⁽¹⁾ For greater certainty, processing of nuclear materials includes all the activities contained in UN ISIC Rev. 3.1 code 2330.

⁽²⁾ Without prejudice to the scope of activities which may be considered as cabotage under the relevant national legislation, national maritime cabotage under this chapter covers transportation of passengers or goods between a port or point located in the Republic of Armenia or a Member State and another port or point located in the Republic of Armenia or Member State, including on its continental shelf, as provided in the UN Convention on the Law of the Sea, and traffic originating and terminating in the same port or point located in the Republic of Armenia or Member State.

⁽³⁾ The conditions of mutual market access in air transport will be dealt with by the future agreement between the Parties on the establishment of a Common Aviation Area.

⁽⁴⁾ This obligation does not extend to the investment protection provisions not covered by this Section including provisions relating to investor state dispute settlement procedures, as found in other agreements.

2. Subject to reservations listed in Annex VIII-A, the European Union shall grant, upon entry into force of this Agreement:

- (a) as regards the establishment of subsidiaries, branches and representative offices by natural or juridical persons of the Republic of Armenia, treatment no less favourable than that accorded by the European Union to its own juridical persons, branches and representative offices or to any third-country juridical persons, branches and representative offices, whichever is the better; and
- (b) as regards the operation of subsidiaries, branches and representative offices by natural or juridical persons of the Republic of Armenia in the European Union, once established, treatment no less favourable than that accorded to their own juridical persons, branches and representative offices; or to any juridical persons, branches and representative offices of any third-country juridical persons, whichever is the better ⁽¹⁾.

3. Subject to reservations listed in Annexes VIII-A and VIII-E, the Parties shall not adopt any new measures which introduce discrimination as regards the establishment on their territory of juridical persons of the other Party or in respect of the operation of such juridical persons, once established, by comparison with their own juridical persons.

Article 145

Review

With a view to progressively liberalising the establishment conditions, the Partnership Committee, when meeting in trade configuration, shall regularly review the legal framework ⁽²⁾ and the environment for establishment.

Article 146

Other agreements

Nothing in this Chapter shall be construed as to limiting the rights of investors of the Parties to benefit from more favourable treatment provided for in any existing or future international agreement relating to investment to which a Member State and the Republic of Armenia are parties.

Article 147

Standard of treatment for branches and representative offices

1. The provisions of Article 144 do not preclude a Party from applying particular measures concerning the establishment and operation in its territory of branches and representative offices of juridical persons of the other Party not incorporated in the territory of the former Party if those measures are justified by legal or technical differences between such branches and representative offices as compared to branches and representative offices of juridical persons incorporated in the territory of the former Party or, as regards financial services, for prudential reasons.
2. The difference in treatment shall not go beyond what is strictly necessary as a result of such legal or technical differences or, as regards financial services, for prudential reasons.

⁽¹⁾ This obligation does not extend to the investment protection provisions not covered by this Section including provisions relating to investor state dispute settlement procedures, as found in other agreements.

⁽²⁾ This includes this Chapter and Annexes VIII-A and VIII-E.

Section C
Cross-border supply of services

Article 148

Scope

This Section applies to measures of the Parties affecting the cross border supply of services for all services sectors with the exception of:

- (a) audiovisual services;
- (b) national maritime cabotage ⁽¹⁾; and
- (c) domestic and international air transport services ⁽²⁾, whether scheduled or non-scheduled, and services directly related to the exercise of traffic rights other than:
 - (i) aircraft repair and maintenance services during which an aircraft is withdrawn from service;
 - (ii) the selling and marketing of air transport services;
 - (iii) computer reservation system ("CRS") services;
 - (iv) ground handling services; and
 - (v) airport operation services.

Article 149

Market access

1. With respect to market access through the cross-border supply of services, each Party shall accord services and service suppliers of the other Party treatment not less favourable than that provided for in the specific commitments contained in Annexes VIII-B and VIII-F.
2. In sectors where market access commitments are undertaken, each Party shall not adopt or maintain, either on the basis of a regional subdivision or on the basis of its entire territory, unless otherwise specified in Annexes VIII-B and VIII-F, the following measures:
 - (a) limitations on the number of services suppliers, whether in the form of numerical quotas, monopolies, exclusive service suppliers or the requirements of an economic needs test;
 - (b) limitations on the total value of service transactions or assets in the form of numerical quotas or the requirement of an economic needs test; or
 - (c) limitations on the total number of service operations or on the total quantity of service output expressed in terms of designated numerical units in the form of quotas or the requirement of an economic needs test.

Article 150

National treatment

1. In the sectors for which market access commitments are inscribed in Annexes VIII-B and VIII-F, and subject to any conditions and qualifications set out therein, each Party shall grant to services and service suppliers of the other Party, in respect of all measures affecting the cross-border supply of services, treatment no less favourable than that it accorded to its own like services and service suppliers.

⁽¹⁾ Without prejudice to the scope of activities which may be considered as cabotage under the relevant national legislation, national maritime cabotage under this chapter covers transportation of passengers or goods between a port or point located in the Republic of Armenia or a Member State and another port or point located in the Republic of Armenia or Member State, including on its continental shelf, as provided in the UN Convention on the Law of the Sea and traffic originating and terminating in the same port or point located in the Republic of Armenia or Member State.

⁽²⁾ The conditions of mutual market access in air transport will be dealt with by the future agreement between the Parties on the establishment of a Common Aviation Area.

2. A Party may meet the requirement of paragraph 1 by according to services and service suppliers of the other Party treatment that is either formally identical or formally different from that accorded to its own like services and service suppliers.
3. Formally identical or formally different treatment shall be considered to be less favourable if it modifies the conditions of competition in favour of services or service suppliers of the Party compared to like services or service suppliers of the other Party.
4. Specific commitments assumed under this Article shall not be construed as requiring any Party to compensate for inherent competitive disadvantages which result from the foreign character of the relevant services or service suppliers.

Article 151

Lists of commitments

1. The sectors liberalised by each of the Parties pursuant to this Chapter and, by means of reservations, the market access and national treatment limitations applicable to services and service suppliers of the other Party in those sectors are set out in the lists of commitments included in Annexes VIII-B and VIII-F.
2. Without prejudice to rights and obligations of the Parties as they exist or could arise under the European Convention on Transfrontier Television of 1989 and the European Convention on Cinematographic Co-Production of 1992, the lists of commitments in Annexes VIII-B and VIII-F do not include commitments on audiovisual services.

Article 152

Review

With a view to progressively liberalising the cross-border supply of services between the Parties, the Partnership Committee, meeting in trade configuration, shall regularly review the list of commitments referred to in Articles 149 to 151. That review shall take into account, *inter alia*, the process of gradual approximation, referred to in Articles 169, 180 and 192, and its impact on the elimination of remaining obstacles to the cross-border supply of services between the Parties.

1. This Section applies to measures by the Parties relating to licensing requirements and procedures, qualification requirements and procedures that affect:

- (a) the cross-border supply of services;

- (b) the establishment in their territory of natural and juridical persons of a Party; and
- (c) the temporary stay in their territory of categories of natural persons referred to in Article 153.

2. In the case of cross-border supply of services, this Section applies only to sectors for which a Party has undertaken specific commitments and to the extent that those specific commitments apply. In the case of establishment, this Section does not apply to sectors to the extent that a reservation is listed in Annexes VIII-A and VIII-E. In the case of temporary stay of natural persons, this Section does not apply to sectors to the extent that a reservation is listed in Annexes VIII-C, VIII-D and VIII-G.

3. This Section does not apply to measures to the extent that they constitute limitations subject to scheduling.

4. For the purpose of this Section:

Article 159

Conditions for licencing and qualification

1. Each Party shall ensure that measures relating to licensing requirements and procedures, as well as qualification requirements and procedures are based on criteria which preclude the competent authorities from exercising their power of assessment in an arbitrary manner.

2. The criteria referred to in paragraph 1 shall be:

- (a) proportionate to a public-policy objective;
- (b) clear and unambiguous;
- (c) objective;
- (d) pre-established;
- (e) made public in advance; and
- (f) transparent and accessible.

3. An authorisation or a licence shall be granted as soon as it is established, in the light of an appropriate examination, that the conditions for obtaining an authorisation or licence have been met.

4. Each Party shall maintain or institute judicial, arbitral or administrative tribunals or procedures which provide, at the request of an affected entrepreneur or service supplier, for a prompt review of, and where justified, appropriate remedies for, administrative decisions affecting establishment, cross-border supply of services or temporary presence of natural persons for business purposes. Where such procedures are not independent of the agency entrusted with the administrative decision concerned, each Party shall ensure that the procedures actually provide for an objective and impartial review.

5. Where the number of licences available for a given activity is limited because of the scarcity of available natural resources or technical capacity, each Party shall apply a selection procedure to potential candidates which provides full guarantees of impartiality and transparency, including, in particular, adequate publicity about the launch, conduct and completion of the procedure.

6. Subject to the requirements specified in this Article, each Party may take into account legitimate public-policy objectives when establishing the rules for a selection procedure, including considerations of health, safety, the protection of the environment and the preservation of cultural heritage.

Article 160

Licencing and qualification procedures

1. Licencing and qualification procedures and formalities shall be clear, made public in advance and be such as to provide the applicants with a guarantee that their application will be dealt with objectively and impartially.

2. Licencing and qualification procedures and formalities shall be as simple as possible and shall not unduly complicate or delay the provision of the service. Any licencing fees ⁽¹⁾ which the applicants may incur from their application shall be reasonable and proportionate to the cost of the authorisation procedures in question.

3. Each Party shall ensure that the procedures used by and the decisions of the competent authority in the licencing or authorisation process are impartial with respect to all applicants. The competent authority shall reach its decision in an independent manner and not be accountable to any supplier of the services for which the licence or authorisation is required.

4. Where specific time periods for applications exist, an applicant shall be allowed a reasonable period for the submission of an application. The competent authority shall initiate the processing of an application without undue delay. Where possible, applications shall be accepted in electronic format under the same conditions of authenticity as paper submissions.

5. Each Party shall ensure that the processing of an application, including reaching a final decision, is completed within a reasonable timeframe from the submission of a complete application. Each Party shall endeavour to establish the normal timeframe for processing of an application.

6. The competent authority shall inform the applicant within a reasonable period of time after receipt of an application which it considers incomplete, provide the opportunity to correct deficiencies and, to the extent feasible, identify the additional information required to complete the application.

