

Dear government and school officials,

After many months of health mandates being forced on our own children and our local community children, we need you to understand that we've had enough. It's time to return control back to local government, back to the local schools, and back to the local parents. As concerned parents, as concerned citizens, and as the people of Union County, in whom the power of our government resides, we need you to understand our stance as outlined below:

- We demand medical freedom for our children. We will not tolerate medical mandates any longer.
- We will not tolerate the forced masking of our children any longer. The highest level of medical evidence is meta-analysis of multiple randomized control trials. Without an exception all the studies done at this high-level show that masks show no statistical significance in preventing the spread of respiratory viruses. Are the studies that purport to support mask effectiveness done at the same high-level? Either way, we have conflicting data and proving effectiveness is not enough, we must prove safety, and no long-term safety studies have been done with children. We have grave concerns about the damage these masks are inflicting on our children's psychological and physiological health. Masks must be made optional. The decision to mask a child must be the parent's decision alone.  
You can learn more here:

and here: <https://www.canva.com/design/DAEf1a045m8/view>
- We do not consent to our children being part of the COVID "vaccine" trial. There is no long-term safety and efficacy data on these shots, but we do know about the short-term damage being done by them. There have been more adverse events reported for the COVID "vaccine" than all vaccines combined over the past 30 years. You can search VAERS directly here: <https://vaers.hhs.gov/>, or you can see a summary here: <https://www.vaxxtracker.com/VaxStatistics.aspx>
- We withdraw any, and all, assumed or implied consent for our children on vaccination days held at school or in any public setting.
- The authority over medical decisions for children belongs to the parent(s) and the parent(s) alone. The government has overstepped their authority in this matter. The school and school districts have overstepped their authority in this matter.
- We do not consent to anyone at school telling our children that these experimental injections are safe and effective. The conversations regarding medical decisions for children are private family concerns and have no place in the public setting, period.
- Coercing and/or manipulating anyone to taking an experimental injection is wrong, but it is particularly grotesque when children are involved.

We understand that government and school officials are saying that this is going to be just like every other vaccine requirement for school, and parents can opt their child out. Yet, we know this far from just-like any other vaccine, and everything that has happened in response to COVID is far from normal. The government and the school officials have lost our trust to do what's best for our children, and they have lost our trust to uphold the oaths they swore to uphold Constitution of the United States and the Constitution of Oregon. If you wish to regain this trust, we recommend making some corrections.

We will work very hard to protect our children and to put them in an environment that honors our stance on medical freedom as outlined in this letter. Our hope is that our local public schools can again be such an environment.

Sincerely,  
Concerned Parent and Concerned Citizens of Union County
