Stakeholder: ESO & Entrepreneur	Stakeholder: ESO & Entrepreneur	Stakeholder: ESO & Entrepreneur	Stakeholder: ESO & Entrepreneur	Stakeholder: ESO & Entrepreneur
Utility: The agent layer provides an overview of integrated chat-based agents and voice agents for entrepreneur support. This layer is dedicated to capturing and advancing the state of the entrepreneur. Enables entrepreneurs to initiate and orchestrate ecosystem activities.	Utility: Specialized AI-empowered learning paths for participating entrepreneurs. Provides path and description for those participating in the dedicated LLM workspace.	Utility: User guide to gain an understanding of Agentic Entrepreneur Support System. Provides an in-depth view of the layers and orchestration.	Utility: The key layer as a business support companion following the State-Compute-Prescribe methodology for first and second stage firms. Emphasizes Human-to-AI (H2A) solutions for business support.	Utility: This layer contains the canvases for use by entrepreneurs. Each canvas is connected to an entrepreneur support workflow that allows participants to initiate and orchestrate ecosystem activities.