7. Authenticated copies shall be accepted, where possible, in place of original documents.

8. The competent authority shall inform the applicant in writing and without undue delay if an application is rejected. In principle, the applicant shall, upon request, also be informed of the reasons for rejection of the application and of the timeframe for an appeal against the decision.

9. Each Party shall ensure that a licence or an authorisation, once granted, enters into effect without undue delay in accordance with the terms and conditions specified therein.

⁽¹⁾ Licencing fees do not include payments for auction, tendering or other non-discriminatory means of awarding concessions, or mandated contributions to universal service provision.

Subsection II

Provisions of general application*Article 161***Mutual recognition**

1. Nothing in this Chapter shall prevent a Party from requiring that natural persons possess the necessary qualifications and professional experience specified in the territory where the service is supplied, for the sector of activity concerned.
2. Each Party shall encourage the relevant professional bodies in its territory to provide recommendations on mutual recognition of qualifications and professional experience to the Partnership Committee, meeting in its trade configuration, for the purpose of the fulfilment, in whole or in part, by entrepreneurs and service suppliers of the criteria applied by each Party for the authorisation, licensing, operation and certification of entrepreneurs and service suppliers and, in particular, professional services.
3. Upon receipt of a recommendation referred to in paragraph 2, the Partnership Committee, meeting in its trade configuration, shall, within a reasonable time, review that recommendation with a view to determining whether it is consistent with this Agreement and, on the basis of the information contained, assess in particular:
 - (a) the extent to which the standards and criteria applied by each Party for the authorisation, licences, operation and certification of services providers and entrepreneurs are converging; and
 - (b) the potential economic value of an agreement on mutual recognition of qualifications and professional experience.
4. Where the requirements specified in paragraph 3 are satisfied, the Partnership Committee, meeting in its trade configuration, shall establish the necessary steps to negotiate an agreement on mutual recognition and thereafter recommend that the competent authorities of the Parties launch negotiations.
5. Any such agreement shall be in conformity with the relevant provisions of the WTO Agreement and, in particular, Article VII of the General Agreement on Trade in Services contained in Annex 1B to the WTO Agreement ('GATS').

*Article 162***Transparency and disclosure of confidential information**

1. Each Party shall respond promptly to all requests by the other Party for specific information on any of its measures of general application or international agreements which pertain to or affect this Agreement. Each Party shall also establish one or more enquiry points to provide, upon request, specific information on those matters to entrepreneurs and services suppliers of the other Party. The Parties shall notify each other the enquiry points within three months after entry into force of this Agreement. Enquiry points are not required to be depositories for laws and regulations.
2. Nothing in this Agreement shall require any Party to provide confidential information the disclosure of which would impede law enforcement, or otherwise be contrary to the public interest, or which would prejudice legitimate commercial interests of particular enterprises, public or private.

Subsection III

Computer services*Article 163***Understanding on computer services**

1. In liberalising trade in computer services in accordance with Sections B, C and D, the Parties shall comply with the paragraphs 2 to 4.

2. The Central Product Classification ('CPC' ⁽¹⁾) 84, which is the United Nations code used for describing computer and related services, covers the basic functions used to provide all computer and related services: computer programmes defined as the sets of instructions required to make computers work and communicate (including their development and implementation), data processing and storage, and related services, such as consultancy and training services for staff of clients. Technological developments have led to the increased offering of such services as a bundle or package of related services that can include some or all of those basic functions. For example, services such as web or domain hosting, data mining services and grid computing each consist of a combination of basic computer services functions.

3. Computer and related services, regardless of whether they are delivered via a network, including the internet, include all services that provide:

(a) consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, support, technical assistance or management of or for computers or computer systems;

(b) computer programmes defined as the sets of instructions required to make computers work and communicate (in and of themselves), plus consulting, strategy, analysis, planning, specification, design, development, installation, implementation, integration, testing, debugging, updating, adaptation, maintenance, support, technical assistance, management or use of or for computer programs;

(c) data processing, data storage, data hosting or database services;

(d) maintenance and repair services for office machinery and equipment, including computers; or

(e) training services for staff of clients, related to computer programmes, computers or computer systems, and not elsewhere classified.

4. Computer and related services enable the provision of other services, such as banking, by both electronic and other means. In such cases it is important to distinguish between the enabling service, such as web-hosting or application hosting), and the content or core service, such as banking, that is being supplied electronically. In such cases, the content or core service is not covered by CPC 84.

Subsection IV

- (a) using revenues derived from the supply of such service to cross-subsidise the supply of an express delivery service or any non-universal delivery service; and
- (b) unjustifiably differentiating among customers such as businesses, large-volume mailers or consolidators with respect to tariffs or other terms and conditions for the supply of a service subject to a universal service obligation or a postal monopoly.

Article 166

Universal service

1. Each Party has the right to define the kind of universal service obligation it wishes to maintain. Such obligations will not be regarded as anti-competitive *per se*, provided they are administered in a transparent, non-discriminatory and competitively neutral manner and are not more burdensome than necessary for the kind of universal service defined by the Party.
2. Tariffs for the universal service shall be affordable to meet the needs of users.

Article 167

Licences

1. Each Party should endeavour to replace any licences for services not covered by the scope of the universal service with a simple registration.
2. Where a licence is required:
- (a) the terms and conditions of licences, which shall not be more burdensome than necessary to achieve their aim, shall be made publicly available;
- (b) the reasons for the denial of a licence shall be made known to the applicant upon request; and
- (c) each Party shall provide for an appeal procedure through an independent body that shall be transparent, non-discriminatory and based on objective criteria.

Article 168

Independence of the regulatory body

The regulatory body shall be legally separate from, and not accountable to, any supplier of postal and courier services. The decisions of and the procedures used by the regulatory body shall be impartial with respect to all market participants.

Article 169

The Parties recognise the importance of gradual approximation of the legislation of the Republic of Armenia on postal services to that of the European Union.

⁽¹⁾ The Parties agree that a “major supplier” is equivalent to supplier with significant market power.

- (j) 'access' means the making available of facilities or services to another supplier under defined conditions, for the purpose of providing electronic communication services and covers *inter alia* access to:

1. Each Party shall ensure that its regulatory authorities for electronic communications networks and services are legally distinct and functionally independent from any supplier of electronic communications networks, electronic communications services or electronic communications equipment.
2. A Party that retains ownership or control of providers of electronic communication networks or services shall ensure effective structural separation of the regulatory function from activities associated with ownership or control. The regulatory authority shall act independently and shall not seek or accept instructions from any other body in relation to the exercise of these tasks assigned to it under domestic law.
3. Each Party shall ensure that its regulatory authorities are sufficiently empowered to regulate the sector, and have adequate financial and human resources to carry out the task assigned to it. Only appeal bodies referred to in paragraph 7 shall have the power to suspend or overturn decisions by the regulatory authorities.

The tasks assigned to a regulatory authority shall be made public in an easily accessible and clear form, in particular where those tasks are assigned to more than one body. Each Party shall ensure that its regulatory authorities have a separate annual budgets. The budgets shall be made public.

4. The decisions of and the procedures used by regulators shall be impartial with regard to all market participants.

5. The powers of the regulatory authorities shall be exercised in a transparent and timely manner.
6. Information requested shall be proportionate to the performance of the tasks of the regulatory authorities and treated in accordance with the requirements of confidentiality.
7. Any user or supplier affected by the decision of a regulatory authority shall have a right to appeal against that decision to an appeal body which is independent of the parties involved. That body, which may be a court, shall have the appropriate expertise to carry out its functions effectively. The merits of the case shall be duly taken into account and the appeal mechanism shall be effective. With regard to bodies responsible for review procedures which are not judicial in character each Party shall ensure that written reasons for their decisions shall always be given and that those decisions shall also be subject to review by an impartial and independent judicial authority. Decisions taken by appeal bodies shall be effectively enforced. Pending the outcome of the appeal, the decision of the regulatory authority shall stand, unless interim measures are granted in accordance with domestic law.
8. Each Party shall ensure that the head of a regulatory authority, or where applicable, members of the collegiate body fulfilling that function within a regulatory body or their replacements may be dismissed only if they no longer fulfil the conditions required for the performance of their duties which are laid down in advance in domestic law. Any such decision to dismiss shall be made public at the time of dismissal. The dismissed head of the regulatory authority, or where applicable, members of the collegiate body fulfilling that function shall receive a statement of reasons and shall have the right to request its publication, where this would not otherwise take place, in which case it shall be published.

Article 172

Authorisation to provide electronic communications networks and services

1. Each Party shall authorise the provision of electronic communications networks or services, wherever possible, upon simple notification. Following the notification, the service supplier concerned shall not be required to obtain an explicit decision or any other administrative act by the regulatory authority before exercising the rights stemming from the authorisation. The rights and obligations resulting from such authorisation shall be made publicly available in an easily accessible form. Obligations should be proportionate to the service in question.
2. Where necessary, a Party may require a licence for the right of use for radio frequencies and numbers in order to:
 - (a) avoid harmful interference;
 - (b) ensure technical quality of service;
 - (c) safeguard efficient use of spectrum; or
 - (d) fulfil other objectives of general interest.

4. Any administrative costs shall be imposed on suppliers in an objective, transparent, proportionate and cost-minimising manner. Any administrative costs imposed by a Party on suppliers providing a service or a network under an authorisation referred to in paragraph 1 or a license under paragraph 2 shall be limited to the actual administrative costs normally incurred in the management, control and enforcement of the applicable authorisation and licences. Such administrative costs may include costs for international cooperation, harmonisation and standardisation, market analysis, monitoring compliance and other market control, as well as regulatory work involving preparation and enforcement of legislation and administrative decisions, such as decisions on access and interconnection.

Each Party shall base its procedures on objective, transparent, non-discriminatory and proportionate criteria.
2. The current state of allocated frequency bands shall be made publicly available, but detailed identification of radio spectrum allocated for specific government uses is not required.
3. Each Party retains the right to establish and apply spectrum and frequency management measures that may have the effect of limiting the number of suppliers of electronic communications services, provided that it does so in a manner consistent with this Agreement. That right includes the ability to allocate frequency bands taking into account current and future needs and spectrum availability. Measures of a Party allocating and assigning spectrum and managing frequency are not considered as measures that are *per se* inconsistent with Articles 144, 149 and 150.

