Issue 1/3

The Astrologische Rundschau is published with a length of at least 16 pages and contains, in addition to contributions from all fields of astrological research, information on the activities of the Astrological Society at home and abroad, as well as the ephemeris of the current year. Ephemeris 11 of the current year.

The bezu11:sprels fiir the jabrr-n&' amounts to Mk.7,- Aus4nd Mk, 10,-, and 1st a ■ the
Tbeosophselle V,irlar;shaus Dr. H._Vollrath, Leipzig, Inselstraue 29 elrizusenden,

Reports, manuscripts, letters and review copies should be sent to the Schriitleiter in
Marienwerder; WestpreuBen. All requests must be accompanied by postage due.

. Sensitive points.

A. Witte/Hamburg.

After a year's arl:> it in astrology, one becomes in:imer- again

-In all charts, the aspects of the current planets have an effect on the radix positions, even if the person is over 60 years old.

In the course of 60 years the point of Aries will have gone uuegefah
around' 1 degrees rilckwarts, nevertheless the aspect with the Radixplanets
works almost on the arc minute. From this one makes the experience that it is
not the position of the planets, but the position of the planets. The position of
the planets, but the position in the magnetic fields, which are formed by the
position of the earth's axis in relation to the earth's orbit, is decisive.

. The axial plane of the Earth's magnet intersects the ecliptic/'the Earth's
orbit around the Sun at the Cancer and Capricorn points; the

The great circle of revolution of the earth intersects the ecliptic at the points of Libra and Aries. The North Pole of the earth is in June, the South Pole in December inclined to the sun; thence the signs Cancer and Aries get the same position in the ecliptic.

- 1; find Gemini more polar properties of the North Pole and the signs Capricorn and Schiltz more the polar properties of the Earth's South Pole.

If the Sun is rising from Capricorn to Cancer, the Earth's northern hemisphere receives the pressure of positive magnetism; if the Sun is descending from Cancer to Capricorn, the southern hemisphere receives the pressure of positive magnetism. Therefore, all the signs of the zodiac are to be valued magnetically differently; the zodiac is a circular line of the plane of the Sun through the magnet of the Earth.

Since the signs of the zodiac do not belong to the fixed starry heavens, but are only designations for the various types of the earth's magnetism we have 11° on the ecliptic with polar e.igenschaften the degrees of the zodiac signs.

...The oppositions are polarized, ebei falls the mirror points to the aquinoctial line Aries-Varius. Thus, for example, 11° Water is an antipole to 11° Lowe, to 190° Taurus and 19° Scorpio, -because both points have the same position in longitude to 00° Aries and 00° Libra.

The mirror plane in the magnetic zodiac is the Aquinoctial line between the Aries and Libra points.

The globe is further polarized <by the sun- through the positive current sent by the Sun <through the Earth, which' produces in the Earth a magnetic field whose lines of force are concentric circles and whose planes are perpendicular to the conductor of current (according to the theorem of Biot and Savart). The conductor of current in this case is **the** gravitational line earth-sun.

These concentric circles intersect the ecliptic at equal distances from the sun. A polarization <by light> can be observed very easily with a round opal; the side of the opal facing away from the light always shows the complementary color of the stone.

¶, If the sun is in 0° degree Capricorn, the polarization by the sun coincides with the polarization of the magnet earth.

As the sun passes through the signs of the zodiac the various signs a mixture of the polariflit per earth as well as the polatisaHon caused by the sun -- .y_ird.

i - The sun in progress can be related to 0° Capricorn by the coincidence of the two polarities, only now the distance of $1-30$ degrees from the sun must be taken into account, going with the 'animal' signs. Thus up to 30° is Capricorn magnetism and from $50-60^\circ$ Aquarius magnetism and so on. If the Sun is in $23^\circ 42'$ Taurus, so is_t to $23^\circ 42'$. Gemini there is Capricorn magnetism, and there is a mixture of the polarities of Gemini and Capricorn.

t "- The mirror plane, clie balancing positive and negative Magnetism, lies in the Quradrature of the sun, in this case $23^\circ 42'$. Lowe and $23^\circ 42'$ Aquarius on the ecliptic line.-

i - - The position of the earth's axis in relation to the earth's orbit causes the different polarities of the signs of the zodiac; at a birth the axis of the horoscope is the line which passes from the place of birth through the middle point of the earth.

goes_ This meridian plane - intersects the aquator - in the upper, en and
of the lower culmination; the zenith or midthimrnel stands to the greatest
Umdr . - J -reis, which also intersects the aquator at two points, i-echtww'.

...
" i :aligns with the earth in geo_graphical latitude
a day> '{tteioem circuit parallel ..to the aquator about the earth's axis; thus - is--..
the. The orbit of the place is to be equated with the aquator and the
The lines of intersection of the fields lie at a distance of 30 deg. These
fields are equally polarized on the line of the aquator; only the midheaven or
the place of birth on the earth shows the polarity of the geographical latitude,
because the earth is a magnet, - and the position of the meridian in relation to
the sun in r ctascension indicates the degree of polarization; If the
meridian is less th a n 180° distant, the polarization is to be found in the signs
Capricorn to Gemini; if it is more than 180° distant, the polarization is to be
sought in the signs Cancer to Sagittarius. The place Harn burg -
53° 33' north latitude - is now on the ecliptic in the same degree from the
.cjJi<lder- or balance point at on the north'f semicircle to cancer
%Z'ri, therefore the polarity of this place is either 23° 33' Taurus f ocier 6° 27'
Lowe. The opposite pole is found 23° 33:- Scorpio and 6° 27' Wa.ssermagn.

The places on the northern hemisphere of the earth are on the arc Aries
over Cancer to Libra; -the places_ on the southern hemisphere of the earth are to
be found from Libra over Capricorn to Aries.

The more northerly in latitude a man is born... The more northward in
latitude a man is born, the greater are the polar opposites which connect him
with **the** earth. The similarity in polarity between the signs of the zodiac is
found in the division of the first vertical, the circle, which connects the zenith
with the intersection of the aquator.
From the nadir to the western aquator, the signs Capricorn to Pisces are to be
found.

. The point of birth on the ecliptic in the geocentric system lies in the
lowering of the gravitational line sun-earth and leads with the earth in the
days after birth an eastward movement around the sun, - an analogy to the
place of birth around the earth axis. At the moment of birth the body takes
up the same irradiation of the earth in the course around the sun as a
fixed crystallization in sicq, and
is 9th geocentric stan.d. of the heavenly bodies to the sun and. in, the elec-
tric fields of the earth !l)a8giving-.

The continuous earth--in days after birth--takes this position of the sun with
it and thereby creates a difference of arc with the first crystallization. -The
difference in length is called the solar arc, and these new positions of the planets
are regarded as having been created by the sun in the days after the day of birth.
pushed. These advanced planets retain these latitudes in relation to the ecliptic
as at birth and form new declinations in relation to the radix planets, which are
extremely important for the prognosis.

are.
Now bnnman from the gravitational line earth-sun_ and from the
The electric fields, starting from the motion, are - similar to the Meri_

dian horoscope.- denote with the numbers X to IX. and these fields are to be evaluated similarly as the houses of the meridian. The houses I to VII face the Sun and cover the apex of the meridian.

IV. House with the position of the radix Sun. The difference of the Häuser in Länge is 30. arc degrees each.

The Earth's axis has an only slightly different inclination to the Earth's orbit around the Sun. If one considers the North Pole as the midheaven of the body Earth and the axis North Pole, South Pole as the gravitational line of the Earth's horoscope, then in the orbit around the center of the Sun are the

magnetic fields of the earth horoscope the zodiacal signs of the ecliptic and is f.i.r the northern hemisphere of the earth the Aries the VII house, the Capricorn the, IV, the Libra the I and the Cancer the X house. House of this horoscope.

For the hemisphere the signs of the zodiac are reversed and Virgo is I, Gemini is IV and Pisces is VII. IV., Pisces VII. and Sagittarius the.

X. House of the earth horoscope.

- These magnetic fields act on the body of the earth and thus also on the person born on this body; therefore the positions of the planets in this horoscope are similar to those in the horoscope of the Sun, which is in the fourth house, and to the horoscope of the person born, in which the first vertical is divided in t o 12 parts from the zenith and the aquator from the meridian.

These points of the various horoscopes - earth horoscope IV house Capricorn, solar horoscope VI house Sun in the **radix**, meridian horoscope.

X. House - place of birth, and the horoscope of the ascendant - have great importance

he calculation of sensitive points.

The point of Aries, the apex of the VII house of the earth's horoscope, is the zero point of the ecliptic, and from this all the positions of the planets are determined. If one wishes to bring all systems into the same form, one must either calculate from the gravitational line X :...IV, Earth, to the Sun, Cancer to Capricorn, and quadrature Ascendant to quadrature Descendant, or one must take the Earth horoscope from the Aries point, the horoscope of the Ascendant from the Descendant, and the meridian and solar horoscopes from the quadrature of the Sun and from the quadrature of the IVth house.

Better is -it already, it will- the first two of the IV. House and the last from the Descendant and Aries points, since the points of the last two are the quadrants.

The common point for **two** planets without regard to any gravitational lines is the half sum = the mirror junction, also called opposition. As an example, Mars and Saturn for May 14. 1879, 11 o'clock in the evening in Hamburg. X -- 9° 53'

Scorpio, A. = 1° 24' Capricorn, Sun = 230 42' Sti i, Moon = 14° 37'
Pisces, Mercury = 28°.03' Aries, Venus = 1° 01' Cancer, Mars = 1 1° 57'
Pisces, Jupiter = 9o 12' Pisces, Saturn = 11°31' Aries, Uranus. = 0°07'
Virgo, Neptune = 10° 07' Taurus, Ascending Moon Node = 28° 15'
Capricorn, Descending Moon Node = 28° 15' Cancer.

Mars 15 7' .Pisces 131' Aries $\overset{+}{\text{---}} \overset{353}{\text{---}} \overset{28}{\text{---}}$ = 176° 44' --

Mars/Saturn 26° 44' Virgo and a° <1/ 1j 26° 44' Pisces. The line between Mars and Saturn is considered the mirror plane.

If the earth chart is now taken and points are added to the Ascendant or Descendant, one has had the point for death either Saturn to Mars+ A., or Mars to Saturn+ A., or the opposition of these points when the Descendant is added.

Saturn: Mars+ Descendant in the earth chart is then 3300 26' + 360°. = 0° 26' }(; Mars: Saturn+ D. in the earth horoscope is 'then 29° 34' + 360°. = 29° 34' 'T' or Mars+ D. - Saturn = 00 26'. Pisces and Saturn + D. - Mars = 29° 34' 'T'.

So if we look at the crystallization of the latitudes of the radix chart with the meridian, the ascendant, the Aries and Capricorn points

- If we draw the degrees gem on a round disk, and have recorded the same crystallization on another sheet of paper, and now place each planet on the Aries point outside, we get two points for each arc of two planets. Now, after all the arcs have been drawn, let us place the sun of the inner disc on the Aries point, and all the points will relate to the position of the sun from the Aries point.

If an orad bow is taken for the inner disc. Oradbogen taken and the Sun's position is in Aries, the outer points indicate the positions in the ecliptic on the inner arc of the orad. Sun position = 23° 42' Taurus. We then have

Saturn: Mars + Sun = 24° 08' Aries. Mars:
Saturn+ Sun = 23° 16' Gemini.

The states of the arcs from Sun radix also give the relation with the radix Suns around the progressive Suns of other persons and are always drawn the found planets. The IV. House Radix was 90 53' Taurus, the Ascendant was 1° 24' Capricorn.

Saturn: Mars IV=10° 19' Aries,
Mars: Saturn- IV=9° 27' Gemini.
- Saturn: Mars A. = 1° 50' Schütze.
Mars: Saturn A. 0- 58' Aquarius;

The running planets on the day of death, August 3 - 1912, noon 1:15 min were: Neptune 24° 11' Cancer, Uranus 1° 06' Aquarius, Saturn 2° 27' Gemini, Jupiter 5° 33' Sciltz, Mars 10° 49' Youngfi:au, Venus 18° 39' Lowe, M.erkur 5° 32' Virgo, Moon 9° 37' Aries, Sun 100 46' Lowe, rising lunar node. 15° 42' Aries, X lfd. = Uranus r. = 00-01- Virgo, descending lunar node progressed = 06 06" Virgo. Ascendant lf. square Sun lf. 100 46' Scorpi9n, Uranus radix= 00 07' Virgo, UraJ;IUS progr. = 0° 47' Virgo, Mercury pr.= 23° 14' Gemini. cJ' lJ - 0 ::::,- 9° -6- Capricorn: - .

From the above compilations one can see - clearly that all points act from gen 4 gravity lines. ferner

s' et ewahr nt: current S a' turn/Uran Saturn+ Uranus = -10. 47-, Libra, noch us=

Saturn/Venus= 100.33- ®, Venus/Uranus= 9°-53' Scorpio d, X house radix, Mars r. = 14° 43' Lowe Oppos. t- IV= 22° 04' Gemini. Saturn r. +

advanced 130 22' Taurus quadrature t IV, t Sun v. = 01 37' Pisces Square Saturn; Mars + A. (d' + A. - lJ).

In addition, the annual horoscope of the Earth Sun 00 00' Capricorn, 1911., showing Mars conjunct Sun radix and other points, such as: Sun-

1m^{ts}. msse, M ondf " mst er ed_{eck} ungend u^{rch} M_{ond} etc. Man
msse, B. **+ Saturn**²

:= 19° 14' Taurus, Sun r. + Sun progr. = 19° 14; Lowe, Sun r./Sun

p. = 9° 37' 2 w-lll-mge. **X_{r.} + X** pr. = 21° 37' _{te_vr}, Mars lfct. + saturn lfd. =
2i0 38' ©. And- the solar horoscope Sun = 23° 42' Taurus. in the year. 1912
shows Venus conjunction. IV r., Saturn conjunction. Sun r., Jupiter
conjunction. X v., 0 conj. A. v. etc.

Now back to the mathematical determination of the points.

Always 2 planetary positions are added (the Aries point, the **X**.
house and the ascendant are to be treated as
gfeichwertig). House and the Ascendant are- gfeichwertig to be
treated) are added and 'a third stand. subtracted from the sum. Therefore
one can put:

Mars + Saturn - Aries = Saturn + Mars :- 23° 28' Pisces, Mars +
Saturn :- Sun = 29° 46' Steitibock, i.e. Sun: Mars+ Saturn and Sun:
Saturn+ Mars. It is then the arc from the So fl'e to the halite of the
SulTlme_ of Mars and Saturn equal to the arc from half the sum of Mars
and Saturn to the point found, soa8 the point 290 46' Capricorn the mirror
point - of the Sun radix- to the. Mirror plane Mars/Saturn. So if you
want to find the mirror point of any planet from this mirror conjunction,
add the two planets and subtract the third

This Mars + Saturn - Sun lfd. = 12° 42' nt, Quadrature t
- IV r. Mars lfd. **+ Saturn** lfd. :_ Sun radix = 13° 16' Scorpio, Quadra-
tur t IV r.

