

**INTEGRATED MRO SOLUTIONS.
BUILT FOR CONTINUITY.**

OPERATIONAL SUPPORT FOR DEMANDING INDUSTRIES

We focus on MRO solutions for industrial operations that require continuity, responsiveness, and control.

We combine strategic sourcing, dependable follow-through, and high-level service to turn operational needs into reliable solutions.

We are built to support our customers with professionalism, precision, and a long-term operational mindset.

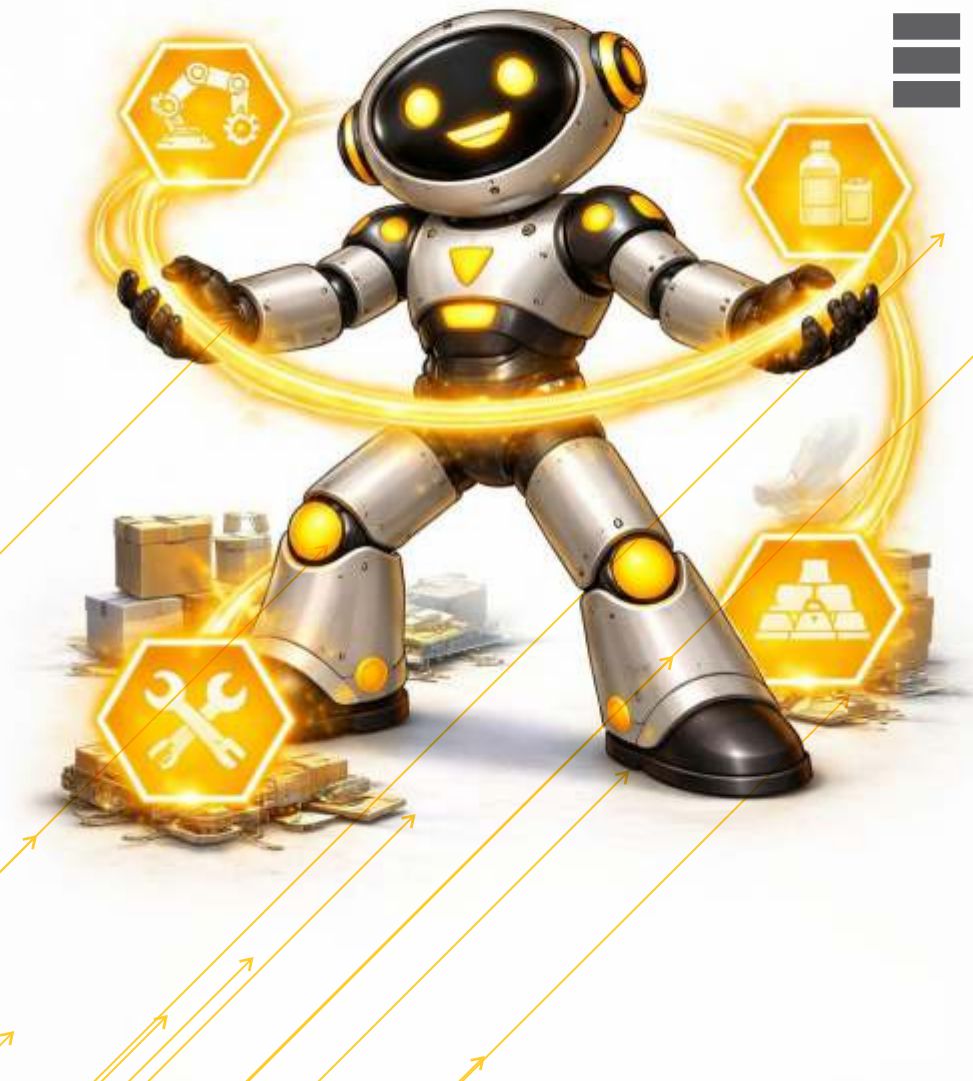

WHAT OPERATIONS NEED TODAY.

Industrial operations cannot depend on reactive purchasing. They need timely availability, fast response, and clear follow-through.

When indirect supply is fragmented or inconsistent, maintenance slows, urgent requests multiply, internal teams lose time, and operational friction increases.

Today's operations need a supply partner that can respond with speed, coordinate across categories, and support continuity without adding complexity.