Article 174

Access and interconnection

1. Access and interconnection shall, in principle, be agreed on the basis of commercial negotiation between the suppliers concerned.
2. Each Party shall ensure that any suppliers of electronic communications services shall have a right, and when requested by another supplier an obligation, to negotiate interconnection with each other for the purpose of providing publicly available electronic communications networks and services. No Party shall maintain any legal or administrative measures which oblige suppliers granting access or interconnection to offer different terms and conditions to different suppliers for equivalent services or impose obligations that are not related to the services provided.
3. Each Party shall ensure that suppliers acquiring information from another supplier in the process of negotiating access or interconnection arrangements may use that information solely for the purpose for which it was supplied and respect at all times the confidentiality of information transmitted or stored.
4. Each Party shall ensure that a major supplier in its territory grants access to its essential facilities including, *inter alia*, network elements, associated facilities and ancillary services, to suppliers of electronic communications services on reasonable and non-discriminatory⁽¹⁾ terms and conditions.
5. For public telecommunications services, interconnection with a major supplier shall be ensured at any technically feasible point in the network. Such interconnection shall be provided:
 - (a) under non-discriminatory terms, conditions (including as regards technical standards, specifications, quality and maintenance) and rates, and of a quality no less favourable than that provided for own like services of such major supplier, or for like services of non-affiliated suppliers, or for its subsidiaries or other affiliates;

⁽¹⁾ For the purpose of this Subsection, non-discrimination is understood to refer to national treatment as defined in Article 150, as well as to reflect sector-specific usage of the term to mean 'terms and conditions no less favourable than those accorded to any other user of like public electronic communication networks or services under like circumstances'.

- (b) in a timely manner, on terms, conditions (including as regards technical standards, specifications, quality and maintenance) and cost-oriented rates that are transparent, reasonable, having regard to economic feasibility, and sufficiently unbundled so that the supplier need not pay for network components or facilities that it does not require for the service to be provided; and
 - (c) upon request, at points in addition to the network termination points offered to the majority of users, subject to charges that reflect the cost of construction of necessary additional facilities.
6. Each Party shall ensure that the procedures applicable for interconnection to a major supplier are made publicly available and that major suppliers make publicly available either their interconnection agreements or, where appropriate, their reference interconnection offers.

Article 175

Competitive safeguards on major suppliers

Each Party shall adopt or maintain appropriate measures for the purpose of preventing suppliers who, alone or together, are a major supplier from engaging in or continuing anti-competitive practices. Those anti-competitive practices shall include in particular:

- (a) engaging in anti-competitive cross-subsidisation;
- (b) using information obtained from competitors with anti-competitive results; and
- (c) not making available to other service suppliers on a timely basis technical information about essential facilities and commercially relevant information which are necessary for them to provide services.

Article 176

Universal service

1. Each Party has the right to define the kind of universal service obligations it wishes to maintain.
2. Those universal service obligations shall not be regarded *per se* as anti-competitive, provided they are administered in a proportionate, transparent, objective and non-discriminatory way. The administration of such obligations shall also be neutral with respect to competition and be not more burdensome than necessary for the kind of universal service defined by the Party.
3. All suppliers of electronic communications networks or services should be eligible to provide universal service. The designation of universal service suppliers shall be made through an efficient, transparent and non-discriminatory mechanism. Where necessary, each Party shall assess whether the provision of universal service represents an unfair burden on a supplier designated to provide universal service. Where justified on the basis of such calculation, and taking into account the market benefit which accrues to a supplier that offers universal service, regulatory authorities shall determine whether a mechanism is required to compensate the supplier concerned or to share the net cost of universal service obligations.

Article 177

Number portability

Each Party shall ensure that suppliers of public electronic communications services provide for number portability on reasonable terms and conditions.

Article 178

Confidentiality of information

Each Party shall ensure the confidentiality of electronic communications and related traffic data by means of a public electronic communications network and publicly available electronic communications services without restricting trade in services.

*Article 179***Resolution of electronic communications disputes**

1. Each Party shall ensure that in the event of a dispute arising between suppliers of electronic communications networks or services in connection with rights and obligations that arise from this Subsection, the regulatory authority concerned shall, at the request of either party concerned, issue a binding decision to resolve the dispute in the shortest possible timeframe and in any case within four months, except in exceptional circumstances.
2. Where such a dispute concerns the cross-border provision of services, the regulatory authorities concerned shall coordinate their efforts in order to bring about a resolution of the dispute.
3. The decision of the regulatory authority shall be made available to the public, having regard to the requirements of business confidentiality. The parties concerned shall be given a full statement of the reasons on which it is based and shall have the right to appeal that decision, in accordance with Article 171 paragraph 7.
4. The procedure referred to in this Article shall not preclude either party concerned from bringing an action before the courts.

*Article 180***Gradual approximation**

The Parties recognise the importance of gradual approximation of the legislation of the Republic of Armenia on electronic communication networks to that of the European Union.

Exceptions and limitations

1. Each Party may provide for limitations or exceptions to the rights set out in the Articles 213 to 218 only in certain special cases which do not conflict with a normal exploitation of the subject matter and do not unreasonably prejudice the legitimate interests of the right holders, in accordance with the conventions and international treaties to which they are parties.
2. Each Party shall provide that temporary acts of reproduction referred to in Articles 213 to 217, which are transient or incidental, which are an integral and essential part of a technological process, and the sole purpose of which is to enable: (a) a transmission in a network between third parties by an intermediary, or (b) a lawful use of a work or other subject matter to be made, and which have no independent economic significance, shall be exempted from the reproduction right provided for in Articles 213 to 217.

The commencement or resumption of use within a period of three months preceding the filing of the application for revocation which began at the earliest on expiry of the continuous period of at least three years of non-use shall, however, be disregarded where preparations for the commencement or resumption occur only after the proprietor becomes aware that the application for revocation may be filed.

2. A trademark shall also be liable to revocation if, after the date on which it was registered:

- (a) in consequence of acts or inactivity of the proprietor, it has become the common name in the trade for a product or service in respect of which it is registered; or
- (b) in consequence of the use made of it by the proprietor of the trademark or with his consent in respect of the goods or services for which it is registered, it is liable to mislead the public, particularly as to the nature, quality or geographical origin of those goods or services.

*Subsection III***Geographical indications***Article 230***Scope of application**

1. This Subsection applies to the protection of geographical indications originating in the territories of the Parties.

2. The Parties shall have no obligation to add a new geographical indication to the list referred to in paragraph 1, where:

 - (a) any direct or indirect commercial use of a protected name for comparable products not compliant with the product specification of the protected name, or in so far as such use exploits the reputation of a geographical indication;

 - (c) any other false or misleading indication as to the provenance, origin, nature or essential qualities of the product which is likely to convey a false impression as to its origin, placed on the inner or outer packaging, in advertising material or documents relating to the product concerned, or on the packing of the product in a container; and

Without prejudice to Article 23 of the TRIPS Agreement, the Parties shall mutually decide the practical conditions of use under which homonymous geographical indications will be differentiated from each other, taking into account the need to ensure equitable treatment of the producers concerned and that consumers are not misled.

A homonymous name which misleads consumers into believing that a product comes from another territory shall not be registered even if the name is accurate as far as the actual territory, region or place of origin of the product in question is concerned.

4. Where a Party, in the context of negotiations with a third country, proposes to protect a geographical indication of the third country which is homonymous with a geographical indication of the other Party protected under this Subsection, the latter shall be informed and be given an opportunity to comment before the third party's geographical indication becomes protected.

*Article 237***Transitional provisions**

1. Goods which were produced and labelled in conformity with domestic law before the entry into force of this Agreement, but which do not comply with its requirements, may continue to be sold after the entry into force of this Agreement until their stocks run out.

2. For a transitional period of 24 years to count as of one year after the entry into force of this Agreement for 'Cognac' and for a transitional period of three years after the entry into force of this Agreement for 'Champagne', the protection pursuant to this Agreement of those geographical indications of the European Union shall not preclude those names from being used on products originating in the Republic of Armenia and exported to third countries, where the laws and regulations of the third country concerned so permit, in order to designate and present certain comparable products originating in the Republic of Armenia, provided that:

- (a) the name is labelled exclusively in non-Latin characters;
- (b) the true origin of the product is clearly labelled in the same field of vision; and
- (c) nothing in the presentation is likely to mislead the public as to the true origin of the product.

3. For a transitional period of 13 years to count as of one year after the entry into force of this Agreement for 'Cognac', and for a transitional period of two years after the entry into force of this Agreement for 'Champagne', the protection pursuant to this Agreement of those geographical indications of the European Union shall not preclude those names from being used in the Republic of Armenia provided that:

- (a) the name is labelled exclusively in non-Latin characters;
- (b) the true origin of the product is clearly labelled in the same field of vision; and
- (c) nothing in the presentation is likely to mislead consumers as to the true origin of the product.

4. For the purposes of facilitating the smooth and effective termination of the use of the European Union geographical indication 'Cognac' for products originating in the Republic of Armenia, as well as assisting the industry of the Republic of Armenia in maintaining its competitive position in export markets, the European Union shall provide to the Republic of Armenia technical and financial assistance. That assistance, to be provided in conformity with EU law, shall include, in particular, actions for developing a new name and promoting, advertising and marketing the new name in domestic and traditional export markets.

5. The specific amounts, types, mechanisms and timeframes of the EU assistance referred to in paragraph 4 shall be defined in a financial and technical assistance package to be agreed definitively by the Parties within one year of the entry into force of this Agreement. Parties shall jointly develop the terms of reference of such assistance package, based on a thorough assessment of the needs to be covered by such assistance. That assessment shall be carried out by an international consulting firm chosen jointly by the Parties.

6. In the event that the European Union does not provide the financial and technical assistance referred to in paragraph 4, the Republic of Armenia may have recourse to the dispute-settlement mechanism provided for in Chapter 13 and, if successful, suspend the obligations arising from paragraphs 2 and 3.

7. The European Union financial and technical assistance shall be provided not later than eight years after the date of the entry into force of this Agreement.

3. Geographical indications protected under this Subsection may only be cancelled by the Party in which the product originates.

Article 239

Co-operation and transparency

1. The Parties shall, either directly or through the Sub-Committee on Geographical Indications established pursuant to Article 240, maintain contact on all matters relating to the implementation and functioning of this Subsection. In particular, a Party may request information from the other Party relating to product specifications and their modification, and on contact points of national control authorities.