The annual horoscope .of December 22, 1911, shows thei Saturn=
1.30 50' Bull.

Mars+ Saturn - Sonqe r. = 14° 45' Taurus, Mars+ Saturn_ Sun
v. = 12° 54' Aries Conj. Saturn r. Lunar eclipse_ = 11 23' Aries Conj. Saturn r.
11 31' Aries.

- Very easily lassed all existing-- points all eiu stück
The first step is to draw a circle on the paper by placing an arc of degrees on
the paper, drawing the radix stars and then, after removing the arc of degrees,
placing a round disc with the radix stars, the I, X or IV house and 1 Aries
point on the arc in such a way that the centre is at the centre of the circle.
house and 1 Aries point is placed on the arc in such a way that the centre is
_ can rotate around a tack. If now the Aries point of the nner round disk is placed
on each. If now the Aries point of the inner round disc is placed on each star, and
the points on the inner disc are at. if the papiet is furthergefi.ihrt, then one of these
points is the sum of the planets of the inner disc and the
planets of the outer paper, on which the Aries point of the inner
disk points outward

If one puts the degree arc on the paper after finishing all the sums,
the ram point of the degree arc shows the planet which is subtracted from
the sum of two planets each time

For example. Sonne + Mars outside, Aries point inside on
Saturn outside, then Sun **+ Mars** at 24o 08' Aries, Saturn +

- Mars- Saturn = 1 IO57' Pisces = Mars rad. etc.

About the point A+ D- Satutn went- on the day of death of
lauJeude

Jupiter.

In quadrature to the cusp of A+ 0 - Sun, Neptune - lfd. The most important thing is which planets to add and which to subtract.

In the present. Horoscope Sun $53^{\circ} 42'$ Taurus with Neptim .

- $10^{\circ}-01'$ Taurus in conjunct in the death house Taurus of the Earth. The planet Mars is the complementary planet of Neptune, therefore this is subtracted to exclude dfo Sun. Sun+ Neptune-Mars= $21^{\circ}46'$ ©, conj. Neptune lfd. $24^{\circ} 11'$ ©. Conj. Mars lfd. **+S:turn** lfd: $21^{\circ} 38'$ ©. X before

shifted square Jupiter r. Quadrature Mars r., behind it also Sun + Neptune - Jupiter= $24^{\circ} 31'$ ©.

I would like to make a special reference to the half sums of the planets, to the mirror conjunctions, mainly to the passage of the progressive Sun (the Sun in days after birth) through these points, since these planets then always indicate the event.

In the horoscope -Kaiser Wilhelm's Sun pr. passed through Sun/Uranus in 1914 and Sun Ud. opposition Uranus lfd. gave the day of declaration of war August 1, 1914. Mood: Uranus+ Sun, Sun: Saturn+ Sun also gave the day.

The running sun takes with it di radix crystallization, soda.6 the solar arc .. of two planets added to the sun radix, indicates the day of the event.

The system of the individual solar horoscopes interconnected, resembles the plant sundew, drosera rotundifolia, where **the** batter with the gripping arms resembles the earth with the planetary stands and the stem of the leaves of the gravitational line earth-sun.

- - Now, since all men are born on different days and But if all are on the planet Earth, then those who actually come into contact with each other must also be brought into contact with each other, and this is done in the Earth horoscope by adding the radix suns of two persons and using them as a point - The height of the sum indicates the point which brought about the connection. The day of separation is determined by the sum of the suns minus the position of the current sun.

With stronger. Connections, the tips of the X Hauser. is added and you get the relevant point

In a person, the point is found when the radix Sun and the progressive Sun are added together; also when IV r. and IV p. are added together. -

In the present case() $90^{\circ} 53'$ Taurus+ $110^{\circ} 44'$ Gemini, $-21^{\circ} 37'$ ©, Conj. Mars/Saturn ongoing un 0° ; $90^{\circ} 53'$ Taurus+ $11^{\circ} 44'$ Gemini minus Sun.- lfd. $10^{\circ} 46'$ Lowe = I OÖil; Fische, oppos. Mars lfd. , conj. Jupiter, Marn.

Ascendant r. + Ascendant v. minus Sun running = $271^{\circ}24' + 303^{\circ} 15'$ - $130^{\circ} 46' = 23^{\circ} 53'$ Gemini, square Mars+ Saturn r. = $23^{\circ} 28'$ }(.)

Since the X. Since the X house is more than 180° from the Sun, the mirror point of $23^{\circ} 42'$ Taurus= $6^{\circ} 18'$ Lowe and also the point for Hamburg $6^{\circ} 27'$ Lowe.

The disease lasts 4 days from sun running $6^{\circ} 20'$ I:owe to $10^{\circ} 46'$ Lowe. Black water fever, after a voyage from Lokaja (Togo, decHnation. of Mercury) died in Hamburg, Mercury and lunar node 'radix stood in □ to each other. ,

'17 - Leichie calculation

of the declinations of advanced planets with the help of tables.

A. Witte, Hamburg.

At the moment of birth the planets form a solid crystallization with the position of the Sun, which remains the same throughout life. This includes the X house, the Ascendant and the Aries point. **This** crystallization is governed by the by the progressive Sun, that is, by the Sun in the days after birth, thus forming the

e planetary stlinde **in the** same preile as in the radix with the **radix** planets new states, which are called advanced.

They also **form** new declinations and horizontal parallels with the radix planets, which are of great importance.

The following is an easy way of calculating these levels.

The direction lies on the ecliptic and is compared with the solar arc. made.

Example: Planetary position on 14 May 1879, evening 11 o'clock, Hamburg.

Decl. $\theta = +18^{\circ}42'5''$, $\text{fr} = +13^{\circ}12'$, $Q = 20^{\circ}31'$,
 Latitude $\theta = 0^{\circ}00'$, $\theta = 01^{\circ}43'$, $\theta = 0^{\circ}46'$,

The progressive sun was fir August 3, 1912 = $25^{\circ}13'$); the advanced $\theta = 11^{\circ}52'$ (. $\theta v = 00.06'$ llp. For the advanced 11' soil the declination can be determined.

In the table for right ascensions and declinations of 1-90° at the longitude of $71^{\circ}52'$ one finds the declination $+22^{\circ}13'$ in Table 2 at 72° Long 2.

These are subtracted from the latitude = $01^{\circ}43'$.

$$\begin{aligned} & -0^{\circ}02' = -1^{\circ}41' \\ \text{new declensions} & \dots = +20^{\circ}32' \\ & \text{ll61r} = 20^{\circ}31' \end{aligned}$$

The advanced θ was $00^{\circ}06'$. rrp $\theta_{\text{Gri}} = 0^{\circ}07'$ trp, 0 running dec. - $20^{\circ}31'$. The $\theta_{\text{r}} \text{ decl.} = +18^{\circ}42'$, lfd. = $+18^{\circ}42'$.

Determination of the θ arc when one planet **for-**, is pushed: The formula is:

$$\text{sm. } L'' \text{ angle} = \frac{\sin. J + \sin. l3 \cos. E}{\cos. p \sin. E}$$

if both signs of θ and fl are the same, subtract,

if both signs of θ and fl are unequal, they are added.

With the help of the tables θ is directed to $\theta_{\text{r}} = +20^{\circ}31'$
 $\theta_{\text{r}} = 10^{\circ}011' dp = 1^{\circ}42'$.

For the declination $+20^{\circ}31'$ the approximate ecliptic point is searched in table 1 = $1^{\circ}45'$ (. Now θ is treated as declination and at approx. 62° in table the difference searched = $-3'$ is subtracted from θ , gives $1040-$; these are diered to $20^{\circ}31'$ a'l, because $p = 22^{\circ}11'$, and from this declination the long is sought with tab e 1 = $11^{\circ}38'$) ($\theta_{\text{r}} = 10^{\circ}011'$)

The diff. is the θ arc = $31^{\circ}37'$.

Added to the θ radix gives the progressive sun position = $25^{\circ}19'$).

If the θ arcs of the progressive θ are so plotted on squared paper as to show $\frac{1}{4}$ years in abscissae*), and the declinations advanced to them as ordinates,*) the declinations of the

*) i.e. in equal intervals from left to right.

**) i.e. from a waggerrecht line the northern and sfidlichen declinations with a Ma6stab upward are plotted, the -Declination with....., the +declension with $+$ denotes.

adix planets as well, one has a surprising overview of most of the main events.

Since onlyr the same latitude to the ecliptic is a parallel to *the* ecliptic, one only needs to calculate the new declination from IO to IO years and add the differences of the declinations of the same longitude to the first found declination and following ones.

I.

Table of the ectascension and declension.

The Astrologische Rundschau is published monthly with at least 16 pages **and** contains, apart from contributions from all fields of astrological research, also information about the activities of the Astrologische Gesellschaft in Germany and abroad, as well as the ephemeris of the current year.

The reference price for the whole year is Mk, 7,- abroad Mk. 10.- uao1 1st a ■ -U
Tbeoapblselle Verlahaus Dr. H. Vollrath, Leipzig, InselatrasH 29 elnzuseaden,

Reports, manuscripts, letters and review copies should be sent to the editor in
Marienwerder, Westpreutlen. All copies must be accompanied by postage.

The magnetic colors of the signs of the zodiac.

, /fruJ- J-'/t,;/?r ... 'i,NlJtVpn A. Witte, Hamburg.

The intersection of the earth's greatest circle of revolution about its axis with the earth's circle of revolution about the sun form two starting points of the magnetic fields. The magnet Earth has negative magnetism in the northern hemisphere and positive magnetism in the southern hemisphere, if we assume the mathematical formulation of Coulomb's law that an attractive force acts negatively and a repulsive force positively.

According to the statement of J-Ischenden, the blue needle of a boussole, which is directed to the north, shines blueish in a dark space; therefore the opposite magnetism must be red in the northern hemisphere, since only unlike poles attract one another. The color u then belongs to the south pole of the earth.

The sun is to be regarded as the greatest magnet of our solar system. The great circle of revolution of the sun intersects the ecliptic at about 15° Gemini and H,° slits, so that in the days from June 5 to December 6 the earth is above, in the days before and after, and in the days before and after.

The course of the planets around the sun shows that an electric current passes through the sun to the north pole of the ecliptic and that the earth's orbit is one of the many lines of force surrounding the sun. The lunar orbit shows the same for planet Earth. The current goes from the north pole of the ecliptic of the ecliptic through the Earth to the North Pole of the Ek!ptik.

Thus the Sun and the Earth have the same magnetic radiation in their northern and southern hemispheres; at 15° Virgo on September 5 lies the high point of the northern radiation of the Sun magnet, at 15° Pisces the high point of the southern radiation on March 5. The ascent of the Earth in d n radiations of the Sun proceeds from the Blue through white to red, the descent of the earth from red through yellow to blue. If the colors of the magnet sun are distributed equally over the signs of the animal circles, then

golden yellow	15° dare	indigo	15° Aries
g e l b	„ Scorpio	Ultramarine	„ Taurus
yellowgrin	„ Schiitze	purple	„ twins
g r i n	„ Capricorn	Purour	„ Cancer
blaugrlin	„ Aquarius	r of	„ Lowe
b l a u	„ Fish	orange-red	„ virgin.

Now, however, the magnet earth again influences its fields according to its magnetism with the colors, if 0° Capricorn blue and OO crab are orange-red. So there is still a mixture of magnetic colors take place.

There are the colors from 0° to 00 of each sign firr the magnet earth, as follows:

yellowgrtin	00	Aries	violet	00	dare
g r i i n	"	Pisces	purple red	„	Virgo
grtin blue	„	water mcl:lil	orange	„	Lowe
bl au	„	Capricorn	red	„	Cancer
Indigo	„	slots	golden	„	twins
ultramarine	„	scorpion	yellow g	„	bull.
			e I b		

The colours of the Sun's magnet can have little effect on the colours of the Earth, since the declination of the Sun's equator is only about 6°, so that the main weight falls on the declination of the ecliptic of i3°27', and the colours are shifted only a little towards the R, towards Virgo, so that the colours could almost remain the same if there were not a small inconsistency in the position of yellow in Taurus.

According to the law of oscillation numbers mi.iBte g lb on the Aries points liegerf, since in the yellow the color blue and red trim, thus apparently indicating the boundary of positive and negative magnetism.

If the mixing ratios are equally distributed 1, 2, 3, 4, 3, 2, 1 among the signs, then Lowe - red, Protect - blue, Aries - yellow. red, Sagittarius - blue, Aries goat-yellow, Virgo - purple, Capricorn - blaugriin, Taurus - orange, Daring - violet, Aquarius - gri.in, Gemini. orange-red, Scorpio - indigo, Pisces - yellowgriin, Cancer - vermilion.

According to Biot-Savart's law, spheres of force are arranged around the sun when <l> an electric current passes through it at right angles to the ecliptic. The lines of force emanating radially from the sun are positive, the opposite negative ones arrange themselves con centrically around the sun.

If we assume that the sun is always emanating, i.e. that it emits no particles, then these will be arranged in the concentric forces according to their type of vibration. The coarse particles will remain nearer the sun, while the fine particles will migrate further away.

A test may be made with lighted blotting-paper, by dabbing on it a drop of light black paint, containing all the colours. After the paper has dried, it will be found that the material particles are near the drop, and the ethereal ones have moved farther from the centre: around the drop, according to the capillarity of the paper, rings of colour have formed at harmonious intervals, and the reddish-brown ones lie close to the centre; then follow in spectral order all the colours up to lavender.

In the same arrangement I imagine the planetary system. Will <lanach the planets with the colors designated, so had:

Mercury red, Venus vermilion, Earth orange-red, Mars orange, the planetoids in their entirety yellow, Jupiter yellowgriin, Saturn grlin, **Uranus** blaugriin and Neptune blue, the planets not yet discovered, such as Pluto-, calculated by Levevriar;J'indigo blue; then follow a violet and *fJ* lavender.

Whether the ultra Neptunian planets can be discovered at all with the Gaussian lenses according to this color chart is doubtful, probably one will need quartz lenses which still let through indigo and violet rays. According to the following table of mixed colours for spectral colours by Helmholtz:

	purple	indigo	cyan-blue	blaugriin	y "rfin	gryffy	yellow,	oran'le	red
red	purple	dusky pink	wB. pink	white	weiBielb	golden yellow	orange	vermilion	red
orange	dusky pink	wl.pink	wei6	wei6yellow	w	yellow	yellow		
yellow	wl.pink	white	wit griin	wll.i.;riin	griingeib				
grylline	because griin	lwB.	wB. griin	wB. griin					
yellow	wit blue	wit blue	blaugriin	grt'in					
blaugriin	rosy blue	robin's blue							
cyan-blue	indigo								

when the colors are now associated with the planets:

Neptune and Mars white,	Mercury and Jupiter golden,
Jupiter and Mars white,	Mars and Jupiter yellow, Saturn
and Mercury white yellow,	Mars and Uranus yellow,
Jupiter and Neptune white,	Jupiter and Uranus white-grin,
Saturn and Neptune blue-grin,	Saturn and Uranus griin.

