

Very excited to be attending the inaugural Pennsylvania Energy and AI summit organized and hosted by US Senator [David McCormick](#). Working alongside [UGI Energy Services](#), we have developed an extremely appealing package for data center organizations. We have the capability to deliver some of the most cost-effective and reliable energy available in the country, and through additional partnerships have leading solutions for land acquisition, generation, etc.

If you are attending the Pennsylvania Energy and Innovation Summit on July 15th, please reach out, as we would love to discuss potential collaborations!
