

CUSTOMER SHIPPING INSTRUCTIONS

Make sure firearm is unloaded!!!

- Remove any accessories such as scopes, bipods, lights, bayonets, and safety locks.
- Remove barrel(s) from pivot guns (e.g., double barrel shotguns, HR Topper sled rifles etc.) to reduce package size.
- Wrap individual components with bubble wrap securing it well with tape. Pay particular attention to muzzle and breech ends of barrels, magazine tubes receiver and butt.
- Package firearm in a hard case. This is especially important for long guns, such as flintlock or percussion rifles/fowlers, military muskets, and military firearms. It is also best to use hard cases for handguns.
- If you don't have a hard case, purchase or repurpose a sturdy box to contain the components.
- Include a completed copy of the ***Gunsmith Service Order*** in the hard case. **This is mandatory!** Please **Contact Me** to obtain the form if you have not already done so.
- If this is an NFA registered firearm (e.g., short-barreled shotgun/rifle, automatic rifle, etc.) include a copy of the NFA documentation with the Gunsmith Repair Order.
- Pad inside of case/box extensively to prevent movement of components. use bubble wrap, newspaper, foam materials (styrofoam peanuts really don't work that well...but if that's all you have, pack it in tight).
- A thorough wrapping with stretch packing film over the latches of the hard case and length and width of cardboard box helps secure things well.
- Use an exterior cardboard box to contain the hard case or primary cardboard box. Interior box or case should not be free to move in this exterior container.
- Tape all seams and ends with packing tape.
- It is best not to have any markings on the outer packaging that it contains firearms.
- Always use package tracking and signature upon delivery.
- Always insure your package.
- **Email me the tracking number once the package is shipped.**

NOTE: If the packaging appears damaged upon receipt, I will not accept delivery. I am not responsible for damages received during shipping. I will take photos and provide them to you immediately.
