BE PREPARED

Hello Agent, Tenants, and Homeowners,

Hurricane season is upon us. It is never too late to prepare for the worst-case scenario. It is not a question of if, but, of when a hurricane will strike. South Florida's beauty comes at the cost of the chance of severe weather. This Official Hurricane Readiness guide offers tips on how to be prepared long before and immediately preceding, and to manage during and after a storm. Signing up for emergency evacuation assistance, trimming trees, making a plan for your pets, and preparing your emergency kit should be completed by the time hurricane season begins.

Use the Disaster Kit Checklist in this guide to gather your important papers and emergency supplies – and find out how to avoid last-minute grocery store trips, as well as use tap water, so you don't have to battle the crowds in a rush for bottled water. Be sure to look for your Storm Surge Evacuation Planning Zone to anticipate possible evacuations and remember to jot down the critical contact information of family, friends, neighbors, and work colleagues.

Preparation and awareness are essential. Making sure you are ready is the best way to keep your guard up!

Sincerely,

Jorge Guerra, Jr.
Real Estate Broker
RESF (Real Estate Sales Force)

WATCHES AND WARNINGS

TROPICAL STORM WATCH

Tropical storm conditions are possible, usually within 48 hours.

TROPICAL STORM WARNING

Tropical storm conditions are expected, usually within 36 hours.

HURRICANE WATCH

Hurricane conditions are possible, usually within 48 hours.

HURRICANE WARNING

Hurricane conditions are expected, usually within 36 hours.

TROPICAL STORM

Sustained winds of 39 to 73 mph

HURRICANE

Sustained winds of 74 mph or higher

SAFFIR-SIMPSON HURRICANE WIND SCALE

Category 1: 74 to 95 mph

Category 2: 96 to 110 mph

Category 3: 111 to 129 mph

Category 4: 130 to 156 mph

Category 5: 157 mph or higher

PLANNING FOR AN EMERGENCY

Disaster kits and emergency supplies should be fully stocked by June 1, the start of hurricane season. Once a hurricane warning is declared, most of your preparations should be directed toward your home.

Remember to discuss your family emergency plan ahead of time. Your family may not be together when disaster strikes, so it is important to know how you will contact one another, how you will get back together and what to do in case of an emergency.

Depending on conditions, bus, rail, garbage collection and recycling service, as well as airport and seaport operations, could be affected.

To request Official Hurricane Readiness Guide in an alternate format, call the Miami-Dade County Office of Emergency Management at 305-468-5400.

EMERGENCY & EVACUATION ASSISTANCE PROGRAM (EEAP)

Residents who require evacuation assistance should register for the Emergency & Evacuation Assistance Program (EEAP) before hurricane season to ensure help will be given following an evacuation order. Assistance may also be provided after an emergency.

This program is for individuals with functional and access needs who live alone or with families who:

- cannot evacuate on their own due to medical or specialized transportation needs
- are homebound or bedridden, unable to walk and do not have transportation options
- are on life-sustaining medical equipment that requires electricity
- require assistance with daily living activities

Specialized transportation, safe shelter, medical monitoring and wellness checks are among the services provided for eligible residents. A caregiver or companion should accompany the evacuee throughout the emergency period to ensure the evacuee's needs are met in a timely manner.

Pre-registered residents in the EEAP will receive priority. Visit the Evacuation Assistance webpage found at miamidade.gov/hurricane or call 311 to receive an application and learn more about the program.

Residents in nursing homes, assisted living facilities or group homes must follow their own facilities' emergency plans. Facilities implement their mutual aid agreements should they need to evacuate.

EVACUATIONS

The Miami-Dade County Mayor can issue an order directing the evacuation of specific areas of the county deemed to be in danger, based on a hurricane's track and projected storm surge.

All mobile home residents should evacuate when any evacuation order is issued, regardless of their Storm Surge Planning Zone.

Residents are encouraged to stay with family or friends who live inland in a non-evacuation area.

Evacuation centers should only be considered as a shelter of last resort. Once an evacuation order is given, a list of open evacuation centers will be announced, along with emergency bus pick up sites that will provide transportation to and from the centers. Details will be posted on miamidade.gov and available by calling 311.

If a designated pickup site is not located near you, use Miami-Dade Transit to get to a pickup location. Advise the bus operator of your intention to go to an emergency evacuation pickup site.

Not every evacuation center location will open for every emergency. Decisions are based on the National Hurricane Center's forecast in order to determine when and where landfall will occur.

Each evacuee is allotted 20 square feet of space at an evacuation center, so bring only essential items. All evacuation centers meet Americans with Disabilities Act (ADA) requirements for sheltering. Service animals are permitted.

WHAT YOU SHOULD BRING TO AN EVACUATION CENTER

- Bedding

- Infant and child care items such as formula, diapers, toys, etc.

- Cash

- Personal hygiene items

- Comfort materials such as books, magazines, etc.

- Prescription and over-the-counter medications

- Drinking water

- Snacks

- Extra clothing

- Special items for elderly or disabled family members

It is strongly recommended to bring portable electronic devices — such as phones, tablets and battery packs — fully charged as there are limited outlets at evacuation centers.

For more tips on what to do in case you need to evacuate your home, read the Disaster Kit Checklist on pages 28 and 29.

PET SAFETY

EVACUATING WITH YOUR PETS

In case of a hurricane, take your pets with you.

