Mid Mo Old Car Club 2024/2025 dues are due in July 2024 (for July 1, 2024 to June 30, 2025. You can pay your dues to Larry Rhea at our upcoming meetings or mail them to our P.O. Box. The dues are only \$20. This is a bargain. In return, you receive a highly informative and entertaining monthly newsletter, monthly meetings where you can socialize with your friends, car events, the opportunity to help with our car show, and food. So don't forget.

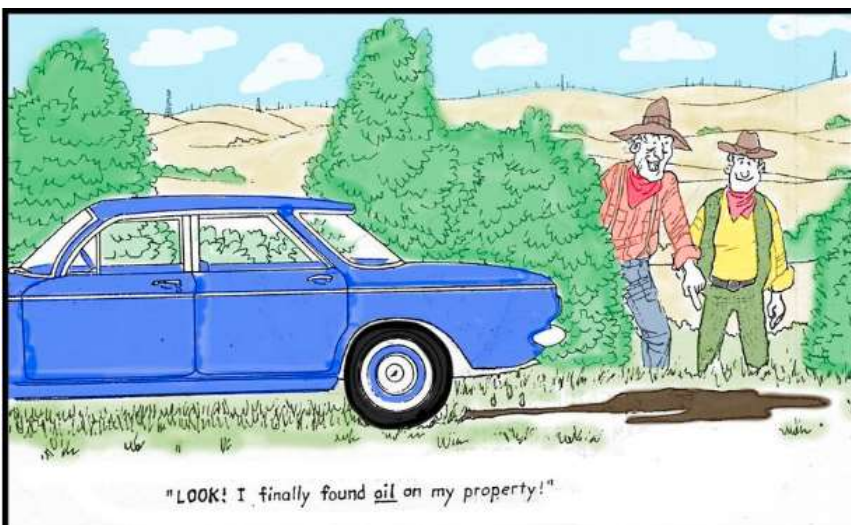

Larry Rhea / Treasurer / 573-606-9266 / rlrhea1920@gmail.com

In 1966, among modern-era American automakers only Lincoln offered a four-door convertible. Chevrolet tested the idea with the Caribe show car that was based on the four-door hardtop body used by the year's Impala and #Caprice.

Lake of the Ozarks and Bagnell Dam is a great day trip from Route 66 in Lebanon, Missouri about 40 miles north. 94 years ago on April 21, 1930, the first concrete was poured at the huge Union Electric dam at Bagnell, Missouri. The boomtown of Damsite, shown here, had sprung up near the construction site. A little over a year later, Bagnell Dam was completed and the Lake of the Ozarks began forming behind it. The town of Damsite is gone now with the town of Lake Ozark next to Bagnell Dam.

Lake of the Ozarks is a reservoir created by impounding the Osage River in the northern part of the Ozarks in central Missouri. Parts of three smaller tributaries to the Osage are included in the impoundment: the Niangua River, Grandglaze Creek, and Gravois Creek. Construction on the dam started in 1929 and was completed in 1931. The resulting reservoir, the Lake of the Ozarks, has a surface area of 55,000 acres, over 1,150 miles of shoreline, and stretches 94 miles from end to end. At the time of construction, it was the largest man-made lake in the United States and one of the largest in the world. Its construction virtually ended commercial traffic on the upper river.

U.S. Route 50, often referred to as the "Loneliest Road in America," is a major east-west highway that stretches across the United States. It runs for over 3,000 miles, from Ocean City, Maryland, on the Atlantic coast to Sacramento, California. The route passes through diverse landscapes, including the Appalachian Mountains, the Great Plains, the Rocky Mountains, and the deserts of the American West.

In Nevada, the stretch between Ely and Fallon is famously desolate, earning the "Loneliest Road" nickname. Despite its reputation, this section offers striking natural beauty and a sense of solitude. Along the route, travelers encounter a mix of small towns, historic sites, and scenic byways. Significant landmarks include the Sierra Nevada, Great Basin National Park, the Rocky Mountains, and the Missouri River. U.S. Route 50 also passes through several state capitals, including Annapolis, Maryland, Jefferson City, Missouri, and Carson City, Nevada.