2. Each Party may make publicly available the specifications of the geographical indications protected under this Subsection or a summary thereof, and information on contact points of national control authorities, corresponding to the geographical indications of the other Party protected pursuant to this Subsection.

Article 240

Sub-Committee on Geographical Indications

1. The Parties hereby establish a Sub-Committee on Geographical Indications consisting of representatives of the European Union and the Republic of Armenia with the purpose of monitoring the implementation of this Subsection and of intensifying their cooperation and dialogue on geographical indications.

2. The Sub-Committee on Geographical Indications adopts its decisions by consensus. It shall determine its own rules of procedure. The Sub-Committee on Geographical Indications shall meet at the request of either Party, alternately in the European Union and in the Republic of Armenia, at a time and a place and in a manner, which may include by videoconference, agreed by the Parties, but no later than 90 days after the request.

3. The Sub-Committee on Geographical Indications shall also see to the proper functioning of this Subsection and may consider any matter related to its implementation and operation. In particular, it shall be responsible for:

(c) amending Annex X, as regards the list of geographical indications;

(d) exchanging information on legislative and policy developments on geographical indications and any other matter of mutual interest in the area of geographical indications; and

(e) exchanging information on geographical indications for the purpose of considering their protection in accordance with this Subsection.

Subsection IV

Designs*Article 241***International agreements**

The Parties shall adhere to the Geneva Act of 1999 of the Hague Agreement Concerning the International Registration of Industrial Designs.

*Article 242***Protection of registered designs**

1. The Parties shall provide for the protection of independently created designs that are new and original. Such protection shall be provided by registration and shall confer an exclusive right upon their holders in accordance with this Subsection.

For the purpose of this Subsection, a Party may consider a design having individual character to be original.

2. A design applied to or incorporated into a product which constitutes a component part of a complex product shall only be considered to be new and original:

- (a) if the component part, once it has been incorporated into the complex product, remains visible during normal use of the latter; and
- (b) to the extent that those visible features of the component part fulfil in themselves the requirements as to novelty and originality.

3. The term 'normal use' in paragraph 2 (a) means use by the end user, excluding maintenance, servicing or repair work.

4. The holder of a registered design shall have the right to prevent third parties not having the holder's consent at least from making, offering for sale, selling, importing, exporting, stocking or using a product bearing or embodying the protected design when such acts are undertaken for commercial purposes, unduly prejudice the normal exploitation of the design or are not compatible with fair trade practice.

5. The duration of protection available shall amount to 25 years.

*Article 243***Protection conferred to unregistered designs**

1. The European Union and the Republic of Armenia shall provide the legal means to prevent the use of the unregistered appearance of a product only if the contested use results from copying the unregistered appearance of the product. Such use shall at least cover offering for sale, putting on the market, importing or exporting the product.

2. The duration of protection available for the unregistered appearance of a product shall amount to at least three years from the date on which the design was made available to the public in one of the Parties.

*Article 244***Exceptions and exclusions**

1. Each Party may provide limited exceptions to the protection of designs, provided that such exceptions do not unreasonably conflict with the normal exploitation of protected designs and do not unreasonably prejudice the legitimate interests of the holder of the protected design, taking account of the legitimate interests of third parties.

2. Design protection shall not extend to designs dictated essentially by technical or functional considerations. In particular, a design right shall not subsist in features of appearance of a product which necessarily have to be reproduced in their exact form and dimensions in order to permit the product in which the design is incorporated or to which it is applied to be mechanically connected to or placed in, around or against another product so that either product may perform its function.

Article 245

Relationship to copyright

A design shall also be eligible for protection under the law of copyright of a Party as from the date on which the design was created or fixed in any form. The extent to which, and the conditions under which, such a protection is conferred, including the level of originality required, shall be determined by each Party subject to its domestic laws and regulations.

Subsection V

Article 248

Supplementary protection certificate

1. The Parties recognise that medicinal and plant protection products protected by a patent on their respective territory may be subject to an administrative authorisation procedure before being put on their market. The Parties recognise that the period that elapses between the filing of the application for a patent and the first authorisation to place the product on their respective market, as defined for that purpose by their relevant legislation, may shorten the period of effective protection under the patent.
2. Each Party shall provide for a further period of protection for a medicinal or plant protection product which is protected by a patent and which has been subject to an administrative authorisation procedure, that period being equal to the period referred to in the second sentence of paragraph 1, reduced by a period of five years.
3. Notwithstanding paragraph 2, the duration of the further period of protection may not exceed five years.

In the Union, a further six month extension is possible in the case of medicinal products for which pediatric studies have been carried out and the results of those studies are reflected in the product information.

Subsection VI

Undisclosed information*Article 249***Scope of protection for trade secrets**

1. The Parties affirm their commitments under Article 39 paragraphs 1 and 2 of the TRIPS Agreement. Each Party shall provide for appropriate civil judicial procedures and remedies for any trade secret holder to prevent, and obtain redress for, the acquisition, use or disclosure of a trade secret whenever carried out in a manner contrary to honest commercial practices.

2. For purposes of this Subsection:

(a) 'trade secret' means information that:

(i) is secret in the sense that it is not, as a body or in the precise configuration and assembly of its components, generally known among or readily accessible to persons within the circles that normally deal with the kind of information in question;

(ii) has commercial value because it is secret; and

(iii) has been subject to reasonable steps under the circumstances, by the person lawfully in control of the information, to keep it secret; and

3. For the purpose of this Subsection, at least the following forms of conduct shall be considered contrary to honest commercial practices:

(a) the acquisition of a trade secret without the consent of the trade secret holder, whenever carried out through unauthorised access to, appropriation of, or copying of any documents, objects, materials, substances or electronic files lawfully under the control of the trade secret holder which contain the trade secret or from which the trade secret can be deduced;

(b) the use or disclosure of a trade secret whenever carried out, without the consent of the trade secret holder, by a person who is found to:

(i) have acquired the trade secret in a manner referred to in point (a);

(ii) be in breach of a confidentiality agreement or any other duty not to disclose the trade secret; or

(iii) be in breach of a contractual or any other duty to limit the use of the trade secret; and

(c) the acquisition, use or disclosure of a trade secret whenever carried out by a person who, at the time of the acquisition, use or disclosure, knew or ought, under the circumstances, to have known that the trade secret had been obtained directly or indirectly from another person who was using or disclosing the trade secret unlawfully within the meaning of point (b), including where a person has induced another person to carry out the actions referred to in that point.

4. Nothing in this Subsection shall be understood as requiring a Party to consider any of the following forms of conduct as contrary to honest commercial practices:

(a) independent discovery or creation by a person of the relevant information;

- (b) reverse engineering of a product by a person who is lawfully in possession of it and who is free from any legally valid duty to limit the acquisition of the relevant information;

5. Nothing in this Subsection shall be understood as restricting freedom of expression and information, including media freedom as protected in the jurisdiction of each of the Parties.

Article 250

Civil judicial procedures and remedies for trade secrets

1. Each Party shall ensure that any person participating in the civil judicial proceedings referred to in Article 249, or who has access to documents which form part of those legal proceedings, is not permitted to use or disclose any trade secret or alleged trade secret which the competent judicial authorities have, in response to a duly reasoned application by an interested party, identified as confidential and of which they have become aware as a result of such participation or access.
2. In the civil judicial proceedings referred to in Article 249, each Party shall provide that its judicial authorities have the authority at least to:
- (a) order provisional measures to prevent the acquisition, use or disclosure of the trade secret in a manner contrary to honest commercial practices;
 - (b) order injunctive relief to prevent the acquisition, use or disclosure of the trade secret in a manner contrary to honest commercial practices;
 - (c) order the person that knew or ought to have known that he, she or it was acquiring, using or disclosing a trade secret in a manner contrary to honest commercial practices to pay the trade secret holder damages appropriate to the actual prejudice suffered as a result of such acquisition, use or disclosure of the trade secret;
 - (d) take specific measures to preserve the confidentiality of any trade secret or alleged trade secret produced in civil proceedings relating to the alleged acquisition, use and disclosure of a trade secret in a manner contrary to honest commercial practices; such specific measures may include, in accordance with the domestic law of the relevant Party, the possibility of:
 - (i) restricting access to certain documents in whole or in part;
 - (ii) restricting access to hearings and their corresponding records or transcript; and
 - (iii) making available a non-confidential version of a judicial decision in which the passages containing trade secrets have been removed or redacted; and
 - (e) impose sanctions on parties, or other persons subject to the court's jurisdiction, for the violation of remedies or measures adopted by the court pursuant to paragraph 1 or point (d) of this paragraph concerning the protection of a trade secret or alleged trade secret produced in those proceedings.
3. The Parties shall not be required to provide for the judicial procedures and remedies referred to in Article 249 when the conduct contrary to honest commercial practices is carried out, in accordance with their relevant domestic law, to reveal misconduct, wrongdoing or illegal activity or for the purpose of protecting a legitimate interest recognised by law.

*Article 251***Protection of data submitted to obtain an authorisation to put a medicinal product on the market**

1. Each Party shall protect commercially confidential information submitted to obtain an authorisation to put a medicinal product on the market ('marketing authorisation') against disclosure to third parties, unless overriding health interests provide otherwise. Any confidential business information shall also benefit from protection against unfair commercial practices.
2. Each Party shall ensure that, for a period of eight years from the first marketing authorisation in the Party concerned, the public body responsible for the granting of a marketing authorisation shall not take into account confidential business information or the results of pre-clinical tests or clinical trials provided in the first marketing authorisation application and subsequently submitted by a person or entity, whether public or private, in support of another application for authorisation to place a medicinal product on the market without the explicit consent of the person or entity who submitted such data, unless international agreements recognised by both Parties provide otherwise.
3. During a ten-year period, starting from the date of granting of the first marketing authorisation in the Party concerned, a marketing authorisation granted for any subsequent application based on the results of pre-clinical tests or of clinical trials provided in the first marketing authorisation shall not permit placing a medicinal product on the market, unless the subsequent applicant submits his own results of pre-clinical tests or of clinical trials (or results of pre-clinical tests or of clinical trials used with the consent of the party which had provided that information) fulfilling the same requirements as the first applicant.

Products not complying with the requirements set out in this paragraph shall not be allowed on the market.

