Industrial Energy alongside Engie Resources, has secured Priddy Wind as a renewable energy source for KieranTimberlake, a prominent architecture firm in Philadelphia, PA. KieranTimberlake, a specialist in sustainable design, was looking for a renewable energy solution that could be easily utilized, would reduce their Scope 2 emissions to zero, and could be easily implemented with their design clients if requested. Priddy Wind was able to fit these needs.

“Founded in 1984, KieranTimberlake brings together the experience and talents of over 100 professionals of diverse backgrounds and abilities in a practice that is recognized worldwide. Our projects include the programming, planning, and design of new structures as well as the conservation, renovation, and transformation of existing buildings, with special expertise in education, government, arts and culture, civic, and residential projects.”

Industrial Energy is one of the longest tenured energy advisors in the industry. We represent supply of energy for businesses, via strategic partnerships, which have afforded us access to proprietary solutions and contractual arrangements for our clients.

Our company leadership has over 35 years of experience in providing supply, strategy, and full coverage, and we function in the form of on-staff energy advisors, to best assist our customers and end users.

Our group has also led in the area of renewable energy supply, with site-specific PPAs and VPPAs. (Power Purchasing Agreements and Virtual Power Purchasing Agreements). Industrial Energy has renewable supply availability across the country.