Pet-Friendly Evacuation Centers (PFEC) are available for residents living in high-risk, flood-prone areas, including barrier islands, coastal communities, mobile homes, or anyone living in the Storm Surge Planning Zone and has been ordered to evacuate. A family member must stay with the pet at the PFEC and the pet must be contained in a crate or pet carrier.

The PFEC locations will be announced as they are opened prior to the storm's arrival. Visit miamidade.gov, call 311 or monitor your local news to keep up with the latest information.

All animals will be assessed to determine if the animal presents a safety risk. Vaccinations and medical treatment are not provided in emergency evacuation shelters.

Animals accepted at pet-friendly evacuation centers include: dogs, cats, ferrets, gerbils, guinea pigs, hamsters, mice, common household birds and certain breeds of rabbits under 10 pounds.

WHAT YOU SHOULD BRING TO A PET-FRIENDLY EVACUATION CENTER

- Proof of residency within an evacuation zone

- ID tags placed on appropriate collars

- Current medical and vaccination records for each pet. Annual rabies vaccinations (for cats and dogs) and a visible Miami-Dade County dog license are required

- A three-day supply of food and supplies for the pets, as well as a suitable carrier or crate; collar, leash or muzzle; and bedding material and toys

GENERAL PET SAFETY TIPS

Place ID tags on appropriate collars and ensure your pets are micro-chipped with your latest information.

Prepare to care for and maintain control over your pets at all times.

It's best to account for 1 1/2 gallons of water, as well as sufficient food and medicine for each animal for at least three days. Don't forget serving bowls

WE ARE PREPARED. ARE YOU?

DON'T LET EMPTY SHELVES AT THE GROCERY STORE STRESS YOU OUT.

The Miami-Dade Water and Sewer Department works 24/7 to ensure that all Miami-Dade residents have safe, uninterrupted water service delivered to your home before, during and after a storm. Invest in water storage containers that you can permanently keep in your hurricane supplies so you never need to worry about water again, giving you the opportunity to focus on keeping your family and property safe.

**STORE ENOUGH WATER
TO HAVE 1 GALLON
OF WATER A DAY PER
PERSON FOR 3 DAYS.**

**Store 1.5 gallons of
water per pet for a
3-day period.**

QUALITY. VALUE. ECONOMIC GROWTH.

WWW.MIAMIDADE.GOV/WATER

STORM PREP

Be sure to have a disaster kit with emergency supplies such as flashlights, batteries, garbage bags and more. Review the Disaster Kit Checklist on pages 28 and 29.

Sign up for emergency alerts at miamidade.gov/account. Read more about essential needs at miamidade.gov/hurricane.

HOME PREPARATION

Take pictures of your home (both interior and exterior) for your homeowner's insurance company.

Protect areas where wind can enter. Windows and doors should be secured with County-approved storm shutters. Another option is to board up windows with 5/8-inch plywood. Tape does NOT prevent windows from breaking.

Protect electronics with surge protectors and waterproof coverings.

Bring in lawn furniture or other outdoor items not tied down that could become airborne.

Withdraw cash from the bank and get fuel for your vehicle, generator and other gas-powered tools.

CONSTRUCTION SITES

In the event of a tropical storm warning or hurricane watch, licensed contractors are obligated to secure their work sites. Potentially hazardous objects must be fastened down or removed.

TOURISTS

Listen to announcements from your hotel, cruise line or airline. Be sure to follow any orders issued by local officials, such as evacuation and sheltering.

Upon activation of the Miami-Dade County Emergency Operations Center, all key service update information will be posted on miamidade.gov.

You can also call the 311 Contact Center and follow Miami-Dade County on social media channels for updated information. For a list of additional important phone numbers, websites and social media channels, turn to page 27.

TREE PRUNING

Do not begin any pruning or cleanup activities or place trash on the curb during a tropical storm or hurricane watch or warning.

Properly pruning trees and shrubs **BEFORE** hurricane season can reduce the debris generated during a storm. Proper tree pruning also increases the likelihood that a tree can weather a storm.

Make sure to consult or hire a certified and licensed arborist prior to pruning trees.

WATER

Fill aluminum or plastic containers with potable water once a hurricane warning is announced. Plan for at least one gallon per person, per day for three to seven days. In addition, keep other containers two-thirds full with potable water and place them in your freezer for ice after a storm.

Before filling your water containers, wash them out with soap and water and rinse them well. Next, fill the container with a solution of one tablespoon of unscented household chlorine bleach — the kind used for laundry — per gallon of water. Let it sit for 10 minutes, then pour out the solution and rinse the container.

GASOLINE STORAGE AND GENERATORS

Store fuel in an approved container, holding five gallons or less, in a cool, dry, ventilated and secure area, away from appliances. Keep it out of the reach of children.

Generators must only be operated outside of inhabited structures in a well-ventilated area away from windows, doors, vents or other openings. They should **NOT** be operated on the balcony of a multi-unit structure.

TRASH PICKUP

Dispose of household and yard trash before a storm:

- with your twice-weekly garbage collection service
- by scheduling a bulky waste pickup online or calling 311
- by dropping off trash or tree cuttings at one of 13 Neighborhood Trash and Recycling Centers

13 NEIGHBORHOOD TRASH AND RECYCLING CENTERS

Open daily from 7 a.m. to 5:30 p.m.

North Dade
21500 NW 47 Ave.

Norwood
19901 NW 7 Ave.

Golden Glades
140 NW 160 St.

Palm Springs North
7870 NW 178 St.

West Little River
1830 NW 79 St.

Snapper Creek
2200 SW 117 Ave.

Sunset Kendall
8000 SW 107 Ave.

