

Know Your Soul

Words & Music
By Johnny Reed

I know my soul, I know who I am
I've got my life, I'm doing the best I can

Well I've got a fire underneath my skin
And you can't put it out, I won't let you in

I'll play along with this world, I pay my dues
and when I catch fire, it's gonna make the news
If I want it to...

Well I know who I am and what I feel
This alternate reality is real, It's the real me

Got to know your soul, who you are
Let the inside out and let the fire breathe
You got to know your soul, and just let go
No one needs to know, the fire won't go out
Can you feel that heat
Your alternate reality is you, the real you

I'm not alone in this world, there's a lot like me
And when we catch fire, we'll make front page news
Yeah, we're gonna make the news

Because, I know who I am and what I feel
And my alternate reality is real
