near gun pos.

1 Defiant

1 Blenheim painted black

A mosquito seen engaging 2 Black Widows in a dogfight at about 6,000 ft. All three were travelling at over 300 MPH and made wing tip trails for over a minute, the longest time being 80 secs. for one of the Black Widows. At one time the trails from one of these aircraft were seen to extend for about ten times the length of the plane. Flying conditions at the time were good, there being high cloud.

Typhoons were also seen making wing tip trails when peeling off to land but these were of shorter duration and made at a lower altitude (200 FT)
