Note B.O.A.C Warwick was of a type which is still secret. It had two presumably Centaurus motors driving four bladed airscrews with spinners. Large intakes were on the top of the motors. The nose had glasswork and resembled the Coastal Command version which is thought to be the MK V. The B.O.A.C badge was painted on each side of the nose and the orthodox B.O.A.C markings were seen beneath the wings and on sides of fuselage.

Oxford Nos
 V3590 had Polish insignia on stbd. side of nose
