I would like to give a shout out to [Cylinder-Pro](#) for helping to fix my 2008 Chevy Trailblazer oil burning issue. She went from burning at least 1 litre every 2500km, to not having to worry about topping up my oil levels in between oil changes. It has been over 3 years without having to top up the oil.

Thanks for the piece of mind! It worked great and even restored some power as well.
