

OUR MISSION

Our main goal is to help improve the lives of families and children living with autism with the use of an autism service dog.

We also have the goal to educate the public on the benefits of service dogs for children with autism and do that through social media and presentations.

UNCONDITIONAL LOVE

Service Dog Etiquette

- Talk to the handler - not the dog
- Do not touch - the dog or the handler or child
- Do not distract - the dog with noises
- Do not feed - the dog is working
- Do not allow your dog near - the dog or handler
- Do not assume you can help - if you want to help, ask first
- Do not be offended - if the handler does not wish to chat or accept help

MACY'S AUTISM PALS

Unlock something inside your child through a compassionate service dog. Give them a sense of comfort and companionship that goes beyond what they are able to get on their own. Help them feel safe when they are struggling with their world.

WE TRAIN WORLD CHANGERS

An autism service dog can give a sense of peace and comfort through touch and companionship.

These companionate dogs enjoy every moment they spend with their child.

These service dogs get trained to help in every situation including everyday walks, school, doctor and dentist appointments, church, grocery stores and restaurants to name a few.

A MACY'S AUTISM PALS SERVICE DOG CAN HELP A CHILD WITH AUTISM IN SO MANY WAYS

Increase Socialization: Having the safety and stability of a service dog can allow you as a family to get out of the house and participate in new experiences on a more regular basis. When individuals see your child with their service dog, often they may engage your child, which encourages them to talk about their dog. Parents have often observed an increase in communication skills, sometimes soon after meeting their dog.

You may choose to not allow people to engage with the service dog due to safety reasons. By using a "do not pet" patch on the service vest allows you more control of the environment in public, helping the dog to stay focused on his job.

Provide Stability: Children with autism often have a difficult time transitioning to new environments and may experience sensory overload. The service dog remains a constant in their life and provides stability. Having a "constant" companion allows your child to focus on the service dog as opposed to the new environment. This assists your child in dealing with a new situation or change in routine. Service dogs can be used to help obtain better sleep patterns for children and parents by having the dog sleep with your child in their room.

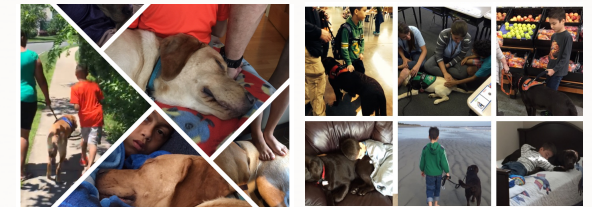

Reduce Outbursts: Our Autism Service dogs help disrupt behaviors by making contact with your child by touch or by laying on their lap. With screaming or other outbursts, the dog may act as a tactile distraction to redirect the child to a more positive behavior. Some dogs will learn this behavior over time or can be trained to proactively perform a "snuggle".

Increase Safety: Many children with autism have no concept of danger and run away. Our dogs can be tethered to your child and trained to take commands from you. The tether prevents your child from going any further than it allows and provides you with an added sense of security.

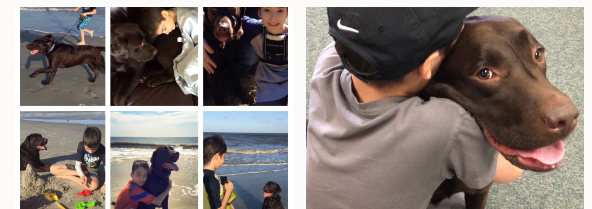

English Labrador Retrievers can handle most anything

We start with a puppy and train for two years

We train you in your home so you know what to do

Your child gets to experience training with you

It's time to get out of the house and enjoy your day

There is love here for your child in each moment
