

Silver Springs Lake | Riparian Restoration Program

Aquatic Plant Management LLC (APM) is partnering with the Silver Springs Lake community to provide **lakefront restoration service** available to individual property owners. This program is designed to maintain and improve shoreline areas through diver removal of nuisance aquatic vegetation and debris.

Scope of Work

APM crews consist of trained divers and support staff who:

- Remove nuisance or excessive aquatic vegetation from nearshore areas
- Rake and clear shoreline zones of organic material and debris
- Remove foreign objects or obstructions affecting lake use

All material removed will be collected and disposed of off-site. Work is performed using manual methods only; no machines or chemical treatments are used.

Service Options

Lot-owners may select from two service durations:

- **Half Day (4 hours on site) – \$1,100**
- **Full Day (8 hours on site) – \$2,200**

Charges are based on crew time on site rather than on area treated or specific results. Actual outcomes will depend on site conditions and vegetation density.

Sign Up

Contact the Lake Preservation Committee point of contact to sign up for the service. Deadline to sign up for service is **January 1st, 2026**.

Payment & Scheduling

Once APM receives the list of lot-owners on sign up list, APM will coordinate strategy planning & payment. Payment deadline is **April 15th, 2026**. Service will occur in Spring 2026 and specific date(s) will be communicated by APM at least two weeks in advance of service.
