## **PET SITTING FOR SPECIAL NEEDS DOGS**

Does your dog require medication? Insulin? Too aggressive for the kennel? In addition to being a behavioral trainer, I am doggy first aid and CPR certified, and have experience as a vet tech. With decades of dealing with medically and behaviorally challenging dogs, I will come to your home, stay with your pets, and love them like my own. Your pets are never left alone for more than 3 hours during the day, and will enjoy their regular routine so you can relax and enjoy your vacation. Because I reserve this service for special needs clients only, and because it requires experience & limits my capacity to train regular clients, I have to reflect it in the price. Service includes daily walks, play, feeding, medicating, and of course, lots of love.

**In Home Special Needs Pet Care \$100** per day