The colors for Venus and Earth would have to be interposed, then Earth and Uranus would be Neptune, and Venus and Uranus Saturn complementary, which would fit very well with the influences of Neptune, Uranus and Saturn on Venus and Sun as opposition of Earth. Venus with Jupiter - brand yellow would also fit very well.

However, for the interpretation of colors it is necessary to refer to the table published by Leadbeater and A. Besant in "Man and his Body" for the psychological effects of colors.

The planets Mercury, Venus, Earth, Mars will then come to stand in the signs from Aries to Virgo, the planets Jupiter, Saturn, Uranus and Neptune in the signs Pisces is Libra.

The Sun and moon act on the earth and give it their aura or magnetic irradiation.

The Sun acts in each degree of a sign in such a way that it mixes the polarity of Capricorn with the polarity of these degrees from the degree where it stands to the same degree of the next sign. By as many degrees as the Sun departs from: 0° Capricorn.

"ill

The polarities of the individual degrees of the signs of the zodiac are intermixed by the same number of degrees. The same applies to the distance of the apex of the IV. House from the Sun.

The Mond, as a reflector of the sun's rays, had the opposite polarity of the sun and its rays behave to those of the sun in that the waxing light emits reddish rays, the waxing moon yellowish and the waning moon bluish.

If one wants to determine this influence according to the position of the moon to the sun, the planets Mercury to Mars will act in increasing position, the planets Jupiter to Neptune in decreasing position, depending on the distance in degrees from the sun.

According to magnetism, the southern hemisphere belongs to the sun, the northern hemisphere to the moon.

Once again a or the horoscope of the

Exk!l,jsers.

J. , , 1) M.f. - // 'fy',,-1/?t>r''' - By A. Witte, Hamburg: 1/cryr

When some astrology lovers met in Hamburg in 1911 in order not to forget the knowledge they had just learned, they also had to have a practice horoscope.

It was decided to take the Emperor's horoscope. Through mediation we procured the minute of birth from the emperor's cabinet.

After written communication, it was given to us as 11h 05m in the morning. After making the correction, however, it turned out that the time of birth was 10h 07m in the morning.

Whether there was a clerical error here, for the difference is exactly one hour, or whether the minute of the emperor's birth could not have been accurately determined, remains questionable.

By assumption of previous birth-time of 10h 07m in the morning results but the picture is quite different from the assumption of the time of birth or the announcement of the birth nm 3h 30m in the afternoon.

The planetary positions and house tops by unequal manner for 10h 07m forenoon of 27 January 1859 at Berlin, 52h 30' north latitude are as follows:

()		:3'	-l	i	11l	^b

In the death traps and assassinations, t./<r, occurs every time. tr, however, stands in cP of the head of VIII. House radix.

. The above constellations should suffice to show the value or unvalue of the X. House and the Ascendant.

I would like to point out the earth horoscope, how the constellations to the earth meridian - - ;?, also have an effect on man, - mainly in connection with other persons and in horoscopes of rulers with other nations.

The Plana has from the the O Bg. 13° 13', the Q from the X r the Bg. 13° 13', thus acted and Q between the 13 and 14, the 2.j. pr. to r from 18° 00' to 18° 19'0 Bg.; the \$ acted in:; . 29° 41' pr. together with the f6 r 29° 17' and the Q.- pr. 30° 50 at the death of the father 29° 42'.

The J) with the bg. 35° 38' falls into the year 1894, the O with the bg. 37° 00' falls into the year 1896. The n. with 39° 03' was effective at the death of Bismarck. The

bg. 54° 22 from the T point and then prog. n, 5° 38' /, from the -point, i.e. also 54° 22 O Bg. coincides with the daughter's reading 64° 23'. The O r 53° 02 indicates the son-in-law; since the conjugal constellations J) and O in this horoscope are conjunct n, and iiJ, the ti, which as the current planet 7° 19 in r? O r fulfils the condition, is still missing for the draw. =

The r at 59° 84' plays in 1919 as the planet of the people's ruhr, J) r if \$ r, lf DJ) and \$ r; the prog. \$ at 50° 43 and the f;6 r 60° 43' will again . make itself felt in 1920. The prog.

n with 57° 30' worked in the year 1917, in the declinations also as before pushed to the". Q r.

The death of the mother and the assassinations are under the 'V.. '2l- r 11° , U)(to 'V.. 2l- p ¹³¹¹²¹).

First assassination O lfd. + 2j. lid. = go 24 /, cP n, r, 2l- lfd. 15° 4! I.

Second assassination O lfd. + 2j. lfd. = 13° 52 I cf <? r, D 't' r, '2l- Hd. 8° 37 .

Death of mother O lf- '2t = lf 28° (17) IV , 2.y. ltd. 4° 13 'Z.

2J. ahead + 20° 46' // **A** ahead + 20° 37' and A vorg. = 2° 17' (rfd "In,.; J) current cf **Ar**.

Also the advanced planets work not only in aspects with the radix planets, but also in connection with the earth meridian.

It was on Aug. 1, 1914, the *vbrg.* 0 2° 44 'T', so it had the distance in Lange of 2° 44' from the 'T' point, the *cJ'* r has the distance of 3° 20', which was reached by the progr. 0 in 1915. If the 'T'-point of **O** and **Q** is nested, then on earth war break out.

The defeat of Germany or the end of the war is indicated by the 0 7° 00' 'T' at the same distance as 't' r 7° 03' from the 'T' point. The drawing of the latter constellation took place by 't' running cf 0 rad. 6° 58' =. Berlin and Potsdam lies in a mean 52° 27' north latitude, the advanced *cJ'* in 1914 was 22° 26' 'tJ. Paris lies 48° 50' north latitude, the advanced 't' of the Emperor in 1914 was 18° 43' Petersburg lies north 59° 46', 'i' r of the Emperor stands 29° 34' 't5 and \$ pr. **OO** 24:0.;, mean 59° 59', 0 progr. of the Tsar *cf* r of the Tsar. The 2j. advanced had a distance of 52° 33' from the .i:k point. Compare also the parallels of 21- and *d''* in 1914. London northl. 51 31'. Tokyo nordl. 35° 39', li. r 50° 47', **Dn**, progr. 5° 36' *i*, 0 progr. England is 29° 21' © = 60° 39' from :!:-point, progr. Germany 60° 24' from 'T' Item. Thus the war between England and Germany is shown on. Draw **Q** lfd. cf lfd. *cJ'* r England 5° 34 *bl*, *cf* **n**, progr. Deutsch land *cf* vorg. Germany 24° 26' 't5 in 1916 and *rf* 'J) rad. of the Kaiser u.s.f.

O b e r t h e P a r a 1 1 e l s .

The advanced planets in the same latitude of the radix horoscope can form parallels to the radix declinations as well as to each other. In 1871 (war with France) the X. House was advanced parallel \$ vorg. In 1888 (death of the father), the *preg.* parallel X. House radix. Between 1887 and 1890, 0 v and li. v // were r:f v, -. lf v and 't1 v // the Ascendant radix. The running 't must therefore, since the Ascendant is the separating point of the horoscope, because in □ **to** the zenith, with the parallel + 18° 43' **worked** out for a separation.

have. It formed parallel aspects with the X. House *preg.* - 18° 33', the **O** r - 18° 33' and the **n**, r + 18° 46' parallel aspects. Further, still at the death of the father **n**, lfd + 19° 48' // r, 0 lfd + 23° 21' // was X. House r. o' progr. + 7° 11' **II** 'r **VII** Ar+ 7° 36', \$ ago + 23° 20' // **O** lfd, 2j. v + 22° 30' // r // lfd.

22° 36'. All conditions are fulfilled by the constellations at the death of the Fathera. \$ v // 0 as death planet in **£** to the VIII. House r clearly shows its correct position in the horoscope, also the outcome of the war suggests a bad position of \$, because \$ is always the spiritual originator of wars; compare, on the other hand, the position of r 28° 37' and \$ progr. 1 33' of England, which by this position dominates the earth and ruches it with war. Should the King of England live to see the year 1927, things will look rattly with this kingdom in 1926 and 1927, for J) r stands here also in D \$ r and p, which points to popular uprisings and the lfd. \$

stands in 1926 □ r and in 1927 □ it pr. and cf :Jr, further.

If the \$ reaches the passage through the equator in this year, which indicates transformations on earth, then the \$ lfd *d* '21- lfd, in the radix '21- *cf*\$ and the '21- also passes through the equator.

At the death of the emperor's mother *cl* was prog. + 10° 52' *II* 66 r '21- pr. +22°06'11 r, n, progr. +19°55'11 \$r, \$v22°44'11 *I/Xr*, *r:J'vll v*.

The attacks were determined by 0 v -4° 02' *II* 't' r and n, r + 3° 55' *II* 't' r, because *r:J'* and 'l' are in XII. House r.

In 1913 Av *II* r, 1915 v *II* ar, the mean points to 1914 and gives the division of the horoscope holder, on the Meridian, from

to many persons, confirms <lurchUd 20° 10'@ D Ar.

By the way on the upper meridian the predilection for travelling is quite clear and in the IX. house IaBt on religioes Gefühl conclude,

but which is mocked by 'j' *cl* from the XII by spiteful people. '2\ r stands

L:-,0r and *n.r, in 1914 was '2\vc?0r and *dn,r*, there was thus a strong connection of '21-, 0 and n., '21- ago. *II d''* v 1914 to '21- v /I 'l' v 1917 gave the 0 and the n, victory über the enemies 't' *d'* in the XIIth house. House. *r:J'* is, however, the master of the I. House, it must therefore be the combination of '21- and *d'* will bring about victories for Germany, and the combination of '21- and 't' will be to the advantage of the enemy.

'21- lfd *d* 'l' r brought the declaration of war Italia in May 1915, 'l' lfd o '21- vorg. and '21- lfd the defeat of Germany.

n, v,0vstands *II d'* r in 1Q16 and *r:J'* vorg. stands in // 0 r, TL r in 1918, *d'* r stands in *cf* 't' r; now as soon as the lfd 't' reaches the TL r. the chain *d'',l'1,* 'l' is closed, the lfd 't' stands at the n, r until June 1920. The advanced X. House shows a parallel at the end of 1914 with 66 v.

'6 r is in D tr, however, so that this already indicates an unfortunate war and a danger for the horoscope holder. In 1920, as shown above, 66 and t is fallig.

0 v, n, v. *II''* prog. - 3° 00' and 'r' r 3° 55', 0 prog. from 7° 34' 'T' to 9° 53' 'T' show with the lfd. 't' *cf* n. r and the '21- lfd. in May 1920, from \$ lfd *cf* n, lfd confirms the separation from the family.

In July, n, lido X will be present, t lfd *II* 66 r, n, lfd *II* 66 r u9d *d'* lid just in case *II*. r. *d''* v *II*\$ v Hi.Bt infer an act of violence by the enemy people, since *d'', 'l'* stands in XII and \$ r *cf* JI r *cf* VIII r.

The horoscopic system of the planet Earth.

The year... and the earth horoscope.

From *A. Witte*.

The earth is illuminated in the course around the sun by the planets which belong to our solar system. The angles are measured geocentrically, i.e. the earth is the centre of the set of angles.

The Sun receives heliocentrically the rays of Suns belonging to the Sun's system, so we can speak of the influence of fixed stars on the **Earth** only when they are in conjunction or in strong aspects with the Sun. A certain number of fixed stars will now be brothers of our Sun, and will thus act upon it in the same way as the minor planets act on the earth. In the total radiation of the Sun, therefore, we get to taste the influences of the secondary Suns, and the respective irradiation of the Sun is thereby shared with the Earth, since it influences the development of the planets as well as of mankind on Earth as a whole. The fates of the people are therefore connected with the heliocentric irradiation of the sun, and the appearance of the various ages, such as the Stone Age, the Bronze Age, the time of the iron industry, and now that of electricity, will also be based on it.

For the orbit of the Earth around the Sun, the Sun is the centre of attraction or gravity. The Earth-Sun line is the gravitational line, which should actually be the zero line for the geocentric system, because with this line the rays of the planets form the main angles and the geocentric angles of two planets belong only to the second group.

Therefore, the distances from the Sun in arc on the ecliptic are the primary angles, and the angles of the planets to each other are the secondary angles.

The greatest circle of revolution of the earth, the aquator, which is formed by the rotation of the body of the earth, intersects the course of the earth at two points, the point of Aries and the point of balance. The mean of these two points, which stands at right angles as a circular line to the equator and the ecliptic, is the meridian plane in which the earth's axis lies.

The axis connects the two points of rest of the rotation with each other. The point of intersection of the meridian plane nearest the North Pole is the Cancer point or the apex of the Xth house of the earth's horoscope. The point of intersection closest to the slidish resting point, the Stid Pole, is the Capricorn point or the 'cusp of the IVth house. The two poles of the earth's magnet send out magnetic currents on all sides, those flowing from the north pole across the equator to the south pole are of a reddish colour, those flowing from the south pole to the north pole are of a bluish colour, since the so-called blue needle of a compass pointing to the north pole is supposed to have a blueish radiation, as is claimed by sensitive people, and only opposite poles attract each other.

These magnetic currents can be easily detected in the horoscopes of human beings and they move from the Cancer point to both sides of the ecliptic towards the Capricorn point and vice versa.

from the Capricorn point on both sides to the Cancer point; this gives rise to two diagonals which progress equally and, after a 90° turn, coincide with each other, bringing about the line joining the equinoxes of Aries and Libra, and then continuing to the Cancer and Capricorn points respectively.

In the earth horoscopes, i.e. the position of the planets in relation to the Capricorn or Aries points, of people, each degree from Capricorn indicates approximately one year, one complete revolution of the place around the earth axis.

For example, if someone has completed the 25th year, the point in question is either $250 : \text{€}, 4^\circ I', 4^\circ)$ (or 25° , the squares of these points also apply $25^\circ T, 40 \} \{$ and so on.

The right angles formed by the intersections of the equator and the intersections of the meridian plane can now be divided into arbitrary parts, either into 3 or into 6 equal parts. Astronomically, these quadrants are each divided into 90° or into 3 parts, the signs of the zodiac.

The position of the Earth's axis of revolution in relation to the Earth's orbit now forms the magnetic fields, which coincide with the signs of the zodiac. If the north pole is assumed to be the zenith, the sign T is the VII house, the sign $-$ the I and the sign the IV house of the earth. The Ascendant is conjoint 0° .e.; the Descendant also conjoint $00 T$.

For a human being, the apex of the IVth house of his horoscope is the point of gravity, since the extension of the axis of the place-Earth-centre-Nadir is the smallest distance from the equator; for the Earth, the Sun is the point of gravity, and the extension of the line to the ecliptic shows in it the apex of the IVth house, the solar horoscope, or the position of the Sun.

Thus, for the North Pole, if taken as the zenith, the IV house is $0^\circ I$, the gravitation point.

