maintenance expertise**

SPRAYING STRENGTH INTO STRUCTURES FOR 40 YEARS

OUR EXPERIENCE

With over 40 years of industry experience, Maguire Shotcrete Group has delivered trusted shotcrete solutions on projects across Australia building a strong reputation for quality workmanship, reliability and proven results. Our experienced team works across a wide range of projects, from residential and civil works to large-scale commercial developments, providing tailored shotcrete applications to suit each project's requirements.

Backed by skilled operators and a modern, well-maintained fleet, we focus on safe, efficient delivery and consistently high standards on every job. Our practical approach, technical knowledge and commitment to service allow us to support clients with dependable solutions that perform over the long term.

CORE VALUES

We get things done, together

Safety is our priority

We do what we say we are going to do

We work smarter

SERVICES

Maguire Shotcrete Group delivers reliable, high-quality shotcrete solutions for civil, commercial, and infrastructure projects, combining expert craftsmanship with proven industry experience.

KEY PERSONNEL

CLARK BRIGGS

B Eng (Civil) (Hons), MBA (Hons), M Const Law (Melb), OPM (Harvard) JD (2026)

Commercial Manager

Clark is a senior commercial leader, Executive Director and Non-Executive Director with over 20 years' experience shaping and delivering major construction and infrastructure projects across Australia. With qualifications in engineering, law and business, he brings a rare combination of technical insight and commercial capability that supports high-performance project delivery and strong business outcomes.

He has led national teams supporting contractors, delivery partners and asset owners on complex projects in challenging operational, geographic and stakeholder environments. Clark's experience spans early-phase project shaping, procurement strategy, commercial management, risk and opportunity planning, partner alignment, delivery optimisation and performance improvement. He is recognised for helping organisations execute large-scale programs with clarity, discipline and commercial confidence.

DANIEL MAGUIRE

Operations Manager

Daniel is a highly experienced civil and shotcrete specialist with over 20 years of hands-on industry experience across infrastructure, construction, and multi-disciplinary projects. He brings end-to-end project knowledge, from early works and planning through to delivery and operations management.

With a strong background in plant operations, concreting, and ACI-certified shotcrete application, Daniel combines technical expertise with practical, solution-focused execution. His leadership experience includes successfully scaling and managing multiple crews across complex projects, as well as expanding operations into complementary services such as steel fixing.

Daniel is known for his strong work ethic, mechanical knowledge, and ability to deliver efficient, high-quality outcomes in demanding environments.

MONTE IVANCEVIC

B Eng (Civil) (Hons)

Construction Manager

Monte brings over 20 years of industry experience, developed through his involvement in a diverse range of projects and environments, both locally and internationally. His portfolio spans major infrastructure works across road and rail, as well as complex, multi-disciplinary building projects.

He has contributed to all phases of project delivery, including project development, front-end tendering, procurement and evaluation, design management, and the management of construction activities and teams—consistently ensuring performance meets or exceeds expectations.

With experience across all levels of project delivery, from Site Engineer through to Operations Manager, Monte offers practical and pragmatic solutions to project challenges.

LEVEL CROSSING REMOVAL CASE STUDY

MITCHAM CROSSING REMOVAL

The Mitcham level crossing was removed in 2017 by lowering the rail line under the road. This project was part of the Victorian Government's initiative to remove dangerous level crossings across Melbourne, aiming to improve safety and reduce traffic congestion.

BURKE ROAD CROSSING REMOVAL

The Burke Road level crossing removal is part of the Level Crossing Removal Project in Melbourne. The project includes lowering the rail line under Burke Road, which significantly reduces congestion and enhances safety for both road and rail users.

BIG BUILD CASE STUDY

METROTUNNEL

The Metro Tunnel project in Melbourne utilizes shotcrete for various tunneling applications, including ground support solutions for complex underground works. Maguire Shotcrete Group provides industry-leading ground support solutions, including shotcreting, reinforcements, and steel fixing, to ensure structural stability and worker safety.

SYDNEY TO EDGARS ROAD

Maguire Shotcrete Group played a crucial role in the Sydney to Edgars Road upgrade by providing slope stabilization and structural support. It was used to stabilize cuttings and prevent erosion, ensuring the road's integrity and safety. The use of shotcrete was part of a broader effort to enhance the road's durability and performance, contributing to the project's success and sustainability goals.

BUILDING CASE STUDY

COLLINS ST ARCH

Maguire Shotcrete Group delivered shotcrete works for the basement construction at Collins Arch. Working within a complex inner-city site, our team applied shotcrete to support the excavation and basement walls, ensuring structural stability and safe project delivery.

MELBOURNE GRAMMAR

Maguire Shotcrete Group delivered shotcrete works for basement construction at Melbourne Grammar School. Our team applied shotcrete to support excavation and structural basement walls, ensuring stability and safe delivery within an active construction environment.
