinated.

TRUCKING:

Free delivery to all points in Nebraska and to neighboring states within 300 miles of Burwell. We will also be glad to assist in making the best possible trucking arrangements. Trucking is the responsibility of the buyer on the commercial heifer lots. A \$100 per bull credit will be given if you haul your bull sale day.

INSURANCE:

Will be available sale day.

LIABILITY:

All persons attending this sale do so at their own risk, legal or otherwise, for their safety or the behavior of the animals. The Owners, Auction Service and the Sale Staff assume no liability for property loss or accidents that may occur.

EPDs:

EPDs printed in this catalog are from the 2014 Spring Analysis.

AUCTIONEER: Matt Lowery (308) 750-6119

LIVESTOCK PRESS REPRESENTATIVE:

Scott Dirk, Tri State Livestock News605/380-6024

Jim Williams, Cattle Business Weekly.....308/222-0170

Twig Marston, American Red Angus Assn.940/387-3502

Chris Beutler, Midwest Messenger402/648-7611

Buyers unable to attend may send their bids to the auctioneer, press representative or Brad, Wayne or Dave. We encourage buyers unable to attend to utilize DV Auction Service.

LUNCH:

Join us for a complimentary lunch sale day.

ANNOUNCEMENTS:

Made from the block will take precedence over this printed catalog.

- ♦ An Angus sire used to bring in outcross genetics. He sires calves that are moderate framed with lots of rib shape and overall dimension. His progeny are very consistent in type and kind. Owned by Choat Cattle Company.

OCC Legend 616L

Beckton Julian GG B571...His influence sells!

Welcome to Burwell and our 2nd annual joint production sale with Arrowsmith Red Angus. It is certainly our pleasure to serve your genetic needs. Special thanks to our past customers for their loyalty and support. We are thankful for the opportunity to meet new prospective buyers and look forward to serving all of you for many years to come with this joint venture.

A major emphasis of our program is complete customer satisfaction. You can buy with confidence. If you have an issue with a bull you buy from us, call us and we will work with you on how best to resolve the problem. We stand behind our cattle. We only sell two year old bulls so that they have plenty of time to develop naturally. This fall and early winter they were out foraging in the stalks until the first of January. At that time, we brought them home to begin the process of preparing for the sale. Clipping, semen and reproductive evaluation, video shooting and taking still pictures, have since been done. They were put in a large yard with a steep hill to climb for exercise and fed a ration consisting of ground corn stalks, corn silage, ground alfalfa, cracked corn and a protein supplement. They have not been pushed. Their condition has been bred in, not fed in.

Many of the bulls in the sale are calving ease and can be safely used on heifers. There are a number of grandsons of B571, sons of 5L Legend 425V, sons of SA Picture Perfect, as well as sons of clean up bulls and AI sires. We are also offering five Sim Angus hybrid bulls.

Two other points of major emphasis in our program are disposition of the cattle and focusing on the female. We have our own young kids working with us in handling the cattle, as well as two old grandpas that don't move very fast. We do not tolerate any animal that we cannot trust or handle easily. If a problem arises, the animal is gone.

Focusing on the female is a high priority for us. The cows are the factory. We carefully evaluate the mother of any bull we are considering purchasing for in herd use. Her feet and overall structure must be as near perfect as we can find. Her udder and teats must be functional. And, of course, she must have a good disposition.

Thanks again for your interest in our program. We hope to see you at the sale!

Wayne & Dave
Choat Cattle Company

The Choat kids at the Boone County Fair.

- Dam's age 4 - Dam's weight 905 lbs.
- This B571 grandson comes out of our Messmer Excel V507 bull. Not as much muscle expression on the bull calves, but the trade off is outstanding females. They are excellent mothers with ideal udder attachment and teat size. They are moderate framed with good dispositions.

- Dam's age 6 - Dam's weight 1110 lbs.
- This bull starts off our Signature sons and he is a good one. He is a sherman tank. Wide topped, deep ribbed with lots of capacity. Excellent maternal genetics on both the dam and sire side of this bull.

- An old time pedigree on this bull. He is a maternal powerhouse with Bieber Design, Monu 2X, Hobo 1961 and Rambo 502 in his pedigree. To top it off his dam is from the famed Blockana cow family at Feddes Red Angus. He is not going to sire wide bodied calves with a lot of dimension, but the females by him should be something special.

- ♦ Endorse was the \$40,000 top selling bull in the Triple S Sale in Canada. Being Canadian bred, his American EPD tabulation is not as true as his actual performance. He consistently sires eye appealing cattle that come on a moderate frame size. His yearling ultrasound scanned an 18.7 square inch ribeye. Now deceased, there will be limited opportunities to access these unique genetics.

Legend 916 as a calf with his dam.

- 916 is a home raised sire that I retained from the '09 calf crop. The maternal side of this bull stacks some of my favorite cows, as well as a couple shots of really neat outcross genetics. There's not many sons of him on test this year, but he did represent himself quite well in the replacement female pen, and that's been the goal with this bull from day he was conceived..