If one imagines that one is sitting as an observer at the North Pole and always had the cancer point standing in the south, then one would have to turn to the right 365 times in one year, because the movement of the earth goes to the east. On March 21, the sun will be seen rising in the west, and it will rise to reach its highest point above the horizon, which is now also the equator, on June 22, and then disappear again in the balance point on September 23. The view to Slid thus **represents** the X. The Sun, as the gravitational point, passes in half a year through the signs Aries to **L i b r a**, the VIIth to the 3rd house of the Earth system.

XII. House of Earth.

In the following six months it passes through the other signs, the houses I to VI, and is then not visible to the observer.

In the house system of the earth, $0^\circ I$, is the point of gravitation, for one day the $(-)$ is the point of gravitation, so a celestial body at $25^\circ I$, if the sun, reckoned back from a moving celestial body, asked the same distance <1 in degrees of arc, will be $\text{am}1\text{gelost}$. Then the celestial body in $:0$ connects with the celestial body standing to the east of the moving sun.

and the 0-arc of 25° Lange is the receptor of this sensitive point 8 a - : 0 = b rd.

The principle, then, is, "What is gravitational in the sun is gravitational in the meridian," and further, "What is gravitational in the sun is gravitational in the meridian."

The decisive factor is the arc in the ecliptic, the solar arc, which the sun traverses from one position to the other. For the age of a person, therefore, not the difference of the right ascensions or the sidereal times but the difference of the radix and the progressive sun is decisive.

Z. E.g. the 0 arc of a person in 1912 was = 31 51', the 0 lfd. stood 1° 13' := = 31° 13', the c/l lfd. SO 55' np and this was 31° 10' from latitude 0 7° 45'.

The hour and minute was about 31° ahead of the 0 running.

= 6° 45' @ and at the same time the meridian. Thus, the 8 fathoms of r1 and 0 were hit at the relevant minute. It was similar with the death of Strindberg and with the death of Franz Ferdinand of Austria.

The Earth as the holder of a horoscopic system now also has a solar horoscope like everyone born on it. The position of the Sun in 00::0 on December 22, when the gravitational point of the

The solar system of the house The solar horoscope of the Earth, or simply the annual horoscope, is the horoscope of the year for all the people of the Earth for the year in question up to the following 22nd December; the incorrectly named annual horoscope of a person is his solar horoscope. The solar horoscope of the current 0 or the daily horoscope has the 0 tils IVth house and gives just lall& events filr people whose radix sun coincides with the current sun, this daily horoscope is the solar horoscope of the persons concerned, only. one has to insert the radix ham.er. In the

Solar horoscope of the running 0 one has to pay attention whether the own solar arc from 0° ::0 on is limited by a planet and whether the solar arc away from the sun is also limited by a planet.

is marked. If the solar arc is formed by 2 running planets, then both planets become active for the person in question and include either the arc 0 r to 0 pr or X r to X v. The first planet must be set to 0 r or X r, then the other planets show either 0 r or the X r of another person. The progressed Sun at the beginning of the signs gives information about the sign or, in the earth chart, about the house concerned.

It should also be investigated whether information can be obtained for the annual horoscope of the earth when the current sun occupies the position of a planet in the annual horoscope.

The position of the other progressed planets in relation to this Sun will indicate the property of the planet and the sign or house in which it will be located on December 22.

' For progressive gestirm tands, the gravitational point ::0 output

The future of the year in question and of the progressive Sun, when the Capricorn point with the progressive planets is placed on the progressive Sun, mainly in the case of rulers, because the 0 is the natal point.

tion and the king, for example, Kaiser Wilhelm 1914. I. August:

The daily horoscope with the personal meridian.

From *A. Witte*, Hamburg.

The position of this meridian in relation to the radix, to the progressive and to the rising pinnacle is described below.

After the moment of birth the place moves eastward in one day once around the earth axis. This run of the place parallel to the Aequator becomes a course of the earth around the sun, thus one year

so that the meridian has traversed $36^{\circ} 1'$ when the progressive sun has progressed approximately 1 degree eastward, which corresponds to the progress of the earth around the sun in one progressive day.

1st the birth moment is known and therefore also the birth meridian, the personal day meridian is found if the difference of the sidereal time of the event day and the birth day multiplied by the difference of the sidereal time of the progressive day and the sidereal time of the birth day is added to the birth meridian.

The horoscope of the Exkaiser may serve as an example. The frontal position on 27 January 1859 in the morning 10 o'clock 7 minutes Berlin was:

♄	♃	♂	♁	♅	♆
A 19° 25'	II 29° 15' ♁ 29° 34'	♃ 11° 41' III 19° 53'	IV 7° 15' V 25° 45'	♅ 9° 03' VI 23° 00'	'U 00 43'
			Z	J	
D 19° 25'	::] 24° 22' VIII 29° 15'	230 52' IX 19° 53'	X 7° 15' 130 13' XI 25° 45'	0 6° 58' XII 23° 00'	b/ 00 43' 't' 22° S7' d' 26° 40'

For the following calculation, any year of the ephemerides can be used, here 1919 was used.

1. *Ercignis*: *Yermahlung* 27 Februar 1881. Stardate 27 Feb

22 h 24 m 53 s

The evaluation of the earth horoscope and the drawing of its- sensitive1 points.

From A. Witte, Hamburg.

The position of the earth in our solar system is different in every view. in relation to its minor planets and its satellites.

For a certain moment, fir deri of the birth of eioes man soil now this state be held.

First, consider the earth not as a body with an **extension**, but as a point in the solar system. This point is then first related to its gravitational point, the sun. -

This guiding ray from the Sun is taken as the zero line for the geocentric angles with the planets and the Moon.

For the born this geocentric position of the planets in relation to the Sun is very important, since this planetary image as a crystallization remains the same during the whole life and the guiding ray for the Earth - Sun is always connected with the moving Sun.

always connected with the moving Sun.

The rising sun in the days following the birth and in the following years always fixes this planetary image. During one revolution of the birthplace around the Earth, the planets have gained about one degree on the ecliptic due to the apparent progress of the Sun; thus, after one year,

6

Sun is

the Sun is in the same position on the ecliptic.

Point as at the moment of birth. The opposition of the Sun is the body of the born, therefore the running Sun must always draw the points in question as a substitute for the progressing Earth.

In order to determine and draw the position of the planets in relation to the Sun, one chooses the same system of the radix houses, in which the upper meridian is considered to be the apex of the Xth house and the lower meridian is considered to be the apex of the IVth house when looking towards Silden. In this system, the upper meridian is the apex of the Xth house and the lower meridian is the apex of the IVth house when the gaze is directed towards Silden. Then the point on the left hand is the I. house and the point on the right hand is the VII. house.

In this Chaldaic system of houses, the fundamental circle of the place of birth is divided into 12 parts starting from the upper meridian. This circle is a parallel circle of the aquator and the orbit of the place of birth around the earth's axis in days after birth.

Since the human being or the place of birth on the surface of the earth is in the same relation to the axis or centre of the earth as the earth is to the sun, this system of houses can also be applied here and the sun is now to be regarded as the lower meridian, as the apex of the fourth house. The planets which are up to 30° east of the Sun are then in the IVth house of the Sun, a planet which is 135° east of the Sun would be in the VIIIth house of the Sun. House of the Sun.

In this way the positions of the planets in relation to the Sun can be easily determined and they have the same meaning as in the radix houses of the born, only all interpretations refer to the radix Sun and not to the birth meridian.

The position of the Sun would be considered as a meridian, namely as the IVth house, if the Earth as the birth point is in 15° np. The meridian plane of the Sun passes through 15° np and 15°) { and 15° np is the upper meridian of the Sun in the magnetic system of the solar body. From 15°) - { to 15° 1' is the IV. house of this. corpus. A sun position in 7° would therefore be in the II. house of the solar body.

Thus the planet Earth, as the point of birth in the magnetic system of the Sun, had the same relation to the Sun and the planets as the place of birth had to the centre of the Earth and the Moon. The Earth's surface was thus irradiated by the Mand, and all the planetary forces combined had an effect on it.

The matter would be different for a being born on Jupiter. Here all the moons would have the effect of the planets, according to the distance of the satellites from the centre of Jupiter and the ordinal number of the planets. The third would correspond to the Earth, the fourth to Mars, and so on.

For the man born on the Earth, the Mand carries all the rays of the planets and is therefore equivalent to the centre of the Earth, which also carries all the rays of the planets; in the Earth the rays are positive and in the Moon negative.

The geocentric position of the planets in relation to the Sun would be the radix horoscope of a person if the Earth were not a body but a point in the solar system.

If now the earth is taken as a body, by imagining the previously considered point spherically extended; then this body has a certain position in its axis to the earth's orbit.

The meridian plane in which the Earth's axis lies intersects the ecliptic or Earth's orbit at two points, in Cancer and Capricorn.

For the northern hemisphere, the Cancer point is the X. house or the Upper Meridian of the Earth's body. For the northern hemisphere, the Cancer point is the X house or the Upper Meridian of the Earth body and the Capricorn point is the Lower Meridian or the cusp of the IV house.

For the movement of the earth around the sun, the sun is in the fourth house of the earth horoscope from 0° :0- to 0° and the course of the earth or the ecliptic is divided into 12 parts. The Sun is therefore in the upper Meridian when it is in 0° @ and run through the X. House to 00° Q. This division of the ecliptic applies to the 12 signs of the zodiac and is the sign 0° the VIII. House of the Earth.

For the movement of a point of the earth's body, the equator or its parallel circles are divided into 12 parts for a certain month from the meridian. So each time the fundamental circle <fer movement divided into 12 houses.

The primary is the position of the planets in relation to the Sun, the secondary is the position of the Sun in the 12 signs, the position of the planets in the same and the position of the planets in relation to each other.

The planets act on the sun in the finely distributed solar dust and its magnetic bearing around the magnet sun and its influence acts again from the center of the sun on the planets and their emanation.

The effect of the planets on the Earth and its inhabitants is due to the position of the stars in relation to the meridian plane of the Earth Cancer Capricorn and the influence on the magnetic bearing of the subtle bodies of the planet Earth.

The rays of the planets are held by the subtle emanations of the earth body, which the born one absorbs during the moment of birth.

The entire planetary picture of the magnet Earth with the Earth meridian and the natal meridian, as well as the horizon and its intersections with the ecliptic, the ascendant and the descendant, is henceforth pulled along by the progressing Sun".

In addition, the place of birth rotates around the earth's axis every day after birth, so that one day after birth the sun is approximately one degree ^{east}.

Now there are two movements in connection with each other, the course of the place in the parallel circle to the equator and the course of the earth around the sun.

Thus one day after birth is equal to one year and the constellations, which arise through the movement of the earth - in days after birth - come into effect when the earth has made as many revolutions around the sun as days have passed.

But the place, or meridian, which in one day makes one revolution about the axis of the earth, is then like the earth which in one year makes one revolution about the sun.

The arc from the radix Sun to the meridian or X. House Radix always remains the same. In this way the X. In this way the X house is advanced by the progressive Sun by as many degrees as the Sun has moved back from birth.

It becomes- then X prog. \ominus progr - 0 radix.

This X before represents the birthday and it runs the arc,

0 rad. up to X always preceding the current scmne. In this way one obtains the progressive meridian, which follows the course of the birth. ort in days after birth.

The meridian of the Earth, Cancer and Capricorn, is advanced by the progr. Sun, so that after 20 days after birth its state would be 20 $\text{\textcircled{R}}$ and 20 Z.

This advanced Earth meridian now forms aspects with the radix planets and allows the planets in question to take effect in years after birth.

Also the planets advanced by the progr. sun form aspects with the Meridian $\text{\textcircled{R}}$ - Z and they come into effect *in* the be years after birth.

However, it is not $1^\circ = 1$ year that is decisive, but the 0 arc, which is is formed by the 8 rad. and the 0 progr.

When advanced planets ascend the cusp of the X. house rad. When advanced planets ascend the cusp of the X house rad, these planets take effect and indicate the event with the 0 arc.

The 1. advanced house can also 1. be connected with the 0 arch.

2. events; but if you use the right ascension of the X. house or the natal meridian. If, however, the right ascension of the Xth house or the natal meridian is used, then the difference between the star times is approximately the relevant arc. This direction, however, can only be carried out with the signs, i.e. to the left, because to the right the 0 arc applies, since from the right the aspects of the planets in the ecliptic act on the cusp of the X. house. House.

The direction of the meridian is brought about by the course of the The arc from the right to the left is the arc from the left to the right, and the arc from the right to the right is the arc from the right to the right, and the arc from the right to the right is the arc from the right to the right.

The conclusion of the management with the **R. A. of** the X. House or the Birth meridian is as follows:

$365 \frac{1}{4}$ days = 361 degrees in right ascension (the meridian traverses

361° in 1 day) and $\frac{1}{10}$ year = 36.525 days = 360 06', o he if 1 day = 1° , then 36.525 days are = $36^\circ 32'$ and too large by $26'$.

Therefore years = degrees + days = minutes (6 days = 1 minute) - $\frac{3}{4}$ of the degrees as minutes = $36^\circ 32' - 27' = 06^\circ 05'$, as calculated before with $36^\circ 06'$.

This arc of direction is the time or t arc, which n l. t r d i r e kt, i.e. going with the characters, may be applied dar\ Kon v e r s, against the characters, acts the 0 arc.

In the earth horoscope, the meridian $\text{\textcircled{R}}$ - Z stops and in this horoscope the cardinal points our of the progressive Sun before pushed, the earth meridian can therefore not with the. Zeitl: >ogen conducted become

The houses of the natal meridian are obtained according to the method of the fundamental circles.

It is divided from the meridian to the equator in 12 equal parts, to 30° each and the intersections' of these g e r a d e n ascents with the ecliptic determined, so that the houses indicate each 2 hours after the birth minute with their meridian. The first two hours after the natal moment is the X. The next two are the XI house. etc.

The Chaldeans divided the equator into 24 parts or houses and thus had a coincidence with the hours after birth.

That the Chaldeans were not entirely correct in their 24th division will become apparent from the following list of aspects and their resolution.

The horoscope of the former emperor is used as an example for the previous explanations.

The PlaneteAstande from 27 Jan. 1849 vorm. 10 h 07m are:

1j 5057	6614° 11	1j 20057	6629° 17

For a better overview and to better evaluate the interaction of the planets, both sequences can now be combined again.

will be united. The mirror points of the planets are then aligned with a X designated.

To fix the 0 arc and the progressive position of the sun, the position of the radix sun is taken for the birthday, $6^{\circ} 58'$. From the ephemeris, we can see that the Sun is in a position between the 26th and the 60th. and 27 Jan. $1^{\circ} 0'$, therefore 0 Bg. fir one year = $1^{\circ} 0'$ = 365 days.

For the past. For the period from Jan. I, 1859, 5' are to be counted and for the next Jan. 1860 after the birthday 365 days - 27 days = $1^{\circ} 0'$ - 5' = $00^{\circ} 56'$.

