

Sigil Weaving

Heathen Moon

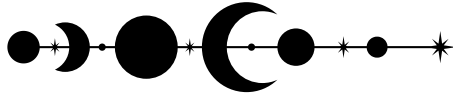

The Sigil I have conjured forth (available in the gallery portion of our website) for you is an extension of spirit and in highest alignment with our favourite selves (we don't believe in "highest selves" stuff around here). The sigil I created will work on it's own in tandem with the energy you call forth to assist in your work. The Sigils themselves can be active or passive. Meaning the reason behind your desire for the Sigil plays an important role in how it will work.

If the Sigil you have selected is to be used passively (sympathetic), then you won't need to do anything. Place the Sigil anywhere that feels right, and allow it to be a touchstone for the energy to accumulate and disperse overtime. Every time you glance at the sigil it releases energy and is charged.

If the Sigil is intended for specific work / magic then charging and activating the Sigil with your energy is an important step.

Below you will find ways to Charge and Activate your Sigil. As always, take what resonates and leave the rest, follow your flow and your own gnosis throughout the process.

*Please note the activation and charging examples are beneficial for your own personal sigils as well as the ones I have conjured forth!

CHARGING:

In the creation process, you've built up a substantial amount of psychological, emotional and creative tension, all around a symbol. This is the "charge" But you can also "fill" the sigil with more of an energetic charge, in very similar ways as you will activate. I think of the charging portion as the mid point of sigil creation.

There are as many methods for activating / charging a sigil as there are practitioners of sigil magic, but they all share a common theme of buildup and release.

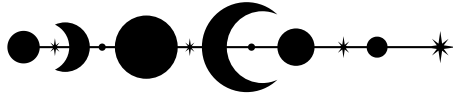

There is also Passive Activation and Active Activation to consider.

All sigils are passive (or sympathetic) until you decide to use an active activation method.

ACTIVATING:

Anything involving energy, like light, heat, movement or emotion is an element in activating.

- Lighting a candle with the sigil carved into it - Active (but slow release so some say passive)
- Drawing your sigil - Passive
- Drawing your sigil on a bay leaf and burning it - Active
- Placing a crystal on top of the Sigil - Active
- Charging in the Sun or Moon light - Active
- Rubbing your hands together then putting your hands overtop of the Sigil (imbuing your energy) - Active
- Hum/sing/chant while looking at the Sigil - Active
- Anointing the Sigil with oil - Active
- Drawing the sigil on your body - Passive
- Submerge in Water or place a cup of water on top of the Sigil - Active
- Place or carve on a piece of food - Active
- Blow air from you or within nature on the Sigil - Active
- Draw the sigil in the air and walk purposefully through it - Active
- Use herbs or smoke to imbue energy into the Sigil - Passive
- Create a crystal grid surrounding the Sigil - Active
- Spicy charging - Active

CLASSES:

I have been teaching Sigil Craft / Weaving as an Intro class and Intermediate levels for 6 years and have amazing cohorts of folks!

I teach in-person and online with various offerings involving Sigil Crafting.

To stay in touch and up to date with these offerings, follow our instagram @heathenmoon.ca and sign up for our newsletter!

If you have any questions, feel free to reach out via the instagram handle above or you can email heathenmoonshoppe@gmail.com as well.

See you in the Sigil Crafting aethers!
