

Glove Box Door and Exterior Door Lock Cover Instructions

Glove Box Door Latch Cover

1. Remove original Glove Box Door Latch Cover by removing both screws on the back of the Glove Box.
2. Place new Billet Glove Box Door Latch into position with the Lock Cylinder positioned in the center of it and then tighten screws.
3. Test the opening and closing of the Glove Box door and adjust if necessary to insure the Glove box opens and closes smoothly.

Exterior Door Lock Cover

1. If placing the Door Lock Cover while it is the vehicle then apply an easily removal tape around the existing Door Lock as shown.
2. Clean the existing Door Lock with a cleaner (ie. isopropyl Alcohol) being careful not to get it onto the vehicle.
3. Place 3 drops of the supplied Super Glue Gel onto the Door Lock at the positions indicated.
4. There should not be any Super Glue leaching out from behind the Door Lock Cover but if there is wipe it away with Acetone or nail polish remover.
5. Wait 30 minutes then remove the tape. Full adhesion/glue set up will occur overnight.