The position of the progressive sun for the first of January 1860 would then be $+$

$$6^{\circ} 58' - 00^{\circ} 56' = 70^{\circ} 54'$$

The ephemeris of 1859 gives the 0 position at Greenwich as $8^{\circ} 0'$ & for noon there. To obtain the position for 1 January of all subsequent years, one *must* therefore subtract $12'$ from the noon position each time.

trahieren. The difference of this progressive sun position - with the radix position gives the 0 arc.

The 1st of January is taken because it is convenient to calculate. Also, one can now determine the day for the position of the progressive stars at noon in Greenwich. There are $12' = 2$ months and 12 days = 12th March of each year for the born and if the time of a progressive lunar aspect after noon is converted into days and added to the 12th March, one gets the event day for this aspect. Conversely, an unknown birth time can be determined with the event day and the progressive lunar aspect. I use the latter method of finding the unknown birth time with good success.

Overview of the progr. G position and the G arc. Sun of

birth $6^{\circ} 58' 27$ Jan. 1859 0 arc.

The radix points and their aspects, as well as the mirror points of the planets and their aspects, come into effect through the meridian of the earth. Furthermore, the progressive Sun also sets the planets and their mirror images into action.

1. Example: Death of the father on 15 June 1888.

On 1 Jan 1890 the 0 arc $31^{\circ}14' - 2^{\circ}00' = 29^{\circ}14'$ for 1888
 \oplus 5 months and 15 days = 25' \oplus 3' = 28', together = $29^{\circ}42'0''$ Bg.
 and 0 progr. $6^{\circ}40' -$)(-

According to the listed aspects of the stars, f:6 with $29^{\circ}17'$ and $300^{\circ}43'$, and the one with $29^{\circ}34'$ and $30^{\circ}26'$ is falling. The previous 0 is at the point of cancer, which is the point of balance, i.e. the sudden death of a family member;

for **U** is family and any connection with other persons.

0 and 1J are family planets in this chart because 00 J) and $0^{\circ}0'$, since -J) 0 indicates the family.

The progressive sun with $6^{\circ}40'$ leaves the 8, the n, the <? and the 't' act.

As soon as a progressive star also has an aspect with the cardinal points, which shows the same 0 arc, as in this case 0 progr. with $29^{\circ}41'15''$, then this is the main planet, which draws the lot.

The running 0 stood $13^{\circ}08''$ in C rad. $13^{\circ}13'0''$. The running 't' stood 00 44) (in Du rad. 00 43) (_ The laufende 0 stood $24^{\circ}44'$ (in c? J) vorg. $24^{\circ}06'1''$.

The running 'J) stood in cf ?J rad. $2^{\circ}18'$ np at noon.

If ongoing planets are at a distance of 0 arc from the cardinal points, these planets also affect the event.

The running '2j. with $28^{\circ}37'$ nt formed the 0 arc with the ;; points. The running 't' with $0^{\circ}44'$ (with the 0 arc $290^{\circ}16'$ had the ab stand from @ points.

Second example: War 1914. August 1:- 1918. November 11.

0 arc $55^{\circ}46'$, 0progr. $2^{\circ}44'$ 'T' and $60^{\circ}00'$, 0 progr. $6^{\circ}58'$ T'. The advanced canker point had 0)) , /- , , 7 d'' , $5/12$ '2j. aspects. The Moon at $24^{\circ}22'$, cJ' at $26^{\circ}40'$, and '2j. at $26^{\circ}41'$ occurred in Effect.

The progressive 0 at $2^{\circ}44'$ 'T' touched the **U** and the ascendant, entered into conjunction with the cf cJ' $3^{\circ}20'$ c: = $7/12$ '2j. $18^{\circ}19'$ @ and rolled up the mirror points of the planets in the order of , '2J., d', J), It, <? to the cf of the 't' $7^{\circ}03'$... In the sequence of radix planets was A, 0 and X maBing.

The main planetary states were therefore 0 <? and cf d' to cf 't', which were raised by progr. 0.

As a conclusion of the war, 0 made itself with $59^{\circ}34'$, with $60^{\circ}43'$ and as mirror point 0 with $60^{\circ}26'$ noticeable, so that 't', 0 and the 1 end of the war brought about by the meridian of the earth @ - :0 and by the progr. sun.

The running 't' in cf 0 radix gave the start, the running 't' cf li, the end of the war, wefl 't' radix cf cJ' radix stands. Thus the connection of d'' and li, is established by 't'. Now, since l-) and d' represent the warlord, the 't' must connect with n, radix, to confirm 't'- and 8, the defeat of the commander 0 cJ' (in radix 0 di li).

- Neptune grünllich blue and Mars rotl. yellow are <lrough their colors complementary planets.

Not only the meridian plane of the Earth \oplus - l; acts as a mirror plane, but also the equatorial plane 'f-:!J=. The declinations of the radix planets draw parallel circles to this plane through the rotation of the earth, which are intersected by the advanced planets in the same latitude to the ecliptic as in the radix positions. These parallel circles and the path of the advanced planets belong to the Earth chart; the points of intersection indicate the event and the time in the arc.

If squared paper is used to draw the declination lines, take 2 columns for the declinations for each 1° and 1 column for each year, running to the right, so that each vertical line ends with the 1 Jan of a year.

The arcs for each 10 years are then plotted on the flB.ente and the declinations of the advanced planets are entered so that they come into the correct fields with the round 0 arc.

Z. E.g. 0 progr. or advanced for 1 Jan. 1919 = $60^\circ 07'$, of Jan. I, 1859, 60 years have elapsed, here almost coincides the 0 Arc with the round **measure of 600 00'**, with which all planets are advanced with the vertical -line, one must however here already $^{1/10}$ of the intermediate space zuriickbleiben, since the arc amounts to 1 Jan. $60^\circ 07'$. The difference, however, can be up to 3° , and ' in the case of wrong entries of the advanced declinations, the intersections will come in at a wrong time. With the help of a graphic table for the calculation of the advanced declinations, one can already produce an overview of all intersection points in 2 hours. This overview and the one given below give sufficient clues. fiirs ganie life. The draw is made by the declinations of the current planets. (Boards at 1.50 Mk. can be obtained from me, 'Hamburg 23).

For births in March or November, the years and the solar arc would have the same number of degrees/ in January and July, the sun already loses $26''$ with 10 years a n d danger, so the solar arc must be used to determine the time.

From the order of the aspects of the radix planets urid of the aspects of the mirror points it appears that always those planets together indicate the event, which are in approximately the same degrees.

stand. Thus .bl with $00^\circ 43'$ and 0 with $00^\circ 26'$ together every 15 years. The solar arcs would have an effect in the 1st, in the 6th, in the 31st, in the 61st, etc., if the solar arcs were to coincide with the annual arcs. The arc of the year n is the usual way of calculating 1 1 year.

It actskteri at marriage with the 0 arc $22^\circ 22'$, 8 211:> $58'$, X22015', 't' $22^\circ 57'$, and in the mirror points also 't' $22^\circ 03'$, X $22^\circ 45'$ and 0 $23^\circ 02'$.

0 d' is the spouse, so the associated planets must be 1J and 't1 give the partner with :J). The sensitive point 0 d' (spouse) \oplus or also 'f: d' 8 indicates, the VII house of the earth set to the 0, the new d' state in conjunction with 0 and is $4^\circ 38'$:m in a with the current d' $30^\circ 10'$:m. The sensitive point 0 d' - X. \oplus shows the own person as spouse and is the point as many degrees from the

tlalth - of the sum of G; and d'' removed like the X. House from the half.

0 $d'' - X. = 27^\circ 23' T$ in cf with $1j 25^\circ 42' T$ and $cf < 25^\circ 27' T$
 Jaufend. + There are still the points 0 + d + :J) and 0 + d + <:!,
 0 + $d' - J$) and 0 $c3$ + ' - <:! considered, which were drawn by' the running
 pla netes.

The aim is to recurring events, ...modified
 by the planets in progress...

If the radix planets stand in sharp aspects to each other, &o they act in
 connection: Thus here and 0, $c3'$ and 2l-,
 -0and X, :J) and 1j are closely related.

In charts in which the 'planets are more clustered in their aspects, one will
 readily see the rhythmic recurrence of the
 -detect events.

1st a planet enclosed in the order of two .others, both- act on the middle one,
 here <:? is between 't' and 1j,

:J) between d' and 1j. The two planets d'' and ? gave . at the
 :Ho.ch time of daughter this event, draw by0lfd . $cf c3' / 1j$.

XI. Year,

August-September 1921

Issue 11/IZ

The Astrologische Rundschau is published monthly with at least 16 pages and contains, apart from contributions from all astrological fields of research, also information about the activities of the astrological societies in Germany and abroad.

The subscription price for this year's issue is Mk. 14,- for Germany and Mk. 28,- for abroad, and should be sent to the Theosophische Verlagshaus, Leipzig, Inselstrasse 29, 1st class,

Please address all correspondence to the publisher. Please enclose postage.

The evaluation of the earth horoscope and the drawing of its sensitive points.

From A. Witte, Hamburg.

As already mentioned, the meridian plane R-Z and the equator plane are mirror planes of the earth chart, these two classes 7 mirror points of a planetary position in appearance, so that each planet 8 times.

The lines or parallel circles to the equator, which emerge from the declinations and emerge from the rotation of the earth, are conveniently drawn in a quadrant only.

The mirror points in Lange must all be determined, or at least one, because one point of a planetary position is in its opposition, while the other is at the same distance in Lange from the R point as the radix planet.

If mm a planet advanced, a progressive or a running planet enters one of these mirror points, the meridian of the earth is a closed one of the radix planet and with one of the mentioned. Even aspects are enough to set the planet in action.

The mirror points to the earth meridian, which have already been mentioned, are:

023° 02 TTL,	96° 08 Z,	1j 20° 57 'ti,	62' 29° 17 =.
J) 50 38 ::z::,	o' 30 20 """,	0oo 26 ,Q,,	X 220 45 I,
16° 47 :./',	21- 18° 19 @,	t' 7° 03 £,	A 1oo35 rip.

The first thing to be considered again is the gravitational point of the earth, the progressive sun or more correctly the progressive earth in the days after birth.

0 pr. 6° 40 } . Death of father in connection with " " , 9 and 't'; 0 r. and Xr. 0pr. 19° 50 H. Death of the mother " " , <'. } Jand* 1j, 6' 2t=D' 21-/1J. In the case of events in the family and with friends, pay attention mainly to the progressive planetary positions of one's own horoscope in connection with the radix stars of the other person's horoscope and to the progressive stars of the other person to one's own radix positions and their mirror points.

Z. For example, the progressive stars of Prince Joachim were at the 18 July 1920, 0 26° 01 Z* d' rad. K. W. J) progr. □ rad. progr.

'J Ascendant K . W . d progr. D 'f rad., D X. Mirror point K . W.

The progressive stars of Prince Joachim to the radix of the Empress: 0 □ 0 and J, J) □ d", ? d ? , d cf 'f, .Q □ ? . Ascendant Di'.

I always find the above rule confirmed.

In the present horoscope, masculine persons are represented by 0 and 11. indicated as n, rf' 0. Fir the event must still be consulted the marriage horoscope, because this indicates the events in the family. Now, since n, and 0 continuously give the masculine person, so both must be related to the marriage horoscope to make the draw w b . -

It was l₁ running 9° 26 np cf 0 9° 04 } of the marriage chart; and 0 running 25° 56 © □ l₁ of the same horoscope and 'f running .Q running □ 'f.) running d 0 cf 0 the Marriage.

The earth horoscope generally shows connections with other persons; in the case of rulers it also shows their own kingdom and the neighbouring states, as well as other events connected with the kingdom.

To connect the meridian points of the earth © and 'lb with the planets, the half sum me, (:0- + :ianet) is used as mirror

plane and the mirror points of the other planets of the other planets.

Thereby the body of the earth is connected with a planet and its Effect veteinigt. His relation to the other planet then gives - the mirror point.

It is 'lb + 0 = D 0r, 'lb : 8 18° 29 'lb, the mirror plane of the Earth body and the body of the born or also body of manly persons. These half sums. of 'lb and planets are sensitive points.

'lb + 8 - X specifies the point that is the same distance from the Mirror Level l₈ has, like the X. House of this, it means the own physical connection with the earth and its inhabitants.

The planet, which is taken as mirror point, is always the new gravity point, which gives a statement soil. It is always subtracted from the sum of two planets. The equinoctial points as well as the X. HatJS and the Ascendant are treated as planets.

The difference between the points :0- 0 - X and 'lb X - 0 is that the first point provides information about one's own person or X. house. The second point, however, provides information about the 0, i.e. about one's own house.

Body given. He may also -give his own relation to the father or to other male persons. 'lb 0 - X = 29° 43 'lb, :0- X +

- 0 := 00 17 I, 'f rd. 0° 44 :n.: Death of the father, ? lfd. 29° 58 © Death of the Son Joachim, d" lfd. 29° 10 ® and .Q lfd. 00 37 I. Birth of the Prince Wilhelm.

If one draws all planetary positions and puts on the paper a degree disk, which is rotatable around its center, then always the planet of the paper lies together with the 0-point, which is subtracted from two, planets, here 0 planet.

If the radix positions are entered in red, the mirror points to the meridian of the earth in green, then one can bring the Z' of the disk together with a planet. Then the planet (green) with the 0 is added and all other green planets are subtracted from this sum. The red planets are then added to this.

Sum with Z' + green is added. It would be e.g. $Z' + 0 - 0 = 7^\circ 24' N$,
 $Z' + 0 + 0 = 6^\circ 32' \text{ @}$.

Sun. and Uranus give declarations of war in the case of rulers in the earth's horoscope, and stroke in the case of other persons.

In 1914, the running Q, $8^\circ 57'$ } on the death of Franz Ferdinand. on 28 June and $7^\circ 08'$ } on 1 Aug, the running 0 $5^\circ 50' \text{ @}$ on the death of the Archduke.

If you place all the planets in the drawing 'next to each other on the Z', or turn the disc so that the planets coincide with the Z' point, then each planet with its distances' in length to the other planets gives information about its property, about the sign in which it is located in the radix and about the house of the natal meridian in which it is located. The house of the natal meridian in which it is located. Note then the arc up to the planet with which it is conjunct. The position of the current planets in relation to the earth meridian gives rise to the new positions.

Z. E.g. in the present horoscope. 0 set to Z', 0 rad. - in =- in the Vth house of the earth, in the XIth house of the natal meridian gives information about " male children, male friends, 0 in the sign of the 2i, 2i in the IX. House of the Earth and in the III. of Birth further information about long... Travels, about colonies and neighbours and their correspondence. ,

2i on :0, 2i in the IXth house of the earth in the sign of 9, in the IIIrd of birth, and 9 in III. Earth house, in the sign of 0 and in the IXth of birth, gives information about long and short journeys, about colonies, about letters.

