

BIPARTISAN INFRASTRUCTURE LAW INTERAGENCY WORKING GROUP EVENT

The Bipartisan Infrastructure Law

The historic Bipartisan Infrastructure Law (BIL) will rebuild crumbling roads and bridges, replace lead pipes, help provide high-speed Internet to every family in America, and produce concrete results that change people's lives for the better. By reaching all communities across the country – including rural communities and historically underserved populations – these investments will position the United States to win the 21st century.

Purpose

A whole of government approach that provides information, professional development, and technical assistance to further educate communities on the components of the legislation and how the implementation will impact their lives.

Audience

Open to HBCUs & all rural and historically underserved communities.