4. In addition, the ten-year period referred to in paragraph 3 shall be extended to a maximum of 11 years if, during the first eight years after obtaining the authorisation, the authorisation holder obtains authorisation for one or more new therapeutic indications which are considered to bring a significant clinical benefit in comparison with existing therapies.

*Article 252***Data protection on plant protection products**

1. Each Party shall recognise a temporary right of the owner of a test or study report submitted for the first time to obtain a marketing authorisation for a plant protection product. During such period, the test or study report shall not be used for the benefit of any other person aiming to obtain a marketing authorisation for a plant protection product, except when the explicit consent of the first owner is given. In this Subsection that temporary right is referred to as 'data protection'.
2. The test or study report referred to in paragraph 1 shall fulfil the following conditions:
 - (a) be necessary for the authorisation or an amendment of an authorisation in order to allow the use on other crops; and
 - (b) be certified as compliant with the principles of good laboratory practice or of good experimental practice.
3. The period of data protection shall be at least ten years from the first authorisation granted by the competent authority in the Party concerned. For low-risk plant protection products, the period may be extended to 13 years.
4. The periods referred to in paragraph 3 shall be extended by three months for each extension of authorisation for minor uses if the applications for such authorisations are made by the authorisation holder at least five years after first authorisation granted by the competent authority. The total period of data protection may in no circumstances exceed 13 years. For low-risk plant protection products, the total period of data protection may in no circumstances exceed 15 years.

The term 'minor use' means use in a Party's territory of a plant protection product on plants or plant products which are not widely grown in that Party or widely grown to meet an exceptional need for plant protection.

5. A test or study shall also be protected if it was necessary for the renewal or review of an authorisation. In such cases, the period of data protection shall be 30 months.

6. Measures obliging the applicant and holders of previous authorisations, established in the Parties' respective territories, to share proprietary information so as to avoid duplicative testing on vertebrate animals, shall be laid down by each Party.

Subsection VII

2. For the Republic of Armenia, this Article shall apply no later than three years after the entry into force of this Agreement.

Section C

Enforcement of intellectual property rights

Subsection I

General provisions

Article 254

General obligations

1. The Parties reaffirm their commitments under the TRIPS Agreement, in particular Part III thereof. Each Party shall provide for the complementary measures, procedures and remedies in this Section which are necessary to ensure the enforcement of intellectual property rights. Those measures, procedures and remedies shall be fair and equitable, and shall not be unnecessarily complicated or costly, or entail unreasonable time-limits or unwarranted delays.

2. The measures, procedures and remedies referred to in paragraph 1 shall be effective, proportionate and dissuasive and shall be applied in such a manner as to avoid the creation of barriers to legitimate trade and to provide for safeguards against their abuse.

3. For the purposes of Subsection II of this Section, the notion of 'intellectual property rights' includes at least the following:

Article 255

Subsection II

Civil enforcement

Article 256

Measures for preserving evidence

1. Each Party shall ensure that, even before the commencement of proceedings on the merits of the case, the competent judicial authorities may, upon request by a party who has presented reasonably available evidence to support his or her claims that his intellectual property right has been infringed or is about to be infringed, order prompt and effective provisional measures to preserve relevant evidence in respect of the alleged infringement, subject to the protection of confidential information.
2. The provisional measures referred to in paragraph 1 may include the detailed description, with or without the taking of samples, or the physical seizure of the alleged infringing goods, and, in appropriate cases, the materials and implements used in the production or distribution of such goods and the documents relating thereto. Those measures shall be taken, if necessary, without the other party being heard, in particular where any delay is likely to cause irreparable harm to the right holder or where there is a demonstrable risk of evidence being destroyed. The other party shall have the right to be heard within a reasonable amount of time.

Article 257

Right of information

1. Each Party shall ensure that, in civil proceedings concerning an infringement of an intellectual property right, and in response to a justified and proportionate request of the claimant, the competent judicial authorities may order the infringer or any other person which is party to litigation, or a witness therein, to provide information on the origin and distribution networks of the goods or services which infringe an intellectual property right.

For the purposes of this paragraph, the term 'any other person' means a person who was:

- (a) found in possession of the infringing goods on a commercial scale;
- (b) found to be using the infringing services on a commercial scale;
- (c) found to be providing on a commercial scale services used in infringing activities; or
- (d) indicated by the person referred to in this paragraph as being involved in the production, manufacture or distribution of the goods or the provision of the services.

The information referred to in this paragraph shall, as appropriate, comprise:

- (a) the names and addresses of the producers, manufacturers, distributors, suppliers and other previous holders of the goods or services, as well as the intended wholesalers and retailers; and
- (b) information on the quantities produced, manufactured, delivered, received or ordered, as well as the price obtained for the goods or services in question.

2. This Article shall apply without prejudice to other statutory provisions which:

- (a) grant the right holder rights to receive fuller information;
- (b) govern the use in civil or criminal proceedings of the information communicated pursuant to this Article;
- (c) govern responsibility for misuse of the right of information;
- (d) afford an opportunity for refusing to provide information which would force the person referred to in paragraph 1 to admit his own participation or that of his close relatives in the infringement of an intellectual property right; or
- (e) govern the protection of confidentiality of information sources or the processing of personal data.

Article 258

Provisional and precautionary measures

1. Each Party shall ensure that the judicial authorities may, at the request of the applicant, issue against the alleged infringer an interlocutory injunction intended to prevent any imminent infringement of an intellectual property right. The judicial authorities may also forbid, on a provisional basis and subject, where appropriate, to a recurring penalty payment where provided for by domestic law, the continuation of the alleged infringements of that right, or to make such continuation subject to the lodging of guarantees intended to ensure the compensation of the right holder. An interlocutory injunction may also be issued, under the same conditions, against an intermediary whose services are being used by a third party to infringe an intellectual property right.

2. An interlocutory injunction may also be issued to order the seizure or delivery up of goods suspected of infringing an intellectual property right, so as to prevent their entry into or movement within the channels of commerce.

3. In the case of an alleged infringement committed on a commercial scale, each Party shall ensure that, if the applicant demonstrates circumstances likely to endanger the recovery of damages, the judicial authorities may order the precautionary seizure of the movable and immovable property of the alleged infringer, including the blocking of his or her bank accounts and other assets. To that end, the competent authorities may order the communication of bank, financial or commercial documents, or appropriate access to the relevant information.

Article 259

Corrective measures

1. Each Party shall ensure that the competent judicial authorities may order, at the request of the applicant and without prejudice to any damages due to the right holder by reason of the infringement, and without compensation of any sort, at least the definitive removal from the channels of commerce, or the destruction, of goods that they have found to be infringing an intellectual property right. If appropriate, the competent judicial authorities may also order destruction of materials and implements predominantly used in the creation or manufacture of those goods.

2. The Parties' judicial authorities shall have the authority to order that the measures referred to in paragraph 1 be carried out at the expense of the infringer, unless particular reasons are invoked for not doing so.

Article 260

Injunctions

Each Party shall ensure that, where a judicial decision is taken that finds an infringement of an intellectual property right, the judicial authorities may issue against the infringer, as well as against intermediary whose services are used by a third party to infringe an intellectual property right, an injunction aimed at prohibiting the continuation of the infringement.

Article 261

Alternative measures

A Party may provide that, in appropriate cases and upon a request of the person liable to be subject to the measures provided for in Article 259 or Article 260, the competent judicial authorities may order pecuniary compensation to be paid to the injured party instead of applying the measures provided for in these Articles. Such pecuniary compensation shall be paid if the person liable to be subject to those measure acted unintentionally and without negligence, and if the execution of the measures provided in Article 259 and 260 would cause this person disproportionate harm and pecuniary compensation to the injured party appears reasonably satisfactory.

Article 262

Damages

1. Each Party shall ensure that the judicial authorities, on application of the injured party, order the infringer who knowingly, or with reasonable grounds to know, engaged in an infringing activity, to pay the right holder damages appropriate to the actual damage suffered by him or her as a result of the infringement. When the judicial authorities determine the damages:

- (a) they shall take into account all appropriate aspects, such as the negative economic consequences, including lost profits, which the injured party has suffered, any unfair profits made by the infringer and, in appropriate cases, elements other than economic factors, such as the moral prejudice caused to the right holder by the infringement; or
- (b) as an alternative to point (a), they may, in appropriate cases, determine the damages as a lump sum on the basis of elements such as at least the amount of royalties or fees which would have been due if the infringer had requested authorisation to use the intellectual property right in question.

2. Where the infringer did not knowingly, or with reasonable grounds to know, engage in infringing activity, a Party may lay down that the judicial authorities may order in favour of the injured party the recovery of profits or the payment of damages, which may be pre-established.

Article 263

Legal costs

Each Party shall ensure that reasonable and proportionate legal costs and other expenses incurred by the prevailing party are, as a general rule, borne by the unsuccessful losing party, unless equity does not allow this.

Article 264

Publication of judicial decisions

Each Party shall ensure that, in legal proceedings instituted for infringement of an intellectual property right, the judicial authorities may order, upon the request of the applicant and at the expense of the infringer, appropriate measures for the dissemination of the information concerning the decision, including displaying the decision and publishing it in full or in part.

Article 265

Presumption of authorship or ownership

The Parties recognise that, for the purposes of applying the measures, procedures and remedies provided for in this Section it is sufficient for the name of an author of a literary or artistic work to appear on the work in the usual manner in order for that author to be regarded as such, unless there is proof to the contrary, and consequently to be entitled to institute infringement proceedings.

