

SPRING 2021

**HIGHLIFT**

AUTO SERVICE

## POTHOLE SEASON

**Look for these signs to see if your suspension is starting to get worn.**

- Is your vehicle riding rough?
- Pulling to one side?
- Nose dives when stopping?
- Does it pass the bounce test?

**If you notice any of these signs give us a call!**

**HIGHLIFTAUTO.COM**

Spring is here in Carleton County and unfortunately for our vehicle's so are potholes. Take a drive down any road in any town and you're bound to see if not hit one.

Potholes can wreak havoc on your vehicle's suspension, tires and wheels but with a little help hopefully we can limit that damage.

**By following a few simple things we can lessen the damage done.**

### • CHECK TIRES

Underinflated tires risk wheel damage so make sure tires are set to the proper air pressures. Find out the ideal tire pressure for your vehicle inside your driver's side door frame.

### • LOOK AHEAD

Stay alert to all road conditions, avoidance is the best

### • SLOW DOWN

If you are already on top of the pothole and cannot avoid it slow down before hitting it. Don't forget to let your foot off the brake before actually hitting the pothole though!

### • WATCH FOR PUDDLES

Puddles on the road can actually be deep pot holes hiding under all that water!

## HIGHLIFT AUTO SERVICE BURSARY

**Have a 2021 Grad interested in the trades?  
Ask your guidance counsellor  
about our bursary.**

Available at CNHS, CHS, WHS, HCS.