0 on :0, 0 in the. VIII Earth House, in the sign of ::", in the II of the Ge- hurt and Q) in the second house of the earth, in the sign of 'JJ', in the eighth house of birth. The sign of the house of birth gives information about death traps, inheritances, hostile people and revolutions.

IV on Z', IV in the X. Earth House, in the sign of the . and in the IVth house of the earth, under the sign of the ii, ii, in the XIth house of the earth, 'under the sign of the 0 and 0 of ii, rad, shows one's own person as ruler, as r:fXradix, es. also provides information about his own affairs and psychological experiences.

A on :::, there cf ::: the I. House of the Earth, gives A skunft iiber new- connections, Uber Trennungen und Todesfalle.

J) on @, since the moon is synonymous with the place of birth; for, the moon has the same rotation about the earth's axis as the birth-sor(and a synodic lunar course is equivalent to a rotation of the Ge ...is one year...

∴ on © gives information about women and about the people of rulers, in horoscopes of female persons about female affairs.

- Below are listed some sensitive points of the earth horoscope- The planet placed on Z- is subtracted from the sum, or- the degrees missing at 30° are added to the radix--.

The position of the planet of interest is added to all other positions and the signs for it are read on the disk.

The horizontal - row of a planet gives the signal points to the Etdmendlan of the vertical column of the same planets.

The arc of two planets added to the Z- point, gives the sensitive point of the born and the progr. 0 sets these points and planets into action.

The family p.Janeten. are 0 and J),- here in cf to n , and 0 ; -
 0 : 0 therefore gives the combustion of the male with a female, hence the arc 0 : + Z- is drawn by the 0-arc 22° 22' at the grinding, and the sensitive point I; + 0 - 0 22° 36 'T' shows this 0-arc. Moreover, the arc 0: fl, + Z- is 23° 45 I; - at the birth of the former crown prince fallig.

The running lj with 25° 42 'T' set off the point 0 : 0 + Z-; the running 0 with 9° 04 }{ Ioste the point Q) : lj + :0; the - running 2J. with 20° 05 'T' set off the point 0 : J) + I; the running 0 with 11° 51 nt released the pun kt J) : 0 + Z-.

The progressive 8 'with 29° 20 ∴∴∴∴ set the X. House in activity. The associated planets to 0 and 'J) also come into operation, so is lj : 0 + :0 20° 3 I ∴: cf 2j. current and 0 : lj + I; = 9° 29 }{ cf 0 running. Or (cf) ? r, therefore lj is the husband, 0 + 'd' is the husband,

therefore here also- lj + 'd' the husband, and the wife's husband is lj + 'd' - O> = 11° 21 I. cf 2J. r I 1° 40)(ur: id □ 0 running I IO 5 I np, thus the Connection of 0, 2j. and 0 justified. See also marriage of daughter lj + 'd' - 0 = 6° 09)(, (d lj lfd. 6° 53)(, lj + 'd' - 'J) 11° 41)(, D d' lfd. 1 0 28 'T', 8lfd . cf d' / r, radix and 0 lfd. d 0 radix.

The 0-arc begins with birth at 00 : 0 and 0° © in the earth horoscope and ascends on -both sides upward from the Z- point and

falls down from the ®-point also to both sides of the ecliptic. He sets the planets in action which have the same arc from each other or with the same in aspects to each other, i.e. $90^\circ + 0$ -bg. and $180^\circ + 0$ -bg., $90^\circ - 0$ -bg. and $180^\circ - 0$ -bg.

If two planets form an arc as large as the arc from the Z or ® point, or even from the two equinoctial points T' and $\frac{3}{4}$ to the progressive 0, both planets are set in action, thus 'I' : 0 = Z : 0 progr.

At the death of the father 0-Bg. $29^\circ 42'$ the arc IV: 0 + p', Q. : Z and 0 : Z put into action. The progr. 0 with $6^\circ 40'$ { set the arcs 't' : 0 + ;?; = $6^\circ 37'$ H, Q. : 0 + Z $6^\circ 15'$ H, 0 : + I $6^\circ 15'$ I and <? : Q, + Z $6^\circ 51'$ } (in oscillation. The running 0 with $24^\circ 44'$) (Joste out the point 0 : J) + Z and the point 0 + cJ' - 1j. The point A + CJ' - 1j was confirmed by the progr. 0.

The positions of the current planets to the earth meridian ® - Z' lost all sensitive points of the earth horoscope, on the other hand the running planets also trigger the independent planetary images of the individual planets of the radix horoscope.

The course of the Earth around the Sun apparently causes the Sun to move along the ecliptic. These different positions of the Sun in the Earth's orbit are gravitational points of the Earth's meridian for the Earth's horoscope. Any point on the ecliptic can be a gravitational point, and this is the case for the radix sun positions of all people.

It is then the arc Z to 0 radix the arc, <;len the sun from the 22nd of December, so already this sheet must indicate differences of the people indicate In other words, the position of the sun in the various signs has a different effect, since the position in relation to the meridian plane and the declination are taken into account.

For the northern hemisphere, the signs T' to np are day signs, for the southern hemisphere, the signs $\frac{3}{4}$ to H, so for the earth meridian the position of the sun in the twins is 12-2 o'clock after midday, its position in the from 1-15° with 9-10 o'clock in the evening, etc., the progressive position of the Sun in Aries with 5-6 o'clock in the evening significant.

- The position of the sun in 0° Z is then equal to the midnight hour. Afterwards also each Radixplanet had its certain minute, if the planets are regarded as differentiations of the sun, and with right, because heliocentrically the sun unites in its center the radiations - of all planets and were e.g. the Jupiter stood the representative of the spherical zone of the Jupiter in the sun. The whole planetary system in the magnetic solar body will be a similar image in a reduced form.

The position of Jupiter at 11 41) (with latitude as right ascension would give approximately the time 1 hour and 13 minutes after noon. The planets in the signs Cancer to Scilts would occupy the time from midnight to noon in reverse order, and the signs Gemini rückwärts to Capricorn the time from noon to midnight. From this one could infer individual planetary hours. The Sun would again dominate the solar arc from the radix Sun to the progressive, that is, from 5 o'clock to 10 o'clock in the evening, 0 progr. to 0 radix.

Instead of the minute for the position of a planet in the radix, the time of the effect is increased by the advanced position of the same planets, and it will begin 4 minutes earlier with each year, namely from the advanced position to right before the position of the radix.

About the hours and minutes of the reign of these planets I have not yet made any investigations, but about days and years of the 0-arcs of the planets.

Since the arc of the ecliptic indicates not only hours or a day, but also a year, the 8-arc of a planet, radix position to advanced position, can also indicate '[age of the year and it even indicates years by the -transition of a slowly moving planet.

Thus, for example, 1j r 9° 03 Q was set at :0- (0-stand radix 6° 58 , 0-stand progr. 6° 58 T) the stand of the 0 27° 55)(to 27° 55 Q, i. e., therefore, if 1j rules the earth, the 0 - arc of the Sun is to be found in these degrees and signs, and it has been run by the 1j from the day of the beginning of the war to the end of the war 27° 43')(to 27° 31 Q.

Fiir Detitschland was thus 1j the master of the war and ? c: ? 0radix of the Emperor shows him in fact as the Supreme Warlord, for the Lord of the X. House is also 1j, $X_r = 7^\circ 15 :0-$.

The faster moving planets indicate by their transition over the solar arc the duration of the event in days; thus S? and "d" indicate periods of love, and in the case of individual leaders the "d" over their 0 arc will have indicated the duration of battle in different periods of battle.

If we now look at each planet in its constellation with the other planets, it has strong and weak aspects with them. Strong aspects are the division of the circle into 2, 3, 4J 6 and 8 parts, weak aspects are all other angles of the planet with the other planets. The 5-part aspect has a medium effect.

Each long circle which intersects the ecliptic at right angles and in which a planet stands now acts as a mirror plane. The mirror point of a planet stands at the same distance riickwarts reckoned from the main planet and d:ese sensitive points are reckoned as follows:

z. For example, if 0 is the main planet, then 0 0 - J) is the mirror point of the Moon to the Sun and 0 + 0 - o' is the mirror point of Mars to the Sun.

One finds the positions of all mirror points leiclit, if the degrees of the 0 as mirror point are increased by so many degrees up to the degrees of the radix sun, because -it soil itself the 0 radix with the

The sign of the mirror point of the sun at :0- is read. 6° 58 + 6° 58, i.e. I 3° 56, is added to all the mirror points of the planets at :0- and the sign for the points at the mirror points at :0- is read off, if

the mirror point of the 0 coincides with the position of the 0 radix 6° 58 on the degree disk. Then all the planets are at the opposite distance from the 0 (grüin) as the radix planets from the radix sun.

The 0 is the starting point, on one side are the radix planets and on the other the mirror points of these planets to the Sun.

Since the radix positions are known, only the mirror points to the planets are listed.

Mirror points

	to the 0	to the J)	zuril d'	to the	to the 0	to the X	to the A

:0-	13° 56):}	18° 44 £=	23° 20)(18° 06)-(29° 08 £.	14°30:0-	8° 50

One pays attention first again to the family planets r, and. 0, since in cP of 0 and J) radix. At the grinding the laufehdc 0 had the same distance in Lange from the radix moon as the radix sun had from it.

0 running 11° 51 111'. The sun running had the same distance as the lt from the moon.... 0 running 9° 04)-(at noon. The progr. 0 29° 20 - stood in- D to the 0 radix. The running n, 25° 42 1' stood in □ to the 't' and to the 9 as mirror points to the moon.

At the death of the mother the 0 progr. stood 19° 50 }{; it was the same distance from the0 rad. as the 9 rad. 20° 0-4 ->-<. The running moon 18° 08 1' was in a with the mirror point of the 0 and in □ with the sppct. 0 of the 9 and in cP of the sppct. to the n,. The stood 23° 22 ® in Q to the sppct. J) to the n,. The 21-running 4° 13 :0- in o *sppct*. 21- to the 't', etc. .

At the death of the father 0 arc 29° 42, 0pr.6° 40 }{ she was - a X as sppct. to the 0 radix, the running n, 4° 17 Q was in a n, sppct. - to the 0r ., the running 13° 08 £= in 0 O Sppt. to the 0 r., the running 't' 0° 44)(DSppct. z. 0 and D Q radix, 0 lf. cP rad., the running '6 2° 26 Q. cf Sppkt. rj' to the 0 rad., 21- laufend 28° 37 nt. cf A Sppkt. to the. n, radrunningcP Sppt.kt. d' :!Ur 0rad .nnd 0lfcj . cP radix.

The above evidence should be sufficient to confirm the correctness of the theory of mirror points and sensitive points.

Not only the mirror points listed, but also the planets that are still missing, especially the '6, since it indicates connections and separations, act like the Ascendant. The :mirror points to the :0- must be listed first as fundamental to the whole system.

. If each planet of the radix is considered in the context of the others . If a planet is set to the :0- point, the planet drawn is the sum of the gravitational planet set to :0- and the current planet.

Z. E.g.: 8rad. + 't' lfd. = ⁷⁶42 ®=IV. House rad. 7° 15 ® death of the father.
 J) rad.+ 0 lfd. = 00 24 © = IV. House rad. 7° 15 © death of the mother.
 Q) rad. + 0 lfd. = 7° 22 nt = D0 rad. 6° 58 bl, Death of the mother.

N1r1n but can also run the sums of the radix planets of -are drawn from the planets. The sums are not drawn from the ram point, but from the :0-point, from the meridian of the earth. So 90° must always be added.

Thus0 rad. + J) rad. = 1° 21 :0 and not 1°...21 :!:= at the death of the mother cP 't' lf. 0° 32 ®, J) + J>rad. JJ J) rd. Q) + n, = 3° 25 ® cf 't' lid.

In order to obtain all these sensitive points, the Z is always set in connection with the radix planets on the respective planet, i.e. Z :0 +- J) or 0 + J) - 270° or also 0 + J) + 90° .

This system has the advantage that one always has to reckon with only two planets in connection with the earth meridian.

It is + d'' sex love, or mother and father, the basis of married life. In the\ present horoscope 20° 32 } d
 0 progr. Tcld of mother. c;>+ 0 is loving man, but since 0 cP lj, so also c;>+ lj is the same in this horosk-0p = 2° 55 Q cP cJ' lfd.
 -3° IO = at the grinding. c;>+ J) is loving wife, since Q) cP 0, so also c;>+ 0 is the same = 23° 26 t/ cf lf marriage of daughter.

Some sensitive Punl'te in connection with the gravitational iebene of the earth @ - :0 shall be given hiet.

The solar arc and the progressive sun can draw, furthermore 'the running planets can draw.

The heights of the pure sum, calculated from the Aries point, are sensitive points of the cosmic positions of the planets, therefore without regard to the Earth's meridian. Such points sina very important and' is mainly the passage of the progr. sun, since . these are the main gravitational point is to be noted. It is al o the point o' lj

or d'' / lj = 260 40 }-(; 90 03 Q = 2° 52)(and 2° 52 I, 8 ; 0

i

= 3° 16 'T'. The 0 progr. in 1914 stood in this point.

These sensitive points actually do not belong to the earth horo skop, but they only have reference to the center of the earth and its position to the sun radix and progressive. These points are also triggered by the planets in progress, the X. house or the birth meridian in progress. The X house or the natal meridian in progression is also influenced by these half sums.

The sums calculated from the Aries point now form the
- Fundamentals of all remaining sensitive points, since from the plane of half sum a mirror point must have the same distance as the radix planet.

So $0 + J) - 9$ is the point which has the same distance in Lange from $J) / 0$ as the 9 radix. Therefore $0 = 6^{\circ} 58' z:z + J) 24^{\circ} 22' 11''$
- $9 23^{\circ} 52' - l = 7^{\circ} 28' Z. a$ X. House rad. $0 + _ :J) - 0 = 1^{\circ} 46' 66''$ in
cf /b running $2^{\circ} 26' bL$ on the death of the father.

The first two. Planets give as a sum me the object with its effect in half on a thing or on a person.

Here $G' + :J)$ is the marriage of father and mother, the 0 is the female Person because $cP :J)$, that is the mother. The running .Q gave the separation because in the radix {6 with 0 forms a D.

$0 :J) - 1$), is marriage in relation to a man, = $22^{\circ} 17' c5$. *cf* If. $22^{\circ} 38' cJ$ at the daughter's wedding, thus points into the son-in-law. 0 progr. $+ :J)$ raclix - 1j radix = $16^{\circ} 40'$ © in cP with '2 running $17^{\circ} 18' Q9$.

So the 8-arc of the two suns is touched in these sensitive points by the planets and '2l-.

The last point with the progr. sun shows that all sensitive points can also be advanced.

If the radix planets are plotted in -red on a degree disk and the mirror points to the **Z are** plotted in griin and the degree disk is placed so that one radix planet of the paper coincides with the planetary position of another radix planet of the disk, then the planet outside the disk is subtracted from the one on the disk and all other radix planets are then added to this diHerence.

If one lets a radix planet of the disk coincide with a mirror point to the **Z**, then all other mirror points are subtracted from this sum.