Subsection III

Border enforcement

Article 266

Border enforcement

1. When implementing border measures for the enforcement of intellectual property rights, each Party shall ensure consistency with its obligations under the GATT 1994 and the TRIPS Agreement.
2. Those approaches shall include risk-analysis techniques based on, *inter alia*, information provided by right, intelligence gathered and cargo inspections.
3. Customs authorities of each Party shall, upon request by the right holders, take measures to detain or suspend the release of goods under customs control which are suspected of infringing trademarks, copyright and related rights, geographical indications, patents, utility models, industrial designs, topographies of integrated circuits and plant variety rights.
4. No later than three years after entering into force of this Agreement, the Parties shall initiate discussions regarding the rights of their relevant customs authorities to detain or suspend, upon their own initiative, the release of goods under customs control which are suspected of infringing trademarks, copyright and related rights, geographical indications, patents, utility models, industrial designs, topographies of integrated circuits and plant variety rights.
5. Notwithstanding paragraph 3, a Party has no obligation but may decide to apply such measures to imports of goods put on the market in another country by or with the consent of the right holder.
6. The Parties agree to cooperate in respect of international trade in goods suspected of infringing intellectual property rights. For that purpose, each Party shall establish a contact point in its customs administration and notify the other Party thereof. Such cooperation shall include exchanges of information regarding mechanisms for receiving information from right holders, best practices and experiences with risk-management strategies, as well as information to help with the identification of shipments suspected of containing infringing goods. Any information shall be provided in a manner that fully respects the provisions on the protection of personal data applicable in the territory of each Party.
7. Without prejudice to other forms of cooperation, Protocol II on Mutual Administrative Assistance in Customs Matters shall be applicable for the purposes of border enforcement of intellectual property rights.
8. Without prejudice to the general competence of the Partnership Committee, the Sub-Committee on Customs referred to in Article 126 shall be responsible for ensuring the proper functioning and implementation of this Section, setting the priorities and providing for adequate procedures for cooperation between the competent authorities of both Parties.

Subsection IV

Other enforcement provisions*Article 267***Codes of conduct**

3. Without prejudice and as a complement to paragraphs 1 and 2, the Parties shall hold effective dialogues, as necessary, in intellectual property issues ('IP Dialogue') to address topics relevant to the protection and enforcement of intellectual property rights covered by this Chapter, as well as on other relevant issue.

CHAPTER 8

Public procurement

Article 269

Relation to the WTO Government Procurement Agreement

The Parties affirm their mutual rights and obligations under the Revised Agreement on Government Procurement of 2012 ⁽¹⁾ ('WTO Government Procurement Agreement'). Those rights and obligations established by the WTO Government Procurement Agreement, including the specifications of each Party set out in their respective Annexes to Appendix I, are made part of this Agreement and are subject to bilateral dispute settlement as provided for in Chapter 13.

Article 270

Additional Scope of Application

1. The Parties shall apply, *mutatis mutandis*, the provisions of Articles I to IV, VI to XV, XVI.1 to XVI.3, XVII and XVIII of the WTO Government Procurement Agreement to the procurements covered in Annex XI to this Agreement.
2. The Partnership Committee may decide to amend Annex XI to this Agreement. As regards the procedure for modifications or rectifications of that Annex by a Party, the Parties shall apply the provisions of Article XIX of the WTO Government Procurement Agreement *mutatis mutandis*, subject to the notifications being made directly to the other Party and the reference to dispute settlement is understood as to refer to Chapter 13.

Article 271

Additional Disciplines

The Parties shall apply to both the procurements covered through their respective Annexes to Appendix I to the WTO Government Procurement Agreement and to those covered through Annex XI to this Agreement, the following additional disciplines:

Electronic publication of procurement notices

1. Each Party shall ensure that all the notices of intended procurement are made directly accessible by electronic means free of charge through a single point of access on the internet. In addition, the notices may also be published in an appropriate paper medium. Any such medium shall be widely disseminated and such notices shall remain readily accessible to the public, at least until the expiration of the time period indicated in the notice.

Requirements for review procedures

2. Each Party shall ensure that the measures taken concerning the review procedures specified in Article XVIII of the WTO Government Procurement Agreement provide the necessary powers to:
 - (a) take, at the earliest opportunity and by way of interlocutory procedures, interim measures with the aim of correcting the alleged infringement or preventing further damage to the interests concerned, including measures to suspend or to ensure the suspension of the procedure for the award of a public procurement contract or the implementation of any decision taken by the contracting authority;
 - (b) either set aside or ensure the setting aside of decisions taken unlawfully, including the removal of discriminatory technical, economic or financial specifications in the publication of intended or planned procurement, the contract documents or in any other document relating to the contract award procedure; and
 - (c) award damages to persons harmed by an infringement.
3. In the case of the review of an award decision, each Party shall ensure that the contracting authority cannot conclude the contract before the review body has made a decision on the application either for interim measures or for review. The suspension shall end no earlier than the expiry of the standstill period referred to in paragraph 6.

⁽¹⁾ Annex to the Protocol Amending the Agreement on Government Procurement (GPA/113).

4. Each Party shall ensure that decisions taken by bodies responsible for review procedures can be effectively enforced.
5. Members of independent review bodies shall not be representatives of any contracting authorities.

With regard to bodies responsible for review procedures which are not judicial in character each Party shall ensure that:

- (a) written reasons for their decisions are always be given;
- (b) that any allegedly illegal measure taken by the independent review body or any alleged defect in the exercise of the powers conferred on it can be the subject of judicial review or review by another independent body which is a court or tribunal and independent of both the contracting authority and the review body;
- (c) the members of such an independent body are appointed and leave office under the same conditions as members of the judiciary as regards the authority responsible for their appointment, their period of office, and their removal;
- (d) at least the President of such an independent body has the same legal and professional qualifications as members of the judiciary; and
- (e) the independent body takes its decisions following a procedure in which both sides are heard, and that these decisions are, by means determined by each Party, legally binding.

Standstill period

6. The contracting authority may not conclude a contract following the decision to award a contract falling within the scope of this Chapter before:
 - (a) the expiry of a standstill period of at least 10 calendar days with effect from the day following the date on which the contract award decision is sent to the tenderers and candidates concerned if fax or electronic means are used; or
 - (b) before the expiry of a standstill period of either at least 15 calendar days with effect from the day following the date on which the contract award decision is sent to the tenderers and candidates concerned or at least 10 calendar days with effect from the day following the date of the receipt of the contract award decision, if other means of communication are used.

Alternatively, a Party may provide that the standstill period is triggered by the publication of the award decision in an electronic media free of charge, pursuant to Article XVI.2 of the WTO Government Procurement Agreement.

Tenderers shall be deemed to be concerned if they have not yet been definitively excluded. The exclusion is deemed definitive if it has been notified to the tenderers concerned and either has been considered lawful by an independent review body or can no longer be subject to a review procedure. Candidates shall be deemed to be concerned if the contracting authority has not made information about the rejection of their application available to the tenderers concerned prior to the notification of the contract award decision.

7. A Party may provide that the standstill periods referred to in points (a) and (b) of the first subparagraph of paragraph 6 do not apply in the following cases:
 - (a) if the only tenderer concerned within the meaning of the third subparagraph of paragraph 6 is the one who is awarded the contract and there are no other candidates concerned;
 - (b) in the case of a contract based on a framework agreement; and
 - (c) in the case of a specific contract based on a dynamic purchasing system.

Ineffectiveness

8. Each Party shall ensure, if the contracting authority has awarded a contract without prior publication without this being permissible, that a contract is considered ineffective by a review body independent of the contracting authority or a judiciary body, or that its ineffectiveness is the result of a decision of such a body.

The law of each Party shall determine the consequences of a contract considered ineffective by providing for the retroactive cancellation of all contractual obligations or the cancellation of those obligations not yet performed. In the latter case, each Party shall provide for the application of other penalties.

9. A Party may provide that the review body or a judicial body may not consider a contract ineffective, even though the contract has been awarded unlawfully, if the review body or a judicial body finds, after having examined all relevant aspects, that overriding reasons relating to a general interest require to maintain the effects of the contract. In that case, each Party shall provide for alternative penalties.

Non-discrimination of established companies

10. Each Party shall ensure that the suppliers of the other Party that have established a commercial presence in its territory through the establishment, acquisition or maintenance of a juridical person are accorded national treatment with regard to any public procurement of the Party in its territory. This obligation applies irrespectively of whether or not the procurement is covered by the Parties' Annexes to Appendix I to the WTO Government Procurement Agreement or by Annex XI of this Agreement.

The general exceptions provided for in Article III of the WTO Government Procurement Agreement apply.

CHAPTER 9

Trade and sustainable development

Article 272

Objectives and scope

1. The Parties recall Agenda 21 of the UN Conference on Environment and Development of 1992, the ILO Declaration on Fundamental Principles and Rights at Work of 1998, the Johannesburg Plan of Implementation on Sustainable Development of 2002, the Ministerial Declaration of the UN Economic and Social Council entitled 'Creating an environment at the national and international levels conducive to generating full and productive employment and decent work for all, and its impact on sustainable development' of 2006, the ILO Declaration on Social Justice for a Fair Globalization of 2008, the Outcome Document of the UN Conference on Sustainable Development of 2012 entitled 'The Future We Want' and the UN 2030 Agenda for Sustainable Development entitled 'Transforming Our World: the 2030 Agenda for Sustainable Development' adopted in 2015. The Parties reaffirm their commitment to promote the development of international trade in such a way as to contribute to the objective of sustainable development, for the welfare of present and future generations, and to ensure that that objective is integrated and reflected at every level of their trade relationship.

2. The Parties reaffirm their commitment to pursue sustainable development, the pillars of which — economic development, social development and environmental protection — are interdependent and mutually reinforcing. They underline the benefit of considering trade-related labour and environmental issues as part of a global approach to trade and sustainable development.

3. When 'labour' is referred to in this Chapter, it includes the issues relevant to the strategic objectives of the ILO, through which the Decent Work Agenda is expressed, as agreed on in the ILO Declaration on Social Justice for a Fair Globalization of 2008.

*Article 273***Right to regulate and levels of protection**

Recognising the right of each Party to determine its sustainable development policies and priorities, to establish its own levels of domestic environmental and labour protection, and to adopt or modify accordingly its relevant laws and policies, in a manner consistent with its commitment to the internationally recognised standards and agreements referred to in Articles 274 and 275, each Party shall strive to ensure that its laws and policies provide for and encourage high levels of environmental and labour protection and shall strive to continue to improve those laws and policies and their underlying levels of protection.

*Article 274***International labour standards and agreements**

1. The Parties recognise full and productive employment and decent work for all as key elements for managing globalization, and reaffirm their commitment to promote the development of international trade in a way that is conducive to full and productive employment and decent work for all. In that context, the Parties commit to consult and co-operate with each other, as appropriate, on trade-related labour issues of mutual interest.

2. In accordance with their obligations as members of the ILO and the ILO Declaration on Fundamental Principles and Rights at Work and its Follow-up of 1998, the Parties commit to respect, promote and realise in their laws and practices and in their whole territory the internationally recognised core labour standards, as embodied in the fundamental ILO conventions and the protocols to those conventions, and in particular:

- (a) the freedom of association and the effective recognition of the right to collective bargaining;
- (b) the elimination of all forms of forced or compulsory labour;
- (c) the effective abolition of child labour; and
- (d) the elimination of discrimination in respect of employment and occupation.