THE COST OF MRO FAILURE

MRO failures are often silent at first, but they create real operational cost.

A delayed component, a missing consumable, or an unresolved urgent requirement can impact maintenance timing, purchasing efficiency, internal coordination, and production flow.

When operations depend on continuity, MRO performance becomes a critical part of operational protection.

INTEGRATED SOLUTIONS FOR INDUSTRIAL OPERATIONS

We deliver an integrated MRO solution designed to support operations with stronger coverage, better coordination, and more strategic service.

Our offering includes:

- Industrial Tools
- Safety Equipment And Ppe
- Spare Parts And Components
- Electrical Supplies
- Lubricants, Oils, And Chemicals
- Fasteners And Consumables
- Industrial Cleaning Supplies
- Engineered Materials And Specialty Resins For Specific Applications

We do more than supply products.

We help our customers consolidate indirect purchasing, support recurring demand, secure critical items, and maintain operational continuity with greater consistency and confidence.

HOW WE SUPPORT THE OPERATION

We do more than deliver products.

We help customers manage indirect requirements with structure, responsiveness, and dependable follow-through.

Our service supports:

- Consolidation of indirect purchasing
- Management of recurring requirements
- Response to urgent and priority requests
- Sourcing of critical and hard-to-find items
- Coordination across categories and suppliers
- Ongoing support to help maintain operational continuity

Every requirement is handled with the objective of reducing friction, improving visibility, and helping the operation move with greater consistency.

A PREMIER SERVICE MODEL

We work with a simple but powerful logic:

UNDERSTAND THE NEED. RESPOND WITH PRECISION. FOLLOW THROUGH UNTIL IT IS RESOLVED.

Our service model is built on:

- clear communication
- timely response
- dependable follow-up
- professional service
- solution-oriented execution
- long-term customer focus

We are designed for operations that value service level as much as product availability.

VALUE THAT TRANSLATES INTO RESULTS.

We help our customers strengthen their operations through:

- better control over indirect purchasing
- improved follow-up on key requirements
- greater availability of essential supplies
- continuity across sensitive processes
- less operational friction
- more confidence in day-to-day supply

Every requirement handled correctly contributes to greater stability, smoother workflow, and stronger performance.

WHY CUSTOMERS CHOOSE US.

Customers choose RECOPSA because we combine sourcing flexibility with operational follow-through. We are built to respond quickly, adapt to urgent requirements, and support multiple indirect categories through one reliable point of contact.

What sets us apart:

- Direct and agile communication
- Fast response on urgent and specialized needs
- Flexible sourcing across categories
- Closer alignment with day-to-day operational priorities
- Dependable follow-up from request to resolution
- A service approach focused on continuity, not just transactions

We work as an extension of the operation, helping customers reduce friction and move with greater control.

OPERATIONAL VALUE IN PRACTICE

By improving response, follow-through, and availability across indirect categories, we help customers:

- Strengthen control over indirect purchasing
- Improve responsiveness on urgent requirements
- Secure recurring and critical supplies
- Reduce operational friction between teams
- Support continuity across maintenance and production activities
- Build a more reliable day-to-day supply structure

Our objective is simple: help operations run with greater consistency, coordination, and confidence.

SOLUTIONS FOR HIGH-DEMAND INDUSTRIES.

We support companies that require reliable, responsive, and well-managed MRO solutions, especially in:

- Manufacturing
- Automotive
- Plastics
- Metalworking
- Plant maintenance
- Production lines
- High-demand industrial operations

We integrate where operations need constant support and precise response.

STRATEGIC SUPPORT FOR OPERATIONAL CONTINUITY

When you work with RECOPSA, you work with a partner that understands how every requirement can impact uptime, productivity, maintenance, and daily performance.

We support operations through:

- Availability
- Responsiveness
- Sound judgment
- Dependable follow-through
- Clear communication
- Continuity-focused service

Our objective is to help customers operate with greater stability, less friction, and more confidence across day-to-day requirements.

LET'S EVALUATE YOUR MRO OPPORTUNITY

We are ready to review your current MRO structure and identify opportunities to improve responsiveness, consolidate purchasing, and strengthen operational continuity.

Possible next steps include:

- MRO spend review on-site operational evaluation
- Category opportunity assessment
- Pilot program for critical items
- Strategic sourcing review

Let's identify where RECOPSA can create immediate value.
