**** WARNING** – Before powering up system all wires should be inspected to confirm no bare wires are exposed. Disruptive Restomods LLC does not cover any claims to damage

1. Determine location and orientation for installation. The mount is designed so it can be installed in many areas. These instructions will review a common installation, orientation and set-up in an Early Bronco with Vintage Air but can easily be placed under any dash.

2. Place USB plugs into the USB Mount.

3. Fasten the USB Mount to the desired location using the provided (2) #10 self-tapping screws. ***Check that there are no wires or obstructions on the other side of the object you are drilling into before you drill.**