3. The Parties reaffirm their commitment to effectively implement in their laws and practices the fundamental, priority and other ILO conventions, as well as the protocols to those conventions, that have been ratified by the Member States and the Republic of Armenia respectively.

4. The Parties shall also consider the ratification of the remaining priority and other conventions that are classified as up-to-date by the ILO. In that context, the Parties shall regularly exchange information on their respective situations and progress in the ratification process.

5. The Parties recognise that the violation of fundamental principles and rights at work cannot be invoked or otherwise used as a legitimate comparative advantage and that labour standards are not to be used for protectionist trade purposes.

*Article 275***International environmental governance and agreements**

1. The Parties recognise the value of international environmental governance and agreements as a response of the international community to global or regional environmental problems and stress the need to enhance the mutual supportiveness between trade and environment. In that context, the Parties commit to consult and cooperate as appropriate with respect to negotiations on trade-related environmental issues and other trade-related environmental matters of mutual interest.

2. The Parties reaffirm their commitment to effectively implement in their laws and practices the multilateral environmental agreements ('MEAs') to which they are party.

3. The Parties shall regularly exchange information on their respective situations and progress as regards the ratification of MEAs or amendments to such agreements.

4. The Parties reaffirm their commitment to implementing and reaching the objectives of the United Nations Framework Convention on Climate Change of 1992 ('UNFCCC'), the Kyoto Protocol thereto of 1998 and the Paris Agreement of 2015. They commit to work together to strengthen the multilateral, rules-based regime under the UNFCCC and to cooperate on the further development and implementation of the international climate-change framework under the UNFCCC and agreements and decisions related thereto.

5. Nothing in this Agreement shall prevent Parties from adopting or maintaining measures to implement the MEAs to which they are party, provided that such measures are not applied in a manner that would constitute a means of arbitrary or unjustifiable discrimination between the Parties or a disguised restriction on trade.

Article 276

Trade and investment favouring sustainable development

The Parties confirm their commitment to enhance the contribution of trade to the goal of sustainable development in its economic, social and environmental dimensions. To that end, the Parties:

- (a) recognise the beneficial role that core labour standards and decent work can have on economic efficiency, innovation and productivity, and shall seek greater policy coherence between trade and labour policies;
- (b) shall strive to facilitate and promote trade and investment in environmental goods and services, including through addressing related non-tariff barriers;
- (c) shall strive to facilitate the removal of obstacles to trade or investment concerning goods and services of particular relevance for climate-change mitigation and adaptation, such as sustainable renewable energy and energy-efficient products and services, including through:
 - (i) the adoption of policy frameworks conducive to the deployment of best available technologies;
 - (ii) the promotion of standards that respond to environmental and economic needs; and
 - (iii) the minimisation of technical obstacles to trade;
- (d) agree to promote trade in goods that contribute to enhanced social conditions and environmentally sound practices, including goods that are the subject of voluntary sustainability assurance schemes such as fair and ethical trade schemes and eco-labels; and
- (e) agree to promote corporate social responsibility, including through the exchange of information and best practices. In that regard, the Parties refer to the relevant internationally recognised principles and guidelines, such as the OECD Guidelines for Multinational Enterprises, the UN Global Compact and the ILO Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy of 1977.

Article 277

Biological diversity

1. The Parties recognise the importance of ensuring the conservation and sustainable use of biological diversity as a key element for the achievement of sustainable development, and reaffirm their commitment to conserve and sustainably use biological diversity, in accordance with the Convention on Biological Diversity of 1992 and the ratified Protocols thereto, the Strategic Plan for Biodiversity, the Convention on International Trade in Endangered Species of Wild Fauna and Flora of 1973 ('CITES') and other relevant international instruments to which they are party.

2. To that end, the Parties shall:
 - (a) promote the sustainable use of natural resources and contribute to the conservation of biodiversity when undertaking trade activities;
 - (b) exchange information on actions on trade in natural resource-based products aimed at halting the loss of biological diversity and reducing pressures on biodiversity, and, where relevant, cooperate to maximise the impact and ensure the mutual supportiveness of their respective policies;
 - (c) promote the inclusion in the Appendices to CITES of species which meet the CITES criteria agreed for such inclusion;
 - (d) adopt and implement effective measures against illegal trade in wildlife products, including CITES protected species, and cooperate in the fight against that illegal trade; and
 - (e) cooperate at the regional and global levels with the aim of promoting:
 - (i) the conservation and sustainable use of biological diversity in natural or agricultural ecosystems, including endangered species, their habitat, specially protected natural areas and genetic diversity;
 - (ii) the restoration of ecosystems and the elimination or reduction of negative environmental impacts resulting from the use of living and non-living natural resources or of ecosystems; and
 - (iii) access to genetic resources and the fair and equitable sharing of benefits arising from the utilisation of such resources.

Article 278

Sustainable management of forests and trade in forest products

1. The Parties recognise the importance of ensuring the conservation and sustainable management of forests and the contribution of forests to the Parties' economic, environmental and social objectives.
2. To that end, the Parties shall:

 - (b) exchange information on measures to promote consumption of timber and timber products from sustainably managed forests and, where relevant, cooperate to develop such measures;
 - (c) adopt measures to promote the conservation of forest cover and combat illegal logging and related trade, including with respect to third countries, as appropriate;
 - (d) exchange information on actions to improve forest governance and, where relevant, cooperate to maximise the impact and ensure the mutual supportiveness of their respective policies aiming at excluding illegally harvested timber and timber products from trade flows;
 - (e) promote the inclusion in the Appendices to the CITES of timber species which meet the CITES criteria agreed for such inclusion; and
 - (f) cooperate at the regional and global levels with the aim of promoting the conservation of forest cover and the sustainable management of all types of forests, with use of certification promoting responsible management of the forests.

Article 279

Trade and sustainable management of living marine resources

The Parties, taking into account the importance of ensuring responsible management of fish stocks in a sustainable manner as well as promoting good governance in trade, shall:

- (a) promote best practices in fisheries management with a view to ensuring the conservation and management of fish stocks in a sustainable manner, based on the ecosystem approach;

- (b) take effective measures to monitor and control fishing activities;
- (c) promote coordinated data collection schemes and bilateral scientific cooperation in order to improve current scientific advice for fisheries management;
- (d) cooperate in the fight against illegal, unreported and unregulated ('IUU') fishing and fishing-related activities with comprehensive, effective and transparent measures; and

Article 280

Upholding levels of protection

1. The Parties recognise that it is inappropriate to encourage trade or investment by lowering the levels of protection afforded in domestic environmental or labour laws.
2. A Party shall not waive or derogate from, or offer to waive or derogate from, its environmental or labour laws as an encouragement for trade or the establishment, acquisition, expansion or retention of an investment or an investor in its territory.
3. A Party shall not, through a sustained or recurring course of action or inaction, fail to effectively enforce its environmental and labour laws as an encouragement for trade or investment.

Article 281

Scientific information

When preparing and implementing measures aimed at protecting the environment or labour conditions that could affect trade or investment between the Parties, each Party shall take account of available scientific and technical information, as well as relevant international standards, guidelines and recommendations if they exist, including the precautionary principle.

Article 282

Transparency

Each Party, in accordance with its domestic laws and regulations and Chapter 12, shall ensure that any measures aimed at protecting the environment and labour conditions that could affect trade or investment are developed, introduced and implemented in a transparent manner, with due notice and public consultation, and with appropriate and timely communication to and consultation of non-State actors.

Article 283

Review of sustainability impacts

The Parties commit to review, monitor and assess the impact of the implementation of this Agreement on sustainable development through their respective participative processes and institutions, as well as those set up under this Agreement, for instance through trade-related sustainability impact assessments.

Article 284

Working together on trade and sustainable development

1. The Parties recognise the importance of working together on trade-related aspects of environmental and labour policies in order to achieve the objectives of this Agreement. They may cooperate in, *inter alia*, the following areas:
 - (a) labour or environmental aspects of trade and sustainable development in the framework of international fora, including, in particular, the WTO, the ILO, the United Nations Environment Programme ('UN Environment'), the United Nations Development Programme and MEAs;

- (b) methodologies and indicators for trade sustainability impact assessments;
- (c) the trade impact of labour and environment regulations, norms and standards, as well as the labour and environmental impacts of trade and investment rules, including on the development of labour and environmental regulations and policy;
- (d) the positive and negative impacts of this Agreement on sustainable development and ways to enhance, prevent or mitigate them, also taking into account sustainability impact assessments carried out by either or both of the Parties;

2. The Parties shall exchange information and share experience on their actions to promote coherence and mutual supportiveness between trade, social and environmental objectives. Furthermore, the Parties shall enhance their cooperation and dialogue with regard to sustainable development issues that arise in the context of their trade relations.

3. Such cooperation and dialogue shall involve relevant stakeholders, in particular social partners, as well as other civil-society organisations, in particular through the Civil Society Platform established under Article 366.

4. The Partnership Committee may adopt rules for such cooperation and dialogue.

Article 285

Dispute Settlement

Subsection II of Section C of Chapter 13 of this Title does not apply to disputes under this Chapter. For any such dispute, after the arbitration panel has delivered its final report pursuant to Articles 325 and 326, the Parties, taking that report into account, shall discuss suitable measures to be implemented. The Partnership Committee shall monitor the implementation of any such measures and shall keep the matter under review, including through the mechanism referred to in Article 284 paragraph 3.

CHAPTER 10

Competition

Section A

Article 286

Principles

The Parties recognise the importance of free and undistorted competition in their trade and investment relations. The Parties acknowledge that anti-competitive business practices and State interventions have the potential to distort the proper functioning of markets and undermine the benefits of trade liberalisation.

Section B

Antitrust and mergers

Article 287

Legislative framework

1. Each Party shall adopt or maintain its respective law which applies to all sectors of the economy ⁽¹⁾ and addresses all of the following practices in an effective manner:

- (a) horizontal and vertical agreements between enterprises, decisions by associations of enterprises and concerted practices which have as their object or effect the prevention, restriction or distortion of competition;
- (b) abuses by one or more enterprises of a dominant position; and
- (c) concentrations between enterprises which significantly impede effective competition, in particular as a result of the creation or strengthening of a dominant position.