Richmond Heights
14050 Boggs Dr.

Chapman Field
13600 SW 60 Ave.

Eureka Drive
9401 SW 184 St.

West Perrine
16651 SW 107 Ave.

South Miami Heights
20800 SW 117 Ct.

Moody Drive
12970 SW 268 St.

Secure your trash and recycling carts in a garage, utility shed or covered patio before the storm arrives.

If you must dispose of trash or bulky waste — including tree trimmings — weather conditions will determine whether Neighborhood Trash and Recycling Centers are open. Visit miamidade.gov or call 311 for more information.

If you do not receive waste collection services from Miami-Dade County, contact your city for information about waste removal services before and after a storm.

GRASS CLIPPINGS

Landscapers and residents should not blow grass clippings onto sidewalks, streets and storm drains, which can lead to street flooding. Instead, they should be bagged or blown back onto the lawn where they can serve as natural mulch.

TRANSPORTATION

EVACUATIONS

Evacuation centers should only be considered as a shelter of last resort. Once an evacuation order is given, a list of open evacuation centers will be announced. Details will be posted on miamidade.gov and available by calling 311.

PUBLIC TRANSIT

Emergency bus pickup sites will provide transportation to and from evacuation centers. Visit the Emergency Evacuations webpage found at miamidade.gov/hurricane or call 311.

Metrobus, Metrorail and Metromover services, as well as County transportation facilities, may shut down at sustained 39 mph winds.

DRIVING ON THE ROAD

Expressway tolls may be lifted to ease traffic flow.

Power outages are common during storms. When traffic signals are malfunctioning, make sure to observe four-way stop conditions at all intersections. Call 311 to report damaged traffic signs, signals or street lights.

TRAVEL

For seaport and airport passenger information, contact your specific carrier.

BOATS

If you own a boat, remember to secure it properly. Use double lines at a marina or consider dry-dock storage. Never try to ride out a hurricane in your boat.

All marinas will close when sustained winds reach 39 mph. Biscayne National Park tows all boats to the Everglades and closes at least 24 hours before the landfall of a tropical storm or hurricane.

Once evacuations have started off the barrier islands, Intracoastal Waterway bridges open very infrequently to allow marine traffic to pass until lockdown.

Local law enforcement agencies will issue advisories regarding when bridges will be locked down to marine traffic. Bridges generally go into lockdown at least eight hours before winds of 39 mph are expected.

Sign up for marina alerts at miamidade.gov/account.

The Waze Connected Citizens Program allows residents to share travel suggestions among drivers using Waze. Download the free Waze mobile application today.

WEATHER ANY STORM WITH THE HELP OF YOUR LIBRARY CARD!

BEFORE: Enjoy some entertainment while you wait out the storm. Download our eBook, eAudiobook, movie and music apps at www.mdpls.org/apps or through our online library at www.mdpls.org.

DURING: Our online library will remain accessible as long as weather permits. Previously downloaded materials should be accessible on your devices.

AFTER: Branches will begin opening as soon as it is safe to do so. Come to the library to charge your mobile devices, get Wi-Fi access, use computers and laptops, and just relax.

DON'T HAVE A LIBRARY CARD?

Sign up for an eCard at ecard.mdpls.org and get instant access to our online library!

Tips for Buying During Hurricane Season

1

If you are purchasing during hurricane season, make sure you perform a thorough inspection of the property and perform a walk through immediately prior to closing.

2

Closings by contract are to be rescheduled if the property is not insurable at closing. Carriers often will not bind insurance during times of storms.

3

If the seller files a claim with an insurance carrier prior to closing, this will need to be addressed in order to ensure the buyer's policy is not affected in any way.

STORM SURGE PLANNING ZONES

Storm surge is the greatest threat to life and property from a hurricane. It occurs when water from the ocean is pushed on shore by the force of tropical storms or hurricanes.

A Storm Surge Planning Zone is an area that could be affected by a storm surge of 1 1/2 feet or higher during a hurricane. Evacuation decisions are heavily predicated on storm surge planning.

Five zones, marked A through E, identify the risk of storm surge. Zone A is at greatest risk for Category 1 storms and higher. These planning zones deal strictly with storm surge, not your flood zone.

Upon identification of a threat, each zone (or portions of a zone) will be evacuated depending on the hurricane's track and projected storm surge, independent of the hurricane's category.

