

ABOUT US

For hundreds of years, pure water has been drawn from natural springs under the organic land, meadows and forests in the heart of Europe.

In **2013**, **CRYSTAL FIELD LTD** launched at the family estate where these springs are located.

STORY BEHIND THE MG 115 BRAND

Residents of a small mountain village have used water from the same well for **more than 700 years**. These villagers lived in harmony with nature for centuries—and they enjoyed a long lifespan and happiness in return.

One day, a 13th generation family member decided to analyze water from the well. He wanted to build a family house and come back to live in harmony with nature like so many of his ancestors—and he believed that the water played a key role in their excellent health and well-being.

Reports show that the water contains high levels of naturally occurring magnesium at an ideal pH. It also has a very low sodium content and contains no additives or impurities—just high-quality, natural water with a fresh, pure taste. Studies show that magnesium is essential for a healthy body. The purity of MG 115, coupled with its pH-balanced magnesium content, results in a powerful water that improves health and well-being.

And there was the answer.

The family decided to share that with the world and that's how we started.

PRODUCT INFORMATION

MG 115 is a solution for high performing hydration and a game-changer for health, wellness & athletic performance.

Magnesium is vital to our health. This incredible mineral helps us maintain a healthy heart and build a strong immune system.

Magnesium is the fourth most abundant mineral in the human body.

The recommended allowance of magnesium for males is **420 mg** per day and **320 mg** per day for females. However, the standard diet in the United States only contains approximately 50% of those amounts. **This means that as much as half of the total population is magnesium deficient.**

MG 115 offers the perfect solution for achieving the required magnesium levels while hydrating properly.

It can be consumed freely, in unlimited amounts, by people of all ages due to its low sodium content—even those suffering from high blood pressure or diabetes.

MG 115 helps prevent and relieve exercise-associated muscle cramps (EAMC), a common condition experienced by recreational and competitive athletes.

This incredible water is recommended to a wide population of people and is an excellent complement for those who practice a healthy lifestyle.

CRAFT

MG 115 is perfectly crafted by nature, from underground caverns and springs, and filtered through layers of uncontaminated, organic land, with no mineral additives or any processing.

It is bottled at the source and delivered straight to our valued customers with compliments from nature.

MG 115 reflects the purity of the land from which it is drawn.

In a tribute to nature, we designed a bottle cap in the shape of a fairy star.

When customers remove the bottle cap, they open the secret entrance to the underground world, Fae, where a multitude of magical underground caverns and springs exist.
