

All health sciences academic institutions need education resources covering all aspects of health and wellness, including mental health, nutrition, physical/occupational therapy, pre-hospital, and pre-hospital. All resources should have current information. Only medical publications, such as journals, printed in the last 12 months are accepted.

Step-by-step shipping instructions and important information are available on the GML website. Simply download the “*GML Shipping Information and Instructions*” pdf.

Current Health Sciences Recipients

Ghana

Medix College

c/o

Leslie Sowah Odoi-Atsem

6518 Princess Garden Parkway

Lanham, MD 20706

Medix College is in Adjiriganor, Accra, Ghana. Medix is a tertiary educational institution and is requesting textbooks and references for its allied health professional students. These textbooks will enhance their knowledge in the healthcare sector and will in turn improve the healthcare services in Ghana. Medix offers diploma's and certificates in Dental Hygienist, Pharmacy Technician, and Medical Assistant.

The need for Allied Health Professionals in Ghana is crucial as these group of health professionals can support physicians by applying their expertise to prevent disease transmission, diagnose, treat, and rehabilitate people of all ages and all specialties. Together they can deliver direct patient care, rehabilitation, treatment, diagnostics, and health improvement interventions as part of improvement in our health systems.

Colleges of Veterinary Medicine Recipients

Ghana, Kenya, Uganda, Tanzania, and Ethiopia

Hans Goertz

University of Tennessee Institute of Agriculture (UTIA)

McCord 101C, 2640 Morgan Cir Drive, Knoxville, TN 37996

The University of Tennessee (UT) has been selected to host a cohort of 10 African veterinary professors by the U.S. Department of Agriculture's Faculty Exchange Program. This program is designed to assist developing countries to improve their agricultural education, research, and extension programs through exchanges with U.S. universities.

Page 2

The cohort of African veterinary professors will spend the fall 2021 semester under the guidance of a faculty mentor at the UT Knoxville campus. They will participate in coursework, research activities, and field visits during the exchange.

The UT College of Veterinary Medicine is requesting veterinary textbooks and references to send with these professors when they return to their home institutions in Ghana, Kenya, Uganda, Tanzania, and Ethiopia. The Faculty Exchange Program will pay for additional checked luggage for the participants return travel.