Historically, the route traces parts of older trails, including the Pony Express and Lincoln Highway. It has played a crucial role in American transportation, linking remote regions and serving as a vital corridor for commerce and travel. Today, U.S. Route 50 remains an iconic and scenic drive, offering a unique glimpse into the varied landscapes and cultures of the United States.

PACKARD PATRICIAN 400:

1953 Packard 400

Jack Boswell
Member since 2015

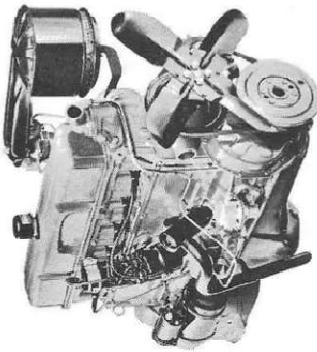

Cars were scarce during WW2 and in 1946, people would gather at dealers during car deliveries, anxious to get a new car.

ENGINES

Chevrolet in 1961 offers the widest selection of engines in the industry—ranging from Corvair's unique air-cooled Turbo-Air 6 for top economy to the responsive power of the Super Turbo-Thrust Special V8. * Each engine is tailor-made to match individual driving habits and particular Chevrolet models.

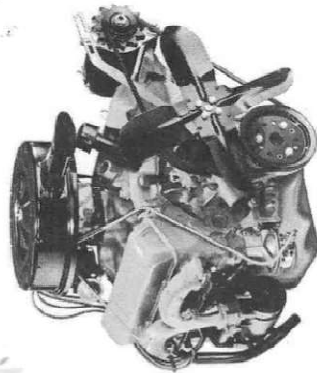

8-CYLINDER

In its V8 class, Chevrolet has a large choice of engine designs. Beginning with the standard 170-h.p. Economy Turbo-Fire V8, they advance to the ultra-powered 350-h.p. Super Turbo-Thrust Special V8* . . . seven V8 engines in all.

6-CYLINDER

Chevrolet's famous 135-h.p. Hi-Thrift 6 has proven its popularity over billions of owner-driven miles. The combination of exceptional economy, together with its smooth, quiet and efficient operation on regular gas, has made the Hi-Thrift 6 a favorite with the motoring public.