If the Sun radix coincides with a planet of the disk, each time the radix Sun is subtracted from the sum of the planet of the disk and the planet outside.

As soon as the Sun is the gravitational point, the gravitational point is always subtracted, the other radix planets indicate the position of the radix Sun of another person. If the progressive Sun of the same person is also in conjunction with another planet, the solar arc of this person is equal to the arc of the radix planets and these indicate the event with the person.

If one finds in one's horoscope the difference between two planets equal to the solar arc of a person, rotate the disc so that the radix Sun of the disc coincides with the first planet, the second planet will then coincide with the progressed Sun of the other person, and the Aries point or other cardinal point will indicate the planet which is decisive for the event.

The mirror points of the individual planetary images also show the progressive position of the sun of another person.

There were, for example, at the gravitational point Sun the mirror points of the d' $17^{\circ} 16'$ and $20^{\circ} 59'$ in cf with the progressive suns of Hindenburg in the years of 1914-1918, so that with Hindenburg the sun indicated the ruler and his own person in connection with the enemies of the empire, as d' and in the XII. House of the Emperor and the Sun as the gravitational point indicated the ruler of Germany. Here was also the progr. sun of the Tsar Nicholas in the year 1916-1917 in \square des 0 and in cf des ?J.

Whether the progr. 0 of another person comes into consideration, he knows from the planetary positions, if each planet is set on the Z. The 0- arc or the age of the person in question is then at the same distance from the Z on both sides.

If one puts a paper disk instead of the degree disk on the drawn earth horoscope and shifts the positions of the planets out of half standing on the paper disk, so that the same planet picture appears, puts now each time the Aries point of the disk on a planet outside and draws then all planet positions of the disk again shifted on the paper, then the new positions show the sum of the plan ten, on which the Aries point put and the drawn one.

Add to the new position first the planet of Aries and then that of the disc, and in this way one obtains the sums of all the planets. The X. The X house and the Ascendant must also be drawn.

Now, if the Aries:point of the degree disk is placed on a planet, that planet is subtracted from the totals of the planets each time. "

The radix and progressed Suns of oneself and others now indicate in total the event with the persons.

Z. B.: Aries the disc on 0 al! Berhalb, 0 is the woman, since he is in cf from :J) radix, so the sum $d' + 9$ gives sex love of a Woman on.

$cJ' + 9 = 20^{\circ} 32'$. - 0 rad. $29^{\circ} 34'$ $d = 20^{\circ} 58'$ cP 21-running $20^{\circ} 05'$ T during the grinding. So also the, running planeter. as- already described before, lots out the sensitive points.

That d' and 9 are possible is shown by the advancedi, planetary positions of the woman, 9 v. $7^{\circ} 40'$ Z cf X rad. of the emperor and cJ' v. $7^{\circ} 48'$ cf (i) radix of the emperor and 0 v. $26^{\circ} 29'$ (D cJ' $26^{\circ} 40'$)-(of the Emperor. cJ' v. of the emperor $19^{\circ} 02'$ T cf A rad. of the same and J) v. of the emperor cf Q rad. of the consort.

The pun.kt $d' + Q - Ji$ $26^{\circ} 10'$ T was taken from the current $? 25^{\circ} 42'$ T, which indicates the man (in cf 0), and the running Q $25^{\circ} 27'$ T drawn. Q $+ 0$ is the Liebe.nde man, but in this chart Q $+ ?$ is also the same, because ? rad. cf 0 rad. $0' + Q - ? = 11^{\circ} 29'$ 61.. \square 't' lfd. 1156 'd, the - is therefore drawing out because it is in cf with cJ' rad.

The graphical method described in the previous paragraphs is the easiest way to understand the meaning and significance of all the sensitive points.

ASTROLO&ISCBE ROUND SHOW

XI. Year,

August-September 1921

Issue 11/IZ

The Astrologische Rundschau is published monthly with at least 16 pages and contains, in addition to contributions from all fields of astrological research, also reports on the activities of astrological societies at home and abroad.

The subscription price for this year's issue is Mk. 14.- for Germany and Mk. 28.- for abroad, and should be sent in 1st to the Theosophical Publishing House, Leipzig, Inselstrasse 29.

All correspondence should be addressed to the *Association*. Please enclose postage.

The events with other people from your own radix chart.

From *A. Witte, Hamburg.*

In the house system of the Earth, the moving Sun is the point of gravitation, for the geocentric angles of the planetary rays are formed to the line Earth-Sun. The earth is here shrunk to a point, as it were, whereas as the owner of a horoscope it becomes a body <through its own rotation about its axis; the point earth in the course around the sun now appears again in the house system as a meridian plane just as the birthplace of a man in the horoscope of the same. The birth meridian moves once around the Earth's axis in 24 hours and passes through all the houses of the horoscope. In humans, the course of the place of birth is counted as one year, in the system of the earth, the course of the earth around the sun is one year. Thus the course of the meridian in the birthplace is one year.

horoscope equals a course of the earth, or the earth as the bearer of the horoscope owner equals the place of birth, shows IV r equals 0 lfd. In the earth horoscope $\text{OO} :0-$ is the IV. In the earth chart $\text{o0} :0-$ is the IVth house of the earth and $0^\circ \odot$ is the Xth house.

Accordingly, the Sun is in IV on December 22.

Since it is not

Capricorn but the Earth that receives the rays of the planets and <hole -If the IVth house is the extended gravitational line from the place to the center of the earth, the position of the planets is formed on December 22nd in relation to this meridian plane, which results in the annual horoscope of the earth. The running Sun now represents the IVth house of the Earth's horoscope, and all the houses of the Earth's

The planets point back with the sun from west to east once a year as far as the Steinbock. In the centre of the earth all the rays of the planets are united, and in the sun, taken as the centre, all the rays are likewise united.

so the sun shows in $\text{OO} :0$, in its earth meridian all rays

-The arc $:0-$: 2j. must be added to the 2j. to obtain the sensitive point for the point $\text{OO} :0-$. The progressing Capricorn or the progressing Sun, passing through this point, li::ises the 2j. The point is $'2!-+2!--:3'$, $:0-$ as the gravitational point. If 2J. is placed on the $:0-$, the 2j. now arising is the sensitive point and there is then the running 0 in cf with the first 2!-.

In the earth horoscope of a person, i.e. the radix planets brought into relation to the earth meridian, the radix suns of other persons give the sonen the gravitational point. To this gravitation point now the own Radixplanets are brought in connection, by setting this sun with the own planets to $\text{OO} :0-$, exactly like one from

-The annual horoscope of the earth calculates the event for the day of the running sun, if this running sun is used as gravitation.

The radix planets of the Exkaiser Wilhelm II are:

I. 0	$6^\circ 58'$	$? 23^\circ 52' 1''$	1j	$9_0 03$	\odot	$\text{OO} 43 \}$
J)	$24^\circ 24' 11''$	$d' 26^\circ 40' \}$		$0 290 34 cf$	X	$7^\circ 15' :C$
	$13_0 13 :0-$	$2j. 1 1_0 41 \}$		$'f 220 57 \}$	A	$19^\circ 25' 1''$

The radix sun of the Emperor Frederick was $240 03 d'$, then

,the planetary positions when $:0-$ is set to 0

r B. is set: $(:3''$

of the

degree disk)

2. 0	$12^\circ 55' T'$	$29^\circ 49'$	1j	$15^\circ 00' :t'$	62;	$6^\circ 40' cf$
-J)	$\text{O}^\circ 19$	$d'' 2^\circ 37' \}$		$0 5_0 31 i$	X	$13^\circ 12' >-<$
	$19^\circ - 10 \}$	$2J. 17_0 38$		$'t' 28^\circ 54' cf$	A	$25^\circ 22' \}$

The running planets on the day of the death of the father 15. June 1888 were:

3. 0	$24^\circ 44' \}$	$i;? 17_0 31 \}$	1)	$40 17$	\odot	$2^\circ 26'$
J)	$2^\circ 18' np$	$\text{O}' 15^\circ 23' :t'$		$0 13^\circ 08' :t'$	$d'+ 1j=$	$19^\circ 40'$
-	$18^\circ 48' \odot$	$2y. 28^\circ 37' 11''$		$'t' 004411$	$d'/1=$	$9050np$

Aspects of the current planets to 2:

$0 cf A, J) 0 r J', 06$, $i;? \square$, $\text{O}' cf 0$, $d' cf n,$, O^* $2!-, 2j. \square i;?; 2j. cf 't'$,

it $cf 0, n, cf J), n, \square Q,, 0 cf n,, 0 c: ? 0$, $'t' cf d''$, $'t' Li J), Q, \square Q,, cf 0, c: ? J)$.

For the earth horoscope the sums of both radix suns are $1^\circ 01' np$, $D 't' lfd., cf \odot$ rad. and the. Half of the sums, i.e. the cosmic position $\text{O/O}=\}_{5^\circ 31' 1''} \square X (2)$ and $c: ? ?$ lf. The lf. 8 was $c: ? - r,$ the lfd. $D A r. Uber den Pun kt d'' r. + 1j r. - 0 r. K. f. = 11^\circ 40' 3''$

went 8 (2) and the ☐ of the lfd. ; this point is in *cf* r.

One's own destiny from the planets-n of another person with one's own radix sun is determined as follows:

Radixplanets of the emperor Friedrich III,

4. 0	240 03 -"-	-	go 26 dt:	1j 11o 00 np	Q, 18° 16 bl,
J)	15° 18)-(o'	16° 56-"-_1	0 110 00 =	X 20° 49 np
	7° 51 dt:		21- 120 45 =	'P 22° 16 :0.	A 26°32 :1t

The radix sun of William II 6° 58 with the planets Friedrich III at

0° l; set:

5. 0	17o 05 np	10 28 np	1j	4° 02 i	Q.11°18©
J)	8°20=.	o' 9° 58 np	0	4° 02 i;	X 130 51 bl,
	o0 53	21- 5° 47 :0	'P	15° 18 l	A 19° 34

np

Aspects of the current planets as of 5:

0 Cij '.J), J) O , DA,)(0, D0, cf 'P, d* 'f, d"9_Q,, 0* 'f, 0 0 .Q,
 21-0 , 0 , 21-0 X r KW, n, on,, q, on,, 'P □ ' P □ , d' T rt, .6. A, d'Jn, o d'-

From the above aspects, it is clear that the Sun of another person's radix is enough to indicate that there is a draw by the current planets about the stance that is being created.

ASTROLOGISCHE RUNDSCHAU

The 'Astrologische Rundschau' is published monthly with at least 16 pages and contains, in addition to contributions from all astrological fields of research, also reports on the activities of astrological societies at home and abroad.

The subscription price for the year is Mk 14,- for Germany, Mk 2s,- for abroad, and is to be sent to the Theosophische Verlagshaus, Leipzig, Inselstrasse 29 eIn.

Please address all correspondence to the Verlag, enclosing postage.

The determination of the unknown time of birth.

. By *A. Witte*, Hamburg.

If the time of birth is unknown, various methods can be applied, of which the simple types are considered here.
should be drawn.

Of a birth on 11 October 1873 at Altona the time is not known, nor whether they took place in the afternoon or in the afternoon.

The particulars were as follows:

Father born 22 Mar 1834, died 16 Jun 1912.

Mother born 13; November 1832, died 17 Mar -1905.

First meeting with his present wife at the end of October 1902.

Engagement 5 April 1903, marriage 6 October 1903.

Enlisted Sept. 25, 1914, discharged due to illness Feb. 18, 1915. Drafted a second time Aug. 1, 1916, seriously ill Feb. 13, 1917, sent to hospital Feb. 16. 1917, to the replacement battalion

May 18, 1917, discharged Dec. 4, 1918.

First the 0-arcs of the events are determined and that from the noon position of the 0 ...at Greenwich. **Zero...** on the 11th Oct.

¹⁸⁷³
= 18° 14' o!;; death of mother = 31 years 5 months 6 days = 1 t Oct.

+ 31 days = 42. Oct. - 31 days = 11. Nov. 0-stand 19° 12' *m* + 26' fir 5 months and 6 days = 1 9°38' *m*. -

The difference of both sun positions is the 0 - arc from birth to death of the mother= 31°22' t Mtt.

Death of father 38 years 8 months 5 days = 0-progr. 26° 16' nt + 41' = 26°57' *m*, 0-Bg. therefore t Vt.= 38°.43', encounter 28°59', engagement 29°27', marriage 29°56', convocations 41°01' and 42853', dismissal 45016'.

The planetary positions at noon in Green I on the 11th Oct. 1873 were:

0	t8° 14' ε=	S! 16°09 np	lj 26°12' :0	Q, 16020' <i>tf</i>
Q)	27033-)	cf 28021' /'	0 .10003- bl,	: cf" 6 -
	29°37'.ε=	'j. 19°56'np	't' 27°25'1"	<i>*cf.</i>

Now consider the horoscope of the Earth's body for the day of the birth, the meridian is the plane @-:0, the Ascendant 00 ε=, the Descendant 0° 'T'. In the *tf* in the VIII. The 't' in the 'T' indicates relatives, acquaintances, marriages. 0 and in the ε= indicates drastic events for the person with other people, and '2J. in the np indicates love luck in closed societies and deaths of loved ones,

0 in the bl, indicates friends, *ci*" in the /' indicates the planet, which dominates the correspondence with neighbors and the correspondence, J) in the)(in the 6 D 0 and g i v e s information about the V... House.

The ruler of the earth body is *cf* at the lower "meridian, at :0 in conjunction with the J) at the @ point.

The -Q, in the L. to the @ points casts -on him the worst aspect.

The cardinal points give us in the distances from the planets in 0.:arc events with' foreign perso.ns or. general nature an.

Thus d'' and J) in $c:?$ at the meridian indicates war people, P , in L to the earth meridian death traps of strangers at the 0 arcs of $46^\circ 20'$ and $43^\circ 40'$. -

The planets which most strongly aspect the moon indicate the wife or mother.

Here c_f in cP J) would be relevant for the spouse and in the 6 with $29^\circ 37'$ c_{ll} : shows with this arc approximately the marriage. 0 and Q, are relevant for the war 1914-18.

The position of the planets forms at the moment of birth with the gravitational point 0 which remains the same throughout life and is always connected with the progressing Sun. - Thus the progressive Sun, as it advances the planets around the 8-arc, creates new planetary positions which, in aspects with the radix planets, set them in action and trigger them as the jaufende planets. The advanced planets can also be used as running planets with other planets.

Persons act. E.g. JJ vorg. cP 1j rad. like J) running cP or D 1j rad. of another person; or also show and n , the radix aspect of another person, so that one is always connected with other persons in the events through the advanced planets 11.

In the present chart the Moon must lie between midnight and midnight $20^\circ 36'$)(. to $3^\circ 30'$ ©.

The .Q in the 'c5 shows death trap, therefore P , rad. $16^\circ 20'$ 'c5 $\dagger 8^\circ 43'$ = $25^\circ 03'$)(. as advanced p ., probably in d with the radix moon at the death of the father.