Friends, neighbors, and fellow cattlemen,
Welcome to the ARO/ C3 "We're Doing it Different.... Part II" joint production sale.

The simple statement, We're doing it different, is a guiding principle behind my registered program, and has been since I purchased my first registered female in 1994. The focus from day 1 has always been efficient, trouble-free, productive cows....it's never been about an EPD profile. The focus has never been about being a "Bull-of the month-club" member, it's been about identifying great cow families.....and stacking them. Sitting in Jeanne's office yesterday putting the final touches on this catalog, I had a warm fuzzy seeing how many sale bulls went back to one cow. Sodak Em 5127 Reg. # 488023 -0.9 BW 31 WW 33 YW and a whopping 98.6 MPPA. Hands down, this little no numbered 1995 model black/ red gene cow is the most prominent female in my cow herd. Why would anyone build a cowherd around such a below breed average cow?

Pretty simple answer.... every one of her daughters produced, as have every one of their daughters. For those who like to play on the extended pedigree function on the Red Angus website, I invite you to do a little digging behind the bulls and see the maternal lineage expanded, and hopefully you will have a greater perspective of the maternal focus of this program, that is not necessarily translated through EPDs. The sale offering this year is another testament to the focus and direction of my program. Due to the environmental conditions of 2012-2013, I was forced to switch calving pastures and summer grass, which meant that the commercial cows got to enjoy being in pastures where they could be seen all summer, and the purebred cows got their chance to crawl up and down hills that they have never seen before....Weaning weights are down 50-75 pounds as are yearling weights, as compared to normal, but from my perspective knowing what the cows were coming off of, what they went through last spring, the late start to grass last year, and the daily altitude change they enjoyed, I'm quite pleased with this years set of calves!

The bulls were fed the same this year as always. They are slowly worked up on a growing ration starting at 42 megs and never receiving higher than 48. Again, the focus isn't an end weight, the focus is a bull that is developed for longevity and soundness, and that will never change.

Again as a feature lot, I am offering choice of my replacement heifers. If you are looking for a leather halter recipient or a future donor cow, there will be a heifer in there that fits the bill. If you want to do some digging on paper before you come look, just give me a holler and I will send you the full list of the 45 heifers that made first round cuts. Inspection of the bulls and heifers prior to the sale is always invited and appreciated.....as is spending a few extra minutes and going to look at the dams behind them.

Sincerely,
Brad Arrowsmith

Katie Caldwell, Edgar, NE and her Forster North daughter at the 2013 Nebraska State Fair.

Commercial Red Angus Heifers

This may sound a bit stupid, but this "lot" is the one I am most excited about. The true reflection of any program, whether purebred or commercial, is the replacement heifers. This is a collection of 175 pretty damn good Red Angus replacement heifers.

At catalog time, the break down is 60 head from Jim and Scott Boettcher and 40 head from Neal and Mary Ammon. These folks are some of my oldest, dearest friends and customers. Between Jim and Scott, there have been over 50 bulls relocate from Carns to south of Stuart through the years. Neal has alot more input in my program than he gets credit for, because without him, I wouldn't AI half of what I do and he tests a number of my sires via his own AI program. So either through multiple pasture sires or extensive AI use, I get real world feedback from two outstanding commercial programs. We've sold feeder calves together here in Burwell for years, and I'm just as proud of their heifer pens as they are.

And now, for the largest reflection of my own breeding program, comes my own commercial herd. Yes I have used a bull or two from my own program thru the years, like to the tune of 125 plus of them over the last 20 years. If anybody has a handle on what the cow families have done and are doing, I think I have a pretty good idea. Due to a little change in management and resources, I'm offering for the first time ever my entire commercial replacement crop. The feeder heifers have been taken off the top, the late born grass heifers off the bottom, the only heifer calves at home are the 45 purebred replacements. If someone is looking for true front end heifers, come to Burwell March 3rd!

And as a side note, there just might be a tick over 40 head of bulls in the joint offering that are suitable for use on heifers.

On behalf of Dave, Wayne, and the C3 families, Thank you for your interest in our programs and we look forward to your evaluation of the 2014 edition of "We're Doing It Different".

60 head of thick, moderate framed heifers
from Jim & Scott Boettcher, Atkinson, Nebr.
402.925.2238 or 402.925.2503

40 head of thick, moderate framed heifers
from Neil and Mary Ammon, Newport, Nebr.
402.244.5313

75 head of thick, moderate framed heifers
from Arrowsmith Red Angus, Bassett, Nebr.
402.684.2539 or 402.760.0307

50 *Pick of the 2013 Heifer Crop*

Terms:

Selection must be made by May 1, 2014.

The winning bidder may leave her at the ranch to be bred to any of the Arrowsmith herd bull battery free of charge. Should the winning bidder wish to leave her at the ranch to be bred to a bull of their choice, semen will be at purchaser's expense and risk.

If left at the ranch, the natural service sire will be Kuhns Bond Z060 or SSS Paydirt 357. Delivery will be arranged after being examined safe in calf in September by Dr. Chris Finney of the Ainsworth Veterinary Clinic.