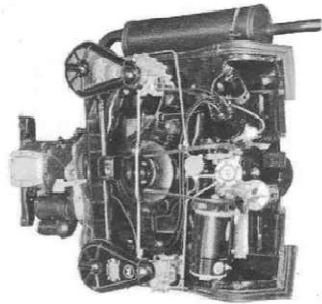

CORVETTE V8

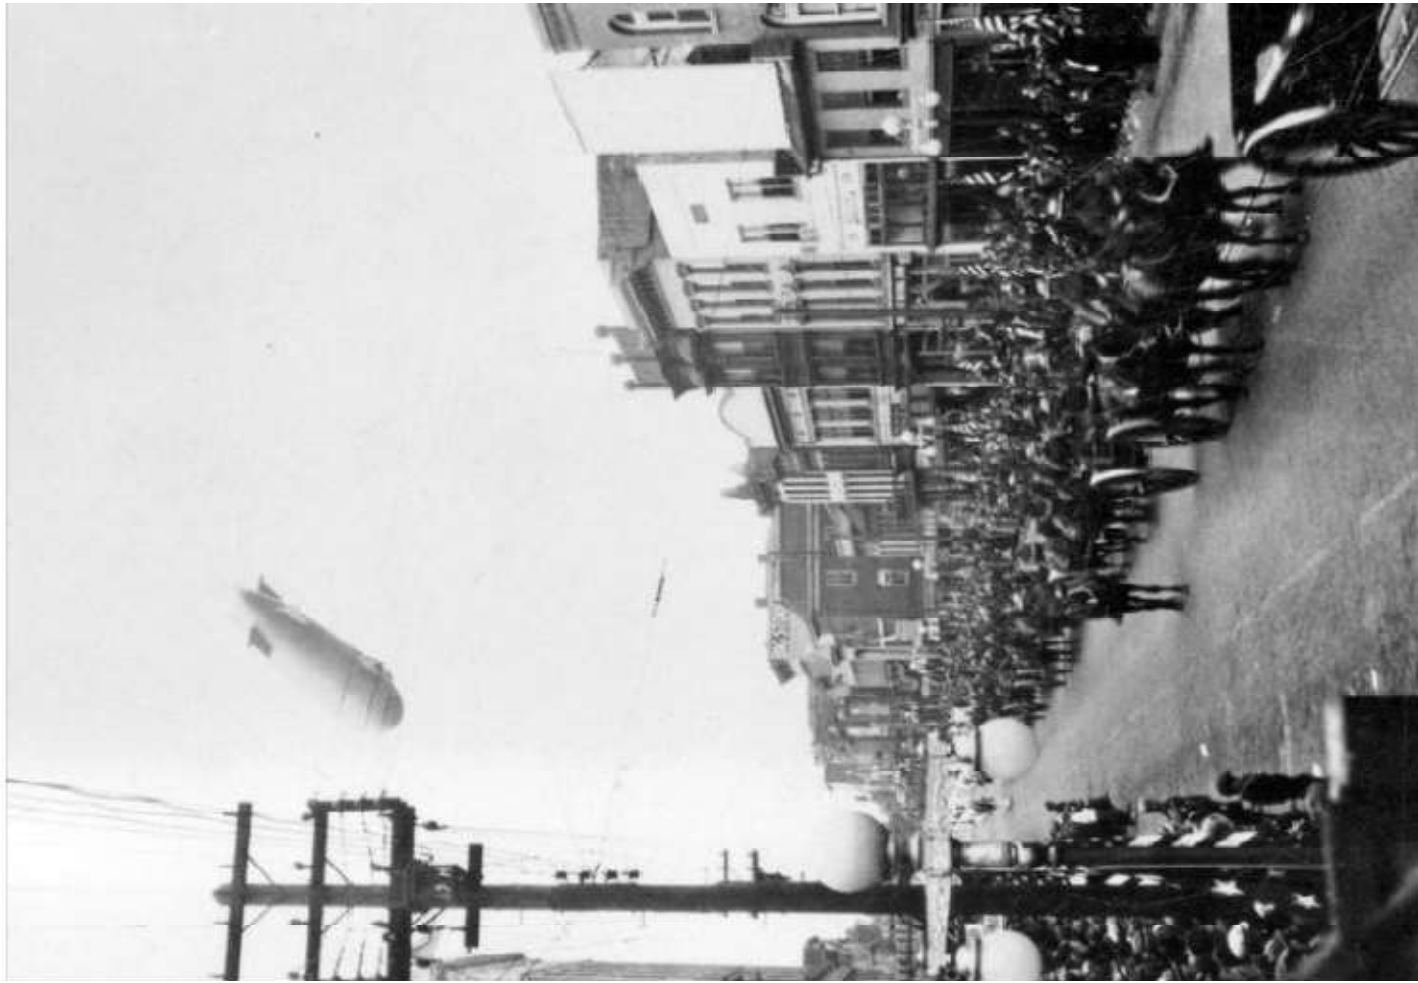

The standard 230-h.p. Corvette V8 is a perfect duet of power and performance. In addition there is a choice of four optional* V8 engines: 245 h.p. and 270 h.p. with twin 4-barrel carburetion; 275 h.p. and 315 h.p. with Ramjet Fuel Injection. The 270-h.p. and 315-h.p. engines are high-performance V8s with special camshaft.

CORVAIR 6

Truly an economy unit. The Corvair Turbo-Air 6 is an aluminum, air-cooled engine designed exclusively for Corvair's rear engine styling. Its twin carburetors supply a balanced fuel-air mixture directly to each bank of cylinders for smooth, economical transportation. Also available is the 98-h.p. Super Turbo-Air 6* for increased performance.

Which Downtown #JCMO buildings do you recognize in this photo from 1924?

*Optional at extra cost