The first position of the P , of $17^\circ 42'$)(. at the death of the mother does not reach the required lunar position, but it is in \square to lh and in the XII. Earth house.

The position of the radix moon must first be searched to get aa by approximating the birth time.

The Moon is in application with the "d", so events with female persons occur when it enters into conjunction with the 1j and the 't', since 't' is the complementary planet of the "d", because c_f emits reddish-yellow and 't' grinish-blue as radiation; furthermore, "d" and 1j are the complementary planets of the "d".
-death or disease.

There must be aspects of the moon with the 1j and the f effective at the time of the mother's death.

The advanced d" in d 1j rad. with the untraveled 0 arc of 28° indicates disease of a female, advanced \square 't' is then indicate the passing of a female who was a close relative because 't' in VII Earth House.

Therefore D 't' rad. $27^\circ 25'$ ® - 0-arc t mother = $26^\circ 03'$)(. }J) rad The advanced .Q at the death of the father = $250\ 031$)(. --

Both positions thus approximate the radix moon. In the earth horoscope, c_f and Q in Cf ! are in strong relation to each other in the earth meridian, and both are important for connections with other persons, P for the family and d for neighbours and relatives. The "t" is therefore the destroyer of these connections.

't' lfd. t father $22^\circ 26'$ ®, p lfd. $18015'$ 1' both D 0 rad. and cP 0 r.

't' Ud. t nut $5^\circ 22'$ ®, p , lfd. go $28'$ lIP.

It is now 0 +J) friendship, marriage or parenting.

0 **ts0** 15' 3/4+ ::)) medium 25°33')(= 13°48' **Z**.

J) current **t** father 12°® , 0 current engagement- 14°32"T', 0 running high

time 12° 3' 3/4 . J) current wedding, 10° 24' 'T', current meeting
t 9° 11' 3/4 cf 0 rad., [6 lf. engagement t 6° 10'--"-.

And it is 0-J), husband of the wife= 22°42' ® cf 't lf. **t** father.

J) fd. 20' ® Engagement, fm 23044' 3/4 and 'h fm 21° 56' **Z**
engagement.

Further, :J)-0 wife of husband. 7° 18')(cP 2l- lfd. 8°39' / t father, [6 lfd. 8°281 np t mother, :)) lfd. 8°04 np meeting, 2l- lfd. 10° 19' >-< engagement, and 2l- lfd 8° - = meeting, d' running 90 45' ./
Wedding.

The point 5° 22' ® 't' lfd. at the death of the mother is approximately the mirror point to the radix moon.

The progressed 't' meeting 3° 37' ® included with the radix moon the meridian of the earth, so that the mirror point of the progressed 't' at 26°23')(would coincide with the :J) rad.

The running 't' of the engagement 1° 04' ® is the mirror point of the d'' rad. Through both the Ascendant of the Earth, the 3/4 point is clasped.

In the earth chart the *PO* indicates death traps, the 0 friends, both were decisive for the 0 arcs during the war. J) cP d'' on the meridian of the earth means war people and the d'' in front combined with the 0 rad. indicates bloody injuries of friends by the war people of the earth.

d'' rad.+ 41°01' and +45016' = 9°22' to 13°37' = in cP 0 rad. 10°03' 6/, during the war years.

Since now the J) cP d'' stands, so miiBte the advanced moon in cf with the 0 rad. give an event.

Discharged from hospital 0 arc 13°41' to .Replacement Battalion and with the Militar. until end of war 45° 16'.

So 0 rad. - 43°41' and - 450 I 6' = 26° 22')(and 24° 47')(.

Both positions confirm the first found moon positions 26°03')(and 25° 03')(.

For the I. position 25° 03')(the time in Greenwich is now determined.

Noon 10. Oct. J) = 14°20')(J) = 14°20')(

" I 1. Oct. :J) = 27033, l(::)) = 25° 03')(

Difference 13° 13' In 24 hr. as to 043' in x hr.

in

Altona2

Ohosm and fiir the 2nd moon position, 30' each fiir 1 hr = 22h tom

These hours and minutes converted into degrees and added to the 0 rad. shows as a sum approximately the birth meridian.

302030- + 18° 14' 3/4 = 20°44' 6/, to 21°00- np_

The ascendant to both is $6^{\circ}00'$.nt to $26000'$ III..

The ascendant is the intersection of the¹ earth's orbit with the horizon, but the horizon is the circle which has the place of birth as its pole and therefore has an arc distance of 90° from the place everywhere. Seiri Mun danaspect is the D to the zenith or the place of birth. The ascendant is therefore the worst point of the ecliptic for the born, it is therefore not the basis of the destiny but of the destiny, and the lord of the sign in which the ascendant lies is not the ruler of the horoscope but the planet which causes the greatest misfortune to the born. The ruler is always the planet which is on the meridian of birth.

The Ascendant and Descendant resemble the .Q., ?J, the ∴; urld the 'T' dot, they indicate connections and separations.

Now consider the progressive Suns to see if they touch the Ascendant. At the death of the mother 0 was progressive 19°38' nt, it included the :!k point with the mirror point of 0 I 9° 57' nt and it cannot therefore be considered for the ascendant, because the & point is already the ascendant of the earth and **has been** elicited.

The progr:- 0 at the death of the father 26°57' nt may be sc;hon with the Ascendants coincide to indicate the event.

- If now the *cl* and the :J) filr female are ma6gebend associated with the ascendant, we find the 0- arc at the death of the mother as Asc. prog. *cf* <3' rad. and Desc. prog. *cf* J) rad. denoting betrothal or Mtt.

d" rad. 28° 21' -t - 31° 22' **t** Mtt. = 26° 59' nt; both events give so the same ascendant with 26° 58' nt and the descendant - around the 0-bg. 29° 56' of the marriage prog. gives the moon position 26° 54')(_

This ascendant found gives fiir Altona the right ascension of the meridian of I I h 33m. The natal had ,at noon I 3h 20m sid. Time.

1h 33m I 3h 20m = 22h 13m, in Altona, birth time

Oestliche Lange - Oh40m fiir Altona

Time of birth = 21h 33m in Greenwich.

With this time the planetary positions r d. are calculated and then the 0-arcs with the correct positions are added or subtracted.

* * *

Another method of determining the unknown birth time is the return of the lunar aspects of the radix position by the progressive moon with the progressed planets.

The earth chart is ruled by the d' on the Lower Meridian :0 and <lurch the 'JJ on the Upper Meridian®-.

The opposition of J) and d' took place again between November 9 and 10, 1873.

The time of this constellation fir Altona is determined; it is the time fir Altona a certain meridian and it is this meridian a certain day of a year, if a day after birth or a rotation of the - place around the earth axis is counted as a year.

Furthermore, the position of the progressive Sun should be noted for the time of the constellations, so that the order of the lunar aspects can be better seen.

J) on 9 Nov 18° 27' ®, d' = 19° 39' :0. difference)) u. cJ' = 1° 12'

Q) on Nov. 10, 1° 01' g., cJ' = 20° 24' :0. the time is t.

$$t = \frac{1203 - 20}{2} = 0.102 \text{ days} = \frac{d.X}{102} = 1,44'X 102 = 2h 27m \text{ in Greenwich. } \underline{0}$$

Ji position l 9° 44' ®, d' 19° 44' :0, 017° 18' nt, 2h 27m Greenwich + Oh, 4om = 3h 07m in Altona.

This 3h 07m converted into degrees and added to the sun gives approximately the meridian and the day for Altona.

17° nt 47° = 4° :0 and Ascendant 11° 'T'.

Since the place of birth makes a rotation around the earth's axis in one day after birth, the place must lie in this meridian when the event is Hillig.

The *c'* indicates the woman who is to become a spouse, so this meridian must be in the time from the meeting to the engagement.

The days from the birth day to the event day are increased by the progressive days and subtracted from the meridian found, or the 0 arc of the event is added to the difference of the 0 rad. and the 0 !!d. and subtracted from the progressive meridian to get the X. house rad. House rad.

On the day of the first encounter, 't' lfd. in the lower meridian was 3° 37' @ and lfd. 19° 11' :!b □ to the cP of cJ' and :J) progressive. Thus r:?' and 't' rad. have been decisive for the event.

On the day of the engagement, J) lfd. 20 @ stood in d' with :J) progr. and <3' running in D with the found meridian 4°-40- .

So the engagement confirms the progressive cP of J) and cJ' in Altona.

On the day of the wedding, J) was standing at 10° 24'T' to 20° 'T', running. 6° 07' :!b1 't' in progress 5° 57' @; fd. D 't' fd. confirms the radix aspect 't' r:?' and J) lfd. the cP of :J) and cJ' progressive; fallig in Altona by 't'. and -

The* J) rad, with 't' rad, formed by the progr. planets, falls between the 7th and 8th of November 1873, so it was falling in the year 1901.

The 6 J) rad. with r ,ad., formed by the progressive planets again, J) 11° 45' 61.6 11° 451.8 progr. 19° 05' nt, meridian progr. 14° :!b, falls between the 10th and 11th of November, 1873, the period of the first year of marriage.

The running 0 of the engagement 14° 32' 'T' and that of the wedding 12° 03' :!b confirm the progressive meridian for Altona and the aspect J) 6 , furthermore the 0 lfd. 16° 10' :!b engagement in the Meridian and the J) Ud. 10° 24' 'T' wedding in 00 lfd. engagement, in D to the meridian and :in 6 to J) and progr.

It stood the lid. -'2l- 10° 19') { D progr. on the engagement day, the iJ' lfd. 9° 45' 'l' d' progr. at the wedding, □ the '2l- of the engagement and □ the J) of the meeting.

The progressive ascendants of the progr. meridians 4° and 14° :a, were 11° 'T' and 11° 'l', which <lurch 0, '2l- engagement, J), cJ' marriage, and J) Meeting became active.

Indicated were these planets <by the zodiacal directions of 0, '2l-, Q, and !il.

An upper view of the progressive aspects with the meridian and the ascendant in order of time shows the following positions.

However, it does provide very interesting and revealing information, also about the horoscopes of the other persons involved.

But if you only want to use the profection arc, calculate 30° for each year, $2^\circ 40'$ for each month and $5'$ for each day, then subtract $52'$ for each year and $1'$ for each week. The result is the correct chart with which all the **radix** planets can be directed.

from Astrologische Rundschau, February/March 1922, issue 5/6

Zurn chapter

>The Determination of the Unknown Time of Birth."

In the first double issue of the current volume of the "Astrologische Rundschau" there is an article on page 9 to 17 entitled "Die Bestimmung -der unbekanntes Geburtszeit" (The determination of the unknown time of birth) by. A. Witte. - This subject is of great value to every astrologer, especially where an exact birth time cannot be obtained, but a horoscope calculation seems necessary in the interest of research and science. Therefore

many readers will have greeted the cited article with joy in the only too understandable hope that they now have a guide to a new type of calculation. Without acknowledging the merits of the author in

<Without wishing to denigrate his work, I must nevertheless say that the article, in the sense of a guide, is quite disappointing. Every independently working researcher goes his own way - and no one can, will, or wants to prevent him from doing so. But if he wants to present new unknown ways to a circle of readers, the use of which seems self-evident, he may not measure the sentences in a pidaric way. If the quoted article fulfills a purpose and

If the text is to be of practical use, it should be written in a much more detailed and comprehensible manner, even at the risk of increasing its length. Some readers will wonder whether the choppy, erratic, often incomprehensible or ambiguous sentences imply a new expressionist style. Here is just one example of many.

Page 15, paragraph 8: "The *-J) rad. with 'r rad. formed by the progressive planets, falls between November 7 and 8, 1873." What does this sentence soil or want to say?

Progressive planets.

A radix sextile formed by **de11**. progressive

What are the progressive planets?

progressive planets? Can progressive planets form a radix aspect at all?

-This sentence is a

nonsenseltmay have validity fi.ir the author

on<lessen

notepaper, but not flir

others.

Thisentence is _in reality: "The recurrence of the* of J) rad. with 't' rad., <lrough the **pre-**

- ri.ickenden course of these two celestial bodies formed, falls between the November 7 and 8, 1873." If one has to interpret each sentence in this way, it is a laborious task, not to everyone's taste and not successful for everyone, especially if one has no overview of the whole article because of the inadequate structure of the individual sections. It would have been much more useful if the individual events had been treated separately, in sections. -

The author literally says: "Now consider the horoscope of the earth's body for the day of birth, ...". "Apart from the strange expressions, which are ambiguous in their meaning, one wonders **how** this can be done, since a horoscope has not yet been drawn up or designated (the time of birth is to be found first).

But the author does not give us time to think and continues: "the meridian is the plane @-Z, the ascendant OO & the descendant 0° T. " Where does the author get these numbers? - Surely, he obtained them by calculation," I heard a voice. He had

a. her be able to tell for what time this calculation was made. But I flatter myself to understand something of astrology through the twelve years of my studies, and I quickly make the horoscope figure for the day of birth: 12 o'clock noon, October 11, 1873, at Altona. What do I claim as a result?

Ascendant: 16° 40' .t, 2nd house: 27oz, 3rd house: 16°) {, 10th house: 210&, 11th house: 14°nt, 12th house: 2° .t. - Perhaps Mr. Witte will enlighten me as to how he calculated.

Since I found two calculation errors on the other side, it seems to me that the whole **article has been** worked through quite inadequately. .

I must also describe the following as peculiar. The author, Mr. Witte, without any introduction or preparation, overturns old familiar astrological doctrines and rules, and, with a self-understanding that baffles, puts his own down, for: nts words and sentences that are

have been heard nowhere and remain mysterious in their meaning-. What should then these designations: Horoscope of the earth body" - "Ruler of the earth body (!)" - "Earth horoscope" - "Earth meridian" - "War people of the earth - House of the earth". - The author seems to be very fond of *the* earth, probably because he is a - son of the earth.

Directly incomprehensible remain the designations, which the astrological practice did not know so far: "IX. House of the birth meridian, XII. House of the Earth,- X. House of the Ascendant, VII House of the Ascendant, VII House of the Meridian." - If the author spoke only of the houses of the earth, one might think that he had chosen a somewhat inappropriate name for "horoscope" or "celestial" houses. But this is not so, for he makes a distinction between houses of the earth, of the (birth) meridian and of the ascendant. And to all these not a word of explanation! .

Then it goes on to say on page 14: "The Earth horoscope is dominated by the d' on the lower meridian Z and by the J) on the upper meridian@." Since when is d" the lord of :C,? To Mr. Witte this is a matter of course which needs no comment. -

Page 12: -The Ascendant is therefore for the born the worst (1) point of the ecliptic, it is therefore not the basis of destiny, but of fate, and the lord of the sign in which the Ascendant lies is not (!!) the ruler of the horoscope, but he is the planet which causes the greatest misfortune to the born (!). The ruler is always the planet which is on the meridian of birth. find." -

So there you have it. The natal lord is clearly the lord of the 10th house, and not of the ascendant. Commentary, therefore, is superfluous, for Mr. Witte says so. -