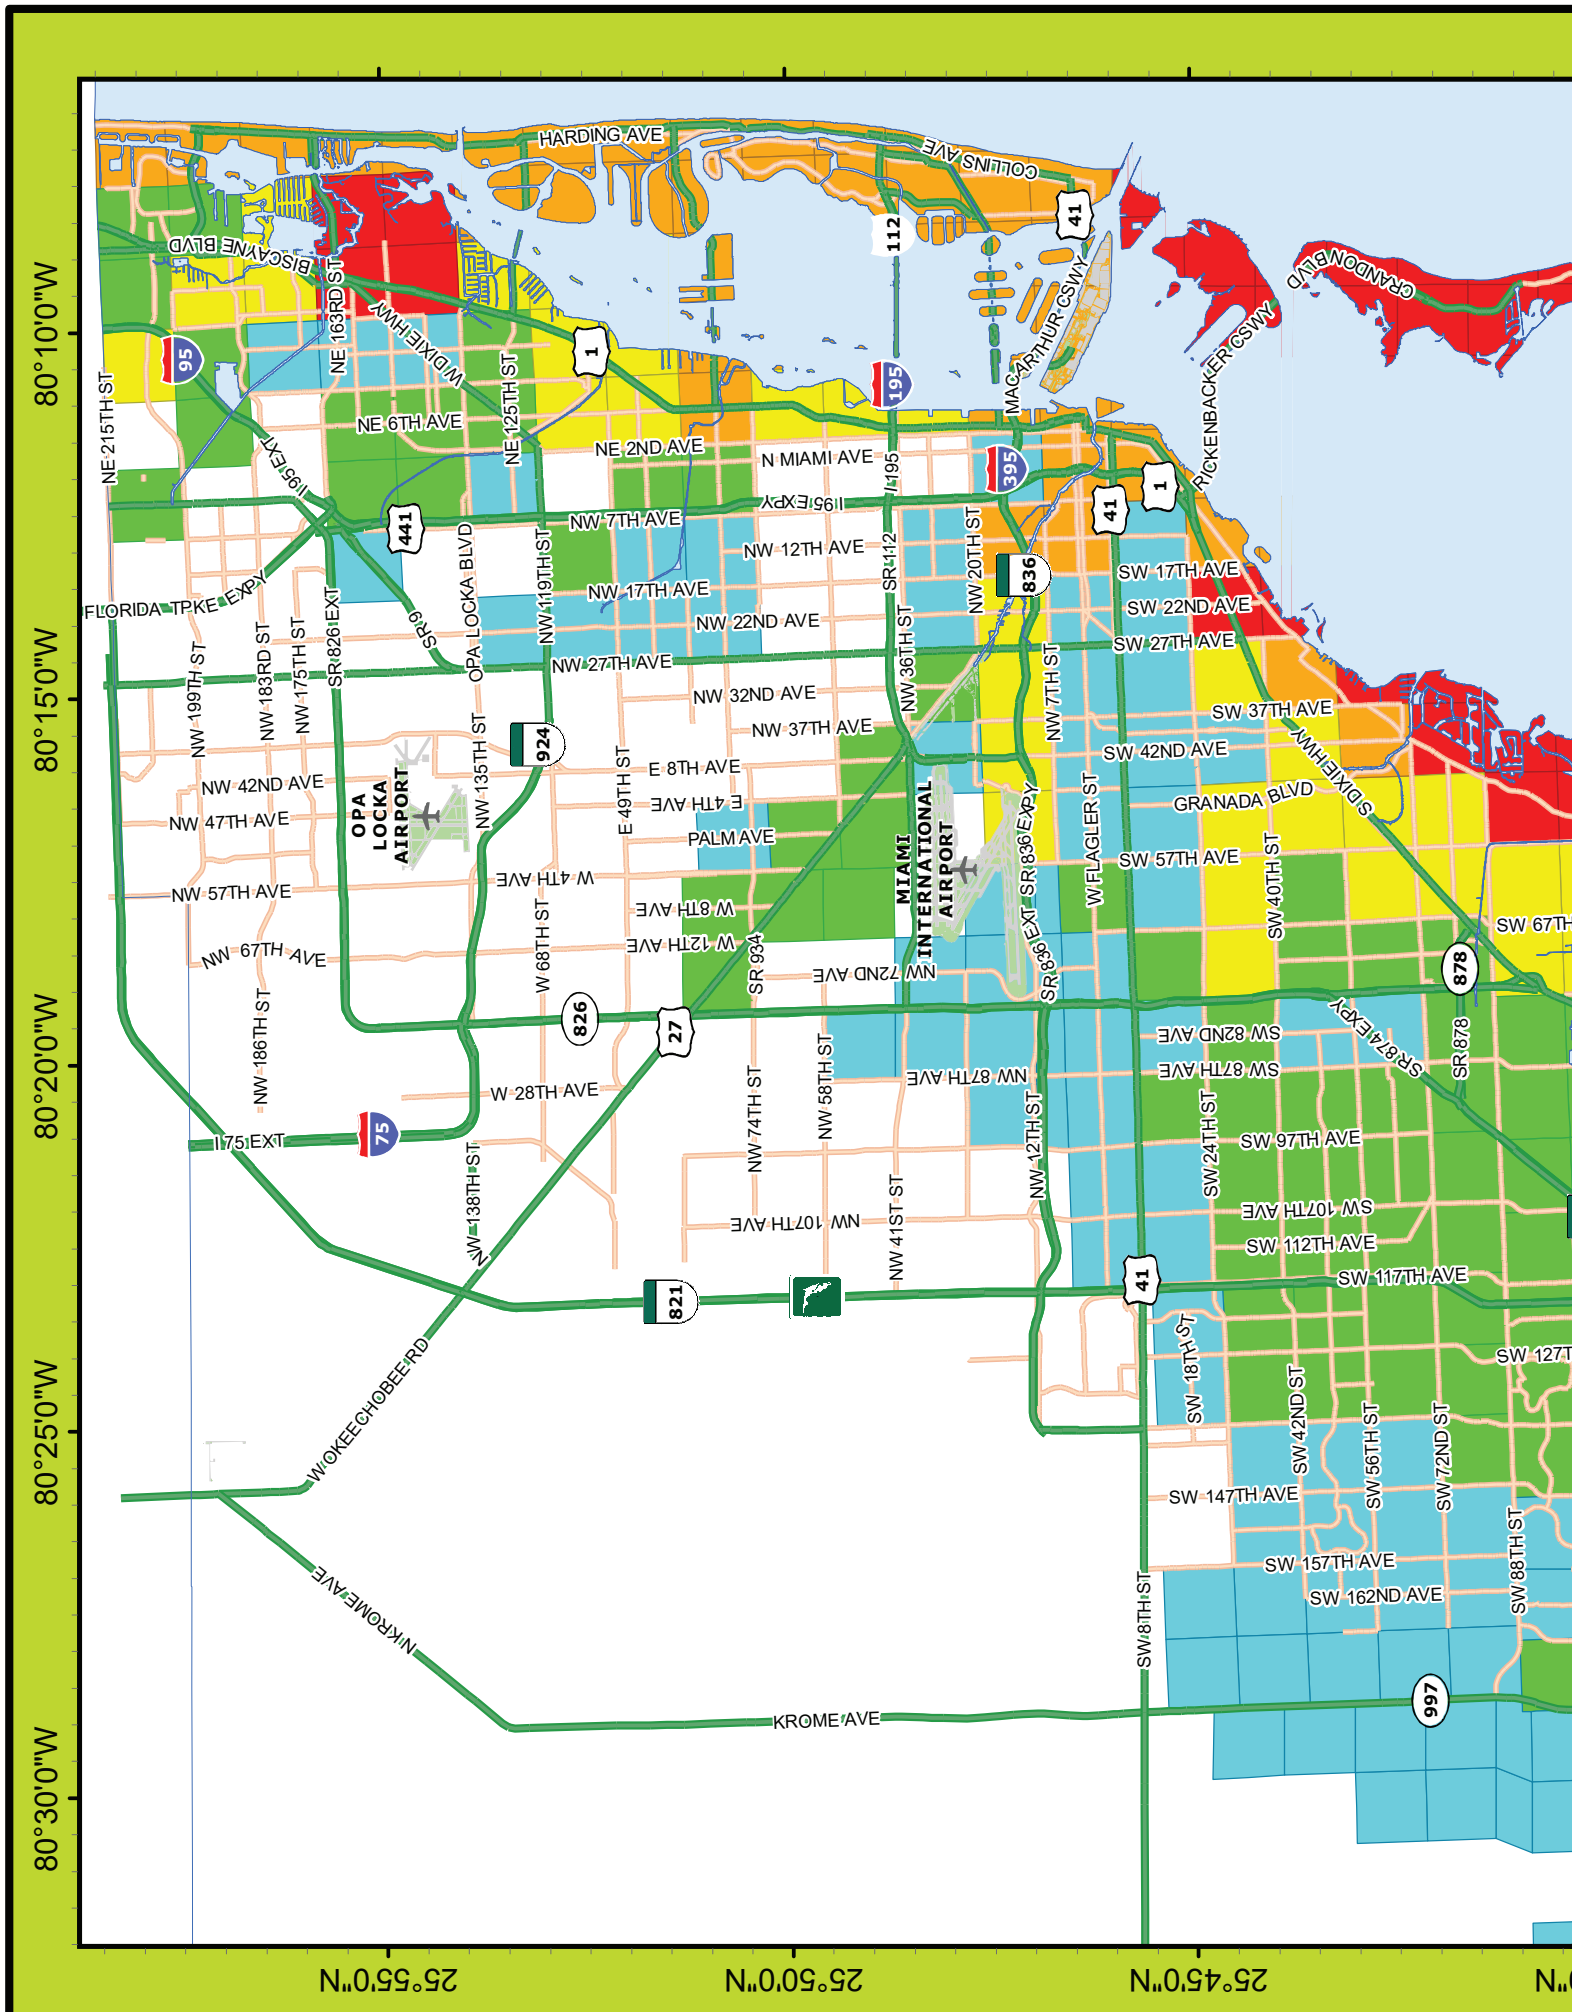

Storm Surge Planning Zones are drawn using Sea, Lake and Overland Surge from Hurricanes (SLOSH) model grids that incorporate local physical features such as geographic coastal areas, bays, rivers, water depth and bridges. Areas along canals, rivers and further inland have been identified as being at risk for storm surge based on SLOSH data.

