Universal Matters

Re: Letter of Recommendation

"Carmelina has provided guidance to me over the last two years as I have started a journey of self-discovery. My journey started with an awareness of who I am from a physical and non-physical perspective. The materials that she referenced or developed as well as the one-on-one conversations have helped me to better understand and connect to my higher self, that 'inner voice'. My intuition has grown and I have used it in my daily life. I am glad that others will be able to benefit from her guidance."