Last year was the first time for a "Pick of the Herd." This is a unique opportunity to select from the very best the program has to offer! Not only the heifer but the sire of her first calf if the winning bidder so desires.

This pen features:

Daughters of the \$40,000 SSS Endorse

Daughters of the \$10,000 Forster North

The second crop of Uno daughters - the black bull with red hair

Daughters of OCC Uphold831U.

Daughters of ARO Legend 916

and out of dams with a proven track record!

Brood cow. Future Donor Cow. Show Heifer Prospect. All with a productive future!

- ♦ Dam's age 9
- ♦ This bull offers an unbelievable maternal package here. He's moderate framed, thick and sound. Notice the age of his dam and her MPPA of almost 107. Keep all the daughters.

First and foremost, A SINCERE THANK-YOU for your interest in both our programs and attending or participating in "We're Doing It Different... Part II"

True to form, we do it different.... from birthing, to summer grass and on to winter development....and coming 2's have a vastly different nutritional requirement than a 10 1/2 - 12 month old bull calf. These calves aren't developed as many yearling bulls are, and they are 2 months younger than most yearling bulls offered for sale. With that said, if you are set up to accommodate the needs of younger bulls and want to do so in your own environment, the same \$100/bull haul your own credit is offered. If you don't wish to drag a trailer to Burwell, I'm more than happy to take the bulls back home and finish their development until the grass starts greening up and you are ready for them.

This accomplishes 3 very important things.

1. The calf gets to go back to a 50 acre sandhill pasture and finish his individual development process in an environment that provides ample exercise to harden the calf up for the upcoming breeding season.
2. These are young calves, and they will all be semen tested prior to the sale March 3. NOT EVERY CALF TO SELL WILL HAVE PASSED A SEMEN TEST. They will have passed an evaluation. What this means, Dr. Chris Finney from the Ainsworth Veterinary Clinic will semen test the bulls, and any bull he deems to be developmentally deficient will not make the trip to Burwell.... or more accurately stated, each calf will have to be at 60% motility. There will be a few calves that still exhibit coiled tails, but given a few days of sunshine and the smell of spring in the air, they will quickly achieve 70% or better. This re-evaluation process is done entirely at my risk and expense, and every bull is guaranteed to pass prior to delivery. All bulls will receive a breeding shot, will be poured, and if requested, a foot-rot vaccine shot prior to delivery.
3. I've always been of the firm belief that if you could take the time to come buy a bull, I can take the time to deliver the bull and come look at your cows and calves. I WANT to see what your sires are doing and it gives me the opportunity to "see what you see". And from a breeder standpoint, it's a lot easier to recommend genetics when I can see with my own eyes what your goals and needs are.

If you have any questions or concerns or a "unique - situation", please feel free to discuss them with me before or after the sale.... be happy to do what I can to accommodate your needs.

Profit Simplified...

Multi-breed EPD base simplifies selection

Since 2010, the Red Angus Association of America (RAAA) and the American Simmental Association (ASA) have combined their growth and carcass datasets to provide commercial producers with the most reliable EPDs in the beef industry. In the summer of 2012, RAAA and ASA adopted a common base for Growth (BW, WW, YW, Milk) and Carcass (MARB, YG, CW, REA, FAT) EPDs so that all animals registered in either RAAA or ASA can be directly compared – regardless of breed makeup.

What is BASE?

For decades, each breed association has presented EPDs in their own language (the base). Base is no more than a reference point for any trait against which subsequent generations of animals are compared. The establishment of a base ensures that the population future generations are compared to remains stable, which allows the breed's genetic trend to be accurately identified.

Raw Genetic Value + Base Adjustment = Published EPD

Study Percentile Ranks...

Percentile ranks are an easy reference and therefore a powerful tool to assist you in becoming accustomed to the new multi-breed base. Red Angus EPD percentile ranks are presented along with all active animals' EPDs, and reference how animals compare within their respective Red Angus subpopulations, i.e. Sire Summary Sires, Active Dams, Non-Parent Bulls, etc. It's important to realize that although the multi-breed base allows for the direct comparison of Red Angus and Simmental EPDs, the percent ranks for Red Angus animals will continue to simply compare the genetics of Red Angus animals against other Red Angus. Thus, an animal that was in the top 10% for growth under the old Red Angus base will still be in the top 10% for growth in the new Red Angus multi-breed base.

Example:

In the past, you preferred to purchase bulls that had a -2.0 or lower BW EPD.

Since a -2.0 on the old RAAA base represented the top 20% for BW, you now need to use -2.7 as your critical selection threshold as that represents the top 20% for BW on the new multi-breed base.

Other Examples:

Previous Selection Threshold Old RAAA Base		New Selection Threshold New Multi-Breed Base	
EPD	% Rank	EPD	% Rank
36 WW EPD	40%	58 or higher WW EPD	40%
0.08 MARB EPD	50%	0.38 or higher MARB EPD	50%
0.24 REA EPD	20%	0.30 or higher REA EPD	20%