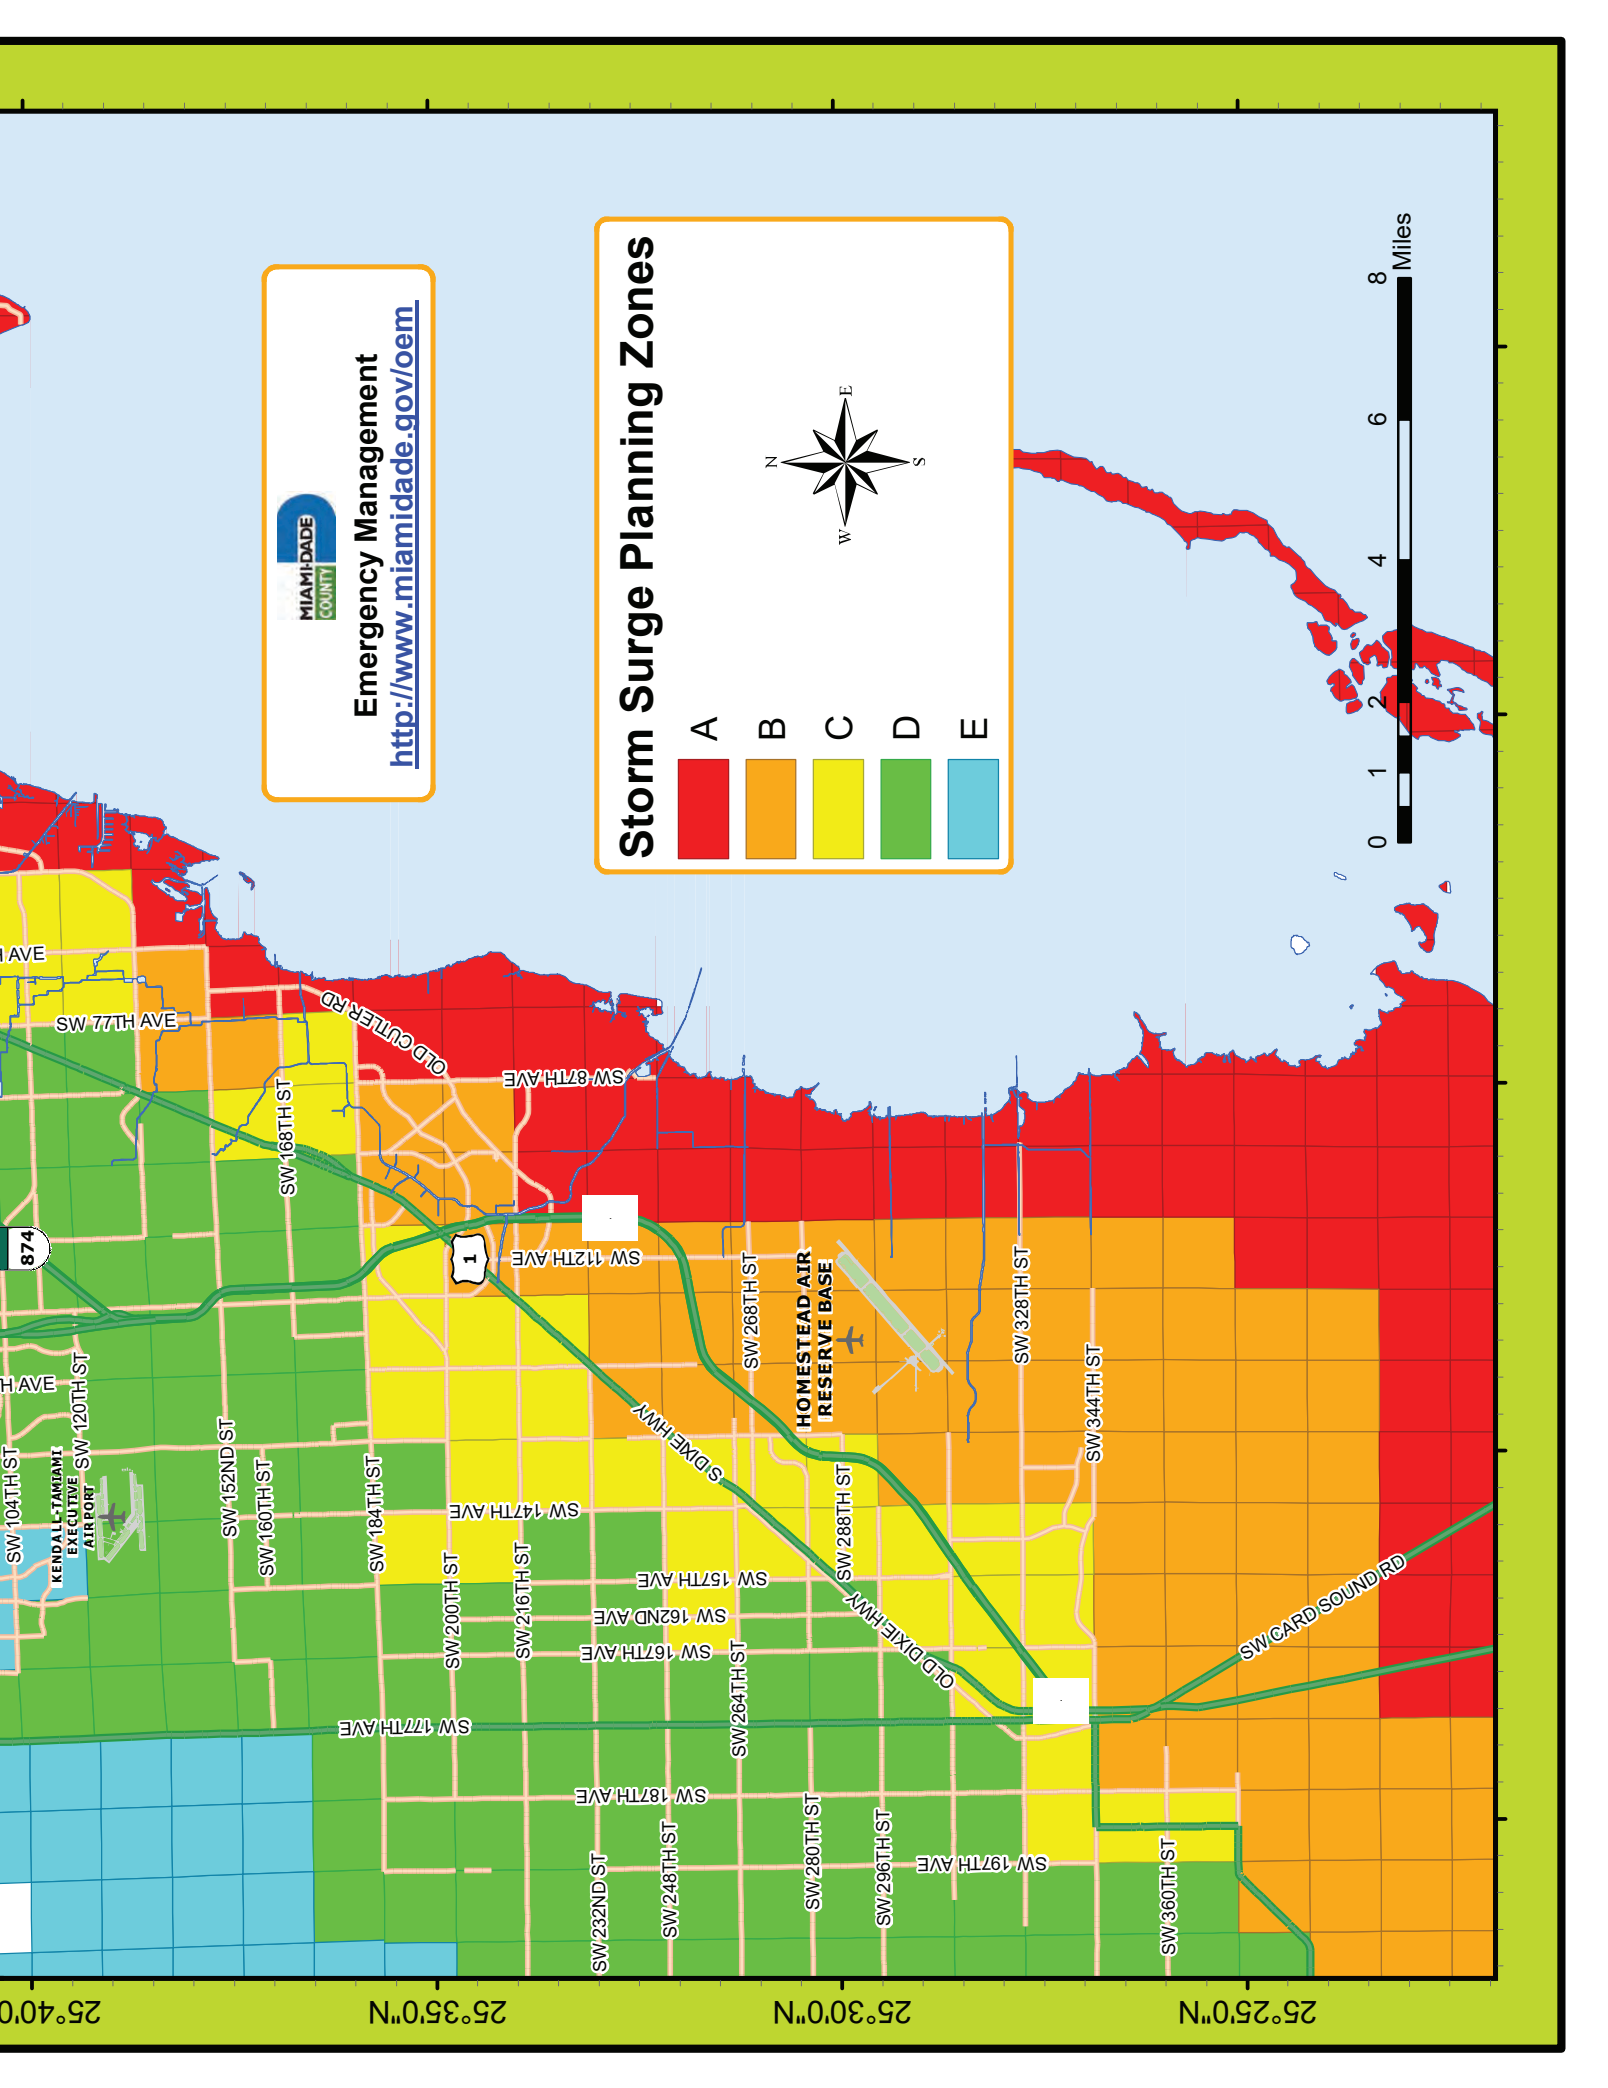

All Miami-Dade County residents should know which Storm Surge Planning Zone you live in. To determine your zone, go to miamidade.gov/hurricane, find the Storm Surge Planning Zone section, then enter your address. You can also download the Ready MDC mobile application or call 311.

KNOW YOUR ZONE

- **Zone A** is at greatest risk for storm surge for Category 1 and higher storms
- **Zone B** is at risk for storm surge for Category 2 and higher storms
- **Zone C** is at risk for storm surge for Category 3 and higher storms
- **Zone D** is at risk for storm surge for Category 4 and higher storms
- **Zone E** is at risk for storm surge from Category 5 storms

DURING

STAYING SAFE

Monitor **miamidade.gov**, your radio or television for weather updates and instructions from public safety officials.

Stay indoors, preferably in a room with no windows.

Take your emergency kit and disaster supplies with you if you move from room to room or if you evacuate to a shelter.

If flooding threatens your home, turn off electricity at the main breaker.

Use flashlights, not candles or kerosene lamps, as your light source.

Avoid using the phone and do not bathe or shower during the storm.

If you lose power, turn off all major appliances.

Do not go outside during the eye of the storm. The calm is brief before hurricane-force winds return.

Keep children informed about what's happening and watch for signs of stress.

Keep animals in their carriers or crate.

Get in the bathtub and pull a mattress over you to protect yourself from debris if your home begins to come apart.

POST-STORM SAFETY

Many disaster-related injuries occur in the aftermath of a tropical storm or hurricane. Here are some ways to stay safe.

Remain inside until local authorities say it's safe to go outside.

If you must go outside, beware of fallen objects and downed electrical wires. Report downed power lines to Florida Power & Light.

Inspect your home for damage to assure it's safe to stay there, and check for gas leaks.

