Industrial Energy alongside Engie Resources, has secured Priddy Wind as a renewable energy source for the National Constitution Center in Philadelphia, PA. This comes as Industrial Energy continues to build out their renewable energy program for museums.

“We are extremely happy to have a solution for museums and similar businesses, to provide them a site-specific renewable energy product, without the need for complex PPA/ VPPA contracts or a settlement for differences” said Christian Amabile from Industrial Energy.

“The National Constitution Center brings together people of all ages and perspectives, across America and around the world, to learn about, debate, and celebrate the greatest vision of human freedom in history, the U.S. Constitution.

*A private, nonprofit organization, the Center serves as America’s leading platform for constitutional education and debate. As the **MUSEUM OF WE THE PEOPLE**, the Center brings the Constitution to life for visitors of all ages through interactive programs and exhibits. As **AMERICA’S TOWN HALL**, the Center brings the leading conservative and liberal thought leaders together to debate the Constitution on all media platforms. As a **HEADQUARTERS FOR CIVIC EDUCATION**, the Center delivers the best educational programs and online resources that inspire citizens and engage all Americans in learning about the U.S. Constitution.”*

Industrial Energy is one of the longest tenured energy advisors in the industry. We represent supply of energy for businesses, via strategic partnerships, which have afforded us access to proprietary solutions and contractual arrangements for our clients.

Our company leadership has over 35 years of experience in providing supply, strategy, and full coverage, and we function in the form of on-staff energy advisors, to best assist our customers and end users.

Our group has also led in the area of renewable energy supply, with site-specific PPAs and VPPAs. (Power Purchasing Agreements and Virtual Power Purchasing Agreements). Industrial Energy has renewable supply availability across the country.
