Industrial Energy alongside Engie has secured Priddy Wind as a renewable energy source for the 1K1 building in Conshohocken, Pennsylvania. This represents one of multiple renewable deals between the organizations, as KPG continues to convert their portfolio to running on green energy.

Keystone Property Group has made significant sustainable improvements to 1K1. “The building’s north and south curtain walls with full-height, smart glass windows. 1K1 is the first building in the market to use cutting-edge smart glass technology on such a scale. With a range of auto-sensing tint levels, the glass anticipates the sun’s movement and adjusts in response to temperature levels, glare, and daylight.” Along with these improvements, the building will now be powered by wind energy.

*Industrial Energy is one of the longest tenured energy advisors in the industry. We represent supply of energy for businesses, via strategic partnerships, which have afforded us access to proprietary solutions and contractual arrangements for our clients.*

*Our company leadership has over 35 years of experience in providing supply, strategy, and full coverage, and we function in the form of on-staff energy advisors, to best assist our customers and end users.*

*Our group has also led in the area of renewable energy supply, with site-specific PPAs and VPPAs. (Power Purchasing Agreements and Virtual Power Purchasing Agreements). Industrial Energy has renewable supply availability across the country.*