Contact your insurance agent. Take pictures of damage and keep good records of repair and cleanup costs.

Stay out of areas with extensive storm damage.

Don't open manhole covers to drain flooded roadways. This could overburden the sewer system and cause overflows.

If you live in an area where residential and commercial uses are co-located (such as plant nurseries), keep residential and commercial debris in separate piles.

Obey all curfew and emergency orders.

Place debris piles on the right-of-way, away from fences, mailboxes, storm drains, manholes and low-hanging wires. Don't place debris on vacant lots, farmland or in front of commercial properties.

If your property isn't near a public right-of-way, or if you live in a gated community, do not move debris to the nearest right-of-way until instructed by government officials.

Do not operate charcoal grills, propane camping stoves or generators indoors.

Discard any refrigerated food you suspect is spoiled.

When clearing storm debris, use a broom instead of a hose to conserve water. Sweep and bag debris so it doesn't clog storm drains and cause sewage overflows.

Report lost or damaged garbage or recycling carts for replacement by calling 311.

Support relief efforts in other affected areas. Monetary donations to voluntary organizations is the primary way to help.

Be patient and careful. Cleanup after a storm can take time.

WHAT TO WATCH FOR

FLOODWATERS

Do not drive or walk through standing water. It may be much deeper than you realize and there may be hidden hazards.

Following a storm, if flooding is affecting the interior of your property, report it by calling 311. If you have broken or leaking pipes, call the Water and Sewer Department at 305-274-9272.

PRICE GOUGING

If a state of emergency is declared by the Governor of Florida or the Miami-Dade County Mayor, price gouging regulations come into effect.

Price gouging is considered an “unconscionable price,” determined by comparing the price asked during an emergency with what was charged for the same commodity during the preceding 30-day period. To report price gouging, call the Florida Office of the Attorney General at 1-866-966-7226.

SWIMMING POOL BARRIERS

After a hurricane, if your swimming pool barrier has fallen or is damaged, you must repair or replace it as a priority. A swimming pool poses a life safety threat even if it is empty.

Until you can replace or repair your pool barrier, a temporary contractor safety mesh may be erected. You can buy temporary mesh at local home improvement stores.

Also, if your swimming pool is not functioning normally, add chlorine on a regular basis to avoid excessive growth of algae and mosquito breeding conditions.

MOSQUITOES

Rainy, wet conditions that often follow a hurricane can result in an increase in mosquitoes. To reduce breeding, empty standing water in children's toys, uncovered boats and watercraft that are not draining water, as well as from trash cans and lids.

Remember the following to avoid mosquito bites:

- Repair screening on windows, doors, porches and patios

- Avoid being outdoors at dusk and dawn when mosquitoes are more likely to bite

- Dress in light, long and loose clothing that covers the skin

- Use insect repellents containing the EPA-recommended ingredient DEET

Learn more at miamidade.gov/mosquito.

BOIL WATER ORDERS

In the unlikely event that a precautionary boil water order is initiated after a storm, the Florida Department of Health in Miami-Dade County advises that water used to drink, cook with, brush teeth, make ice or wash dishes is boiled prior to use. The water should be brought to a full rolling boil for at least one minute.

There is no issue with using the water to shower, providing you do not have open wounds. In the event you cannot boil the water, use regular, household, unscented chlorine bleach to disinfect the water. Use eight drops of bleach per gallon of water, stir and let stand for 30 minutes.

If the water appears cloudy, repeat the process and it is now ready to be used. Another option is to use water disinfectant tablets, which can be found where sporting or camping supplies are sold.

If you don't receive your water from Miami-Dade County, monitor the status of your drinking water from your municipal utility provider.

From storm Preparation to Recovery

There are many opportunities to offer assistance to our fellow neighbors.

If you know of someone with limited mobility and medical issues, help them sign up for the Emergency & Evacuation Assistance Program (EEAP) to ensure they receive assistance.

Miami-Dade County offers free training in basic disaster response skills. Learn fire safety, light search and rescue, team organization and disaster medical operations. For more information on Community Emergency Response Team (CERT) programs, email cert@miamidade.gov.

Following a storm, Miami-Dade Parks plays a big role in recovery efforts – among them, clearing tree debris, diagnosing and inspecting the condition of trees, and opening community centers and pools for residents seeking relief.

If you want to help Parks in the post-hurricane debris cleanup efforts, sign up to volunteer and join in clearing the way. For more information, visit miamidade.gov/parks after a storm.

Come together and help fellow Miami-Dade County residents stay safe before, during and after a storm.

Sign up for volunteer opportunities by registering at miamidade.gov/account.

DISASTER KIT CHECKLIST

Before hurricane season, gather the supplies you might need in an evacuation and store them in an easy-to-carry waterproof container such as a backpack or duffle bag.

- ☐ At least one gallon of water per person for three to seven days

- ☐ First-aid kit

- ☐ Non-perishable snacks and packaged or canned food for at least three to seven days

- ☐ Fully-charged mobile phone with charger

- ☐ Manual can opener

- ☐ Quiet games, toys or reading materials

- ☐ Change of clothing, rain gear and sturdy shoes

- ☐ Eyeglasses, contact lenses, hearing aid batteries

- ☐ Pet care items, including food

- ☐ Bedding for a small space

- ☐ Prescription medications

- ☐ Flashlight, battery-powered radio and batteries

- ☐ Personal hygiene items

- ☐ Extra set of car keys

- ☐ Special items and food for infants, elderly or disabled family members

- ☐ Cash

- ☐ Garbage bags
