

Emily Vandalovsky

Assignment 2 Evaluation

Group 3

**Scores:**

Required Elements of the website: 10

A high-quality, informative website covers several topics from descriptive and inferential statistics. The site consists of more than five pages, including Resources, its design is homogeneous, and the style is user-friendly. It is easy to navigate and full of information delivered in clear format. In addition to the required definitions and videos created by each team member, each web page contains extra resources related to the topic.

Content: 15

The examples are easy to follow. The visual clarity of the delivered information is apparent throughout the site. The quality of the written and video-recorded content is of high level with great attention to detail and comprehensive delivery style. The site allows visitors to grasp information easily and thoroughly. The data sets are relevant and easy to understand, especially with the own page dedicated to Datasets alone. Nice touch on the Group Members menu! 😊 . Increasing the volume in some of the videos would be beneficial to the viewers.
