

OWNER'S GUIDE

 **SEAKEEPER**

WELCOME TO THE **SEAKEEPER** **FAMILY**

Congratulations on your new Seakeeper! Say good-bye to boat roll, and hello to comfort. Now you can enjoy each and every day on the water, making everlasting memories with your friends and family. So, cheers to a new start, a new outlook on boating, and a truly changed experience on the water.

In these pages you will find the basic operation and maintenance suggestions for caring for your new Seakeeper. Keep this book handy, as it also contains valuable information about your Seakeeper and how to contact us anytime you might need us. We're here for you – you're a part of our family and we're so happy to have you.

Andrew Semprevivo
President & CEO

Seakeeper Operation

Start-up

Turn on the power to the Seakeeper. The Display will initialize and the Home screen will appear.

Seakeeper On

To turn the Seakeeper on, press the Power On/Off Button. The button will turn blue.

Power On/Off Button

Spool Up

The Progress Bar will appear in the bottom right and will indicate when the Seakeeper is available for stabilization.

Progress Bar

Ready to Stabilize

When the Seakeeper reaches its minimum operating speed, the Stabilize Button will appear. At this point, the Seakeeper is available for stabilization.

Stabilize Button

Maximum Stabilization

When the Seakeeper reaches its maximum operating speed where maximum stabilization is available, the Progress Bar will disappear and the Seakeeper is available for maximum stabilization.

Stabilization & Information

For stabilization at sea or at anchor after the Seakeeper is above the minimum operating speed:

Initiate Stabilization

Press the Stabilize Button. The button will turn blue indicating that the Seakeeper is stabilizing the roll motion.

Information Screen

Press the Menu Button, then the Information Button (i), to access the Seakeeper model, serial number, run hours, sea hours, and more.

Information Button

Shut Down

Turn off the Seakeeper

Press the Power On/Off Button. The button will turn gray. It may take between 2-8 hours for the flywheel to come to a complete stop. Please refer to the manual for your particular Seakeeper model.

Shut Down Process

When the flywheel has come to a complete stop, zero (0) RPM will appear on the service screen indicating that the flywheel has stopped.

KEEPING YOU ON THE WATER

MAINTENANCE MAKES THE MAGIC HAPPEN

All equipment needs a little regular care to keep it working in tip-top shape - even the magical kind like Seakeeper! Here's what we recommend keeping up with:

Brake System	Task	Running Hours	Period
Hydraulic Manifold Components & Fittings	Inspect	1000	Annually
Hydraulic Cylinders & Hoses	Inspect	1000	Annually
Hydraulic Accumulators	Replace	2000/As Needed	----
Hydraulic Oil	Flush & Bleed	1000	Annually
Brake Bushings	Inspect	1000	Annually
Brake Bushings	Replace	2000/As Needed	----
Seakeeper 1 Mechanical/Safety Latch Assembly	Inspect	1000	Annually
Seakeeper 1 Mechanical/Safety Latch Assembly	Replace	2000/As Needed	----
Cooling System			
Zinc Anode *N/A for Seakeeper 1, 2, 3	Inspect/Replace	150/As Needed	3 Months
Heat Exchanger	Inspect	1000	Annually
Heat Exchanger	Replace	2000/As Needed	----
Coolant Level - Glycol	Inspect/Fill	1000	Annually
Clean/Descale Heat Exchanger	Inspect/Clean	1000	Annually
Check Seawater Flow	Inspect	1000	Annually
Cooling Hoses	Inspect	1000	Annually
Cooling System Flush - Glycol	Inspect/Replace	1000	Annually
Electronics System			
Inspection of all electrical connections, cables, and components	Inspect	----	Annually
Mechanical & Foundational System			
Inspect all mounting hardware/bolts	Inspect	----	Annually
Inspect isolation bushings, pins, and clips	Inspect	----	Annually
Clevis assemblies (4), hardware, isolation bushings, pins & clips	Inspect	1000	Annually

Perform the Recommended Maintenance after the indicated number of Running [RUN] hours or MONTHS / YEARS since last maintenance, whichever occurs first. Seakeepers are designed for use in a marine environment and to withstand occasional water spray or splash. Prolonged exposure to seawater however can cause premature wear and damage to the unit, therefore it is important to apply a gentle fresh water rinse following exposure to seawater.

Recommended Maintenance should be performed by a certified Seakeeper Dealer or Seakeeper factory technician. Find a local Dealer at www.seakeeper.com/find-us

REGISTER YOUR SEAKEEPER FOR GREATER REWARDS

The first step to taking full advantage of any of our fabulous after-sales programs is registering your Seakeeper!

Register your Seakeeper at seakeeper.com/register
