

PONTOON LIFT With ADJUSTABLE LEGS

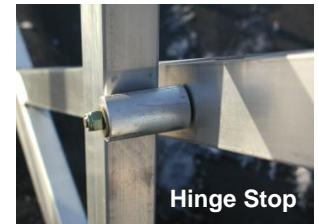

36" inside width between top side rails to accept center float

Great Lakes Lift offers three pairs of 20" legs for a height adjustment of approximately 15 inches. The adjustable legs offer a great deal of flexibility and a superior solution to address the problems of bottom variance and fluctuating water levels.

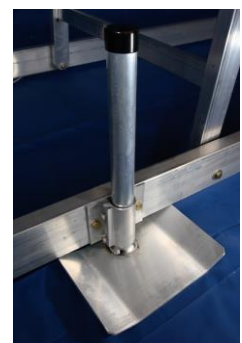

FEATURES

- Accepts tri-toon hulls
- Stress-proof chain links
- ½" U-bolts with grade 5 hardness
- Nylon bolt guards protect inside of pontoon tubes
- Rear rollers protect and guide pontoon tubes
- Large diameter solid stop eliminates single wear point
- 9" x 12" offset welded pads provide increased stability
- Infinite fine height adjustments using 3/8" stainless set bolts
- Pulley sheaves use full 1" diameter bushing of industrial grade bearing bronze

OPTIONS

- Canopy
- 48" and 60" hinge lengths
- 110" wide tri-toon stabilizer with 36" adjustable legs
- Pre-2005 pontoon lifts can be drilled for the leg package

Adjustable Legs