For the purposes of this Chapter, this law will be referred to hereafter as ‘competition law’ ⁽²⁾.

2. All enterprises, private or public, shall be subject to the competition law referred to in paragraph 1. The application of the competition law shall not obstruct the performance, in law or in fact, of particular tasks of public interest that may be assigned to the enterprises in question. Exemptions from the competition law of a Party shall be limited to tasks of public interest, proportionate to the desired public-policy objective and transparent.

Article 288

Implementation

1. Each Party shall maintain operationally independent authorities responsible for and appropriately equipped with the powers and resources necessary for the full application and the effective enforcement of the competition law referred to in Article 287.

2. The Parties shall apply their respective competition law in a transparent and non-discriminatory manner, respecting the principles of procedural fairness and rights of defence of the enterprises concerned, irrespective of their nationality or ownership status.

⁽¹⁾ In the European Union, competition rules apply to the agricultural sector in accordance with Regulation (EU) No 1308/2013 of the European Parliament and of the Council establishing a common organisation of the markets in agricultural products and its subsequent amendments or replacements, if any (OJ EU L 347, 20.12.2013, p. 671).

⁽²⁾ For the purpose of this Section, Armenia considers the reference to competition law to comprise its whole system of competition rules in the areas of antitrust, cartels and mergers.

*Article 289***Cooperation**

1. In order to fulfil the objectives of this Agreement and to enhance effective competition enforcement, the Parties acknowledge that it is in their common interest to strengthen cooperation with regard to the development of competition policy and the investigation of antitrust and merger cases.
2. For that purpose, the competition authorities of the Parties shall endeavour to coordinate, where possible and appropriate, their enforcement activities with regard to the same or related cases.
3. To facilitate the cooperation referred to in paragraph 1, the Parties' competition authorities may exchange information.

Section C

Subsidies*Article 290***Principles**

The Parties agree that subsidies can be granted by a Party when they are necessary to achieve a public policy objective. The Parties acknowledge, however, that certain subsidies have the potential to distort the proper functioning of markets and undermine the benefits of trade liberalisation. In principle, a Party shall not grant subsidies to enterprises providing goods or services where such subsidies negatively affect competition or trade, or are likely to do so.

*Article 291***Definition and scope**

1. For the purposes of this Chapter, a subsidy is a measure which fulfils the conditions set out in Article 1.1 of the Agreement on Subsidies and Countervailing Measures, contained in Annex 1A to the WTO Agreement ('SCM Agreement'), irrespective of whether it is granted to an enterprise supplying goods or services.

The first subparagraph does not prejudice the outcome of future discussions in the WTO on the definition of subsidies for services. Depending on the progress of those discussions at WTO level, the Parties may adopt a decision in the Partnership Committee to update this Agreement in that respect.

2. A subsidy shall be subject to this Chapter only if that subsidy is determined to be specific in accordance with Article 2 of the SCM Agreement. Any subsidy falling under Article 295 of this Agreement shall be deemed to be specific.
3. Subsidies granted to all enterprises, including public and private enterprises, shall be subject to this Chapter. The application of the rules in this Section shall not obstruct the performance, in law or in fact, of particular services of public interest assigned to the enterprises in question. Exemptions from application of the rules in this Section shall be limited to tasks of public interest, proportionate to public-policy objectives assigned to them and transparent.
4. Article 294 of this Agreement shall not apply to subsidies related to trade in goods covered by the Agreement on Agriculture, contained in Annex 1A to the WTO Agreement, ('Agreement on Agriculture').
5. Articles 294 and 295 shall not apply to audio-visual sector.

*Article 292***Relationship with the WTO**

The provisions in this Chapter are without prejudice to the rights and obligations of each Party under Article XV of GATS, Article XVI of GATT 1994, the SCM Agreement and the Agreement on Agriculture.

*Article 293***Transparency**

1. Every two years, each Party shall notify the other Party of the legal basis, form, amount or budget and, where possible, the recipient of subsidies provided within the reporting period.
2. Such notification shall be deemed to have been fulfilled if the relevant information is made available by a Party or on its behalf on a publicly accessible website, by 31 December of the subsequent calendar year. The first notification shall be made available no later than two years after the entry into force of this Agreement.
3. For subsidies notified under the SCM Agreement, such notification shall be deemed to have been fulfilled whenever a Party complies with its notification obligations under Article 25 of the SCM Agreement, provided that the notification contains all the information required under paragraph 1 of this Article.

*Article 294***Consultations**

1. If a Party considers that a subsidy granted by the other Party, which is not covered by Article 295, could negatively affect its interests, that Party may express its concern to the Party which granted the subsidy and request consultations on the matter. The requested Party shall accord full and sympathetic consideration to such a request.
2. Without prejudice to the transparency requirements set out in Article 293 and with a view to resolving the matter, the consultations shall in particular aim at establishing the policy objective or purpose for which the subsidies have been granted, the amount of the subsidy in question and data permitting an assessment of the negative effects of the subsidy on trade and investment.
3. To facilitate the consultations, the requested Party shall provide information on the subsidy in question within 60 days of the date of receipt of the request.
4. If, after receiving information on the subsidy in question, the requesting Party considers that that subsidy negatively affects or could negatively affect its trade or investment interests in a disproportionate manner, the requested Party will use its best endeavours to eliminate or minimise the negative effects on the requesting Party's trade and investment interests caused by that subsidy.

*Article 295***Subsidies subject to conditions**

Each Party shall apply conditions to the following subsidies in so far as they negatively affect trade or investment of the other Party, or are likely to do so:

- (a) a legal arrangement whereby a government, directly or indirectly, is responsible for covering debts or liabilities of certain enterprises is allowed, provided that the coverage of the debts and liabilities is limited as regards the amount of those debts and liabilities or the duration of such responsibility; and

- (b) subsidies to insolvent or ailing enterprises in various forms (including loans and guarantees, cash grants, capital injections, the provision of assets below market prices, and tax exemptions) with a duration of more than one year are allowed, provided that a credible restructuring plan has been prepared on the basis of realistic assumptions with a view to ensuring the return of the insolvent or ailing enterprises to long-term viability within a reasonable time and with the enterprise contributing to the costs of restructuring⁽¹⁾ ⁽²⁾.

Article 296

Use of subsidies

Each Party shall ensure that enterprises use the subsidies provided by a Party only for the public policy objective for which the subsidies have been granted.

Section D

General provisions

Article 297

Dispute settlement

No Party shall have recourse to dispute settlement as provided for in Chapter 13 of this Agreement for any matter arising under Section B of this Chapter or under Article 294 paragraph 4.

Article 298

Confidentiality

1. When exchanging information under this Chapter, the Parties shall take into account the limitations imposed by their respective legislation concerning professional and business secrecy and shall ensure the protection of business secrets and other confidential information.
2. Any information communicated under this Chapter shall be treated by the receiving Party as confidential unless the other Party, in accordance with its domestic law, has authorised the disclosure or made that information available to the general public.

Article 299

Review clause

The Parties shall keep the matters referred to in this Chapter under constant review. Each Party may refer such matters to the Partnership Committee. The Parties shall review the progress made in implementing this Chapter every five years after the entry into force of this Agreement, unless both Parties agree otherwise.

CHAPTER 11

State owned enterprises

Article 300

Delegated authority

Unless otherwise provided, each Party shall ensure that any enterprise, including a State-owned enterprise, an enterprise granted special rights or privileges, or a designated monopoly, that has been delegated regulatory, administrative or other governmental authority by a Party at any level of government, acts in accordance with the Party's obligations as set out under this Agreement in the exercise of that authority.

⁽¹⁾ This does not prevent a Party from providing temporary liquidity support in the form of loan guarantees or loans limited to the amount needed to keep an ailing enterprise in business for the time necessary to adopt a restructuring or liquidation plan.

⁽²⁾ Small and medium-sized enterprises are not required to contribute to the costs of restructuring.

*Article 301***Definitions**

For the purposes of this Chapter:

- (a) 'state-owned enterprise' means an enterprise, including any subsidiary, in which a Party, directly or indirectly:
- (i) owns more than 50 % of the enterprise's subscribed capital or controls more than 50 % of the votes attached to the shares issued by the enterprise;
 - (ii) can appoint more than half of the members of the enterprise's board of directors or an equivalent body; or
 - (iii) can exercise control over the enterprise;
- (b) 'enterprise granted special rights or privileges' means any enterprise, including any subsidiary, public or private, that has been granted by a Party, in law or in fact, special rights or privileges. Special rights or privileges are granted by a Party when it designates or limits to two or more the number of enterprises authorised to supply a good or service, other than according to objective, proportional and non-discriminatory criteria, substantially affecting the ability of any other enterprise to supply the same good or service in the same geographical area under substantially equivalent conditions;
- (c) 'designated monopoly' means an entity engaged in a commercial activity, including a group of entities or a government agency, and any subsidiary thereof, that in a relevant market in the territory of a Party is designated as the sole supplier or purchaser of a good or service, but does not include an entity that has been granted an exclusive intellectual property right solely by reason of such grant;
- (d) 'commercial activities' means activities the end result of which is the production of a good or supply of a service which will be sold in the relevant market in quantities and at prices determined by the enterprise and which are undertaken with an orientation towards profit-making, but does not include activities undertaken by an enterprise which:
- (i) operates on a not-for-profit basis;
 - (ii) operates on cost-recovery basis; or
 - (iii) provides public services;
- (e) 'commercial considerations' means price, quality, availability, marketability, transportation and other terms and conditions of purchase or sale, or other factors that would normally be taken into account in the commercial decisions of an enterprise operating according to market-economy principles in the relevant business or industry; and
- (f) 'designate' means to establish or authorise a monopoly, or to expand the scope of a monopoly to cover an additional good or service.

*Article 302***Scope of application**

RESERVATIONS ON ESTABLISHMENT OF THE EUROPEAN UNION

1. The list of below indicates the economic activities where the European Union applies reservations to national treatment or most favoured treatment pursuant to Article 144 paragraph 2 of this Agreement to establishments and entrepreneurs of the Republic of Armenia.

The list is composed of the following elements:

- (a) a list of horizontal reservations applying to all sectors or sub-sectors; and
- (b) a list of sector- or sub-sector-specific reservations indicating the sector or sub-sector concerned along with the reservations applying.

A reservation corresponding to an activity which is not liberalised (unbound) is expressed as follows: 'No national treatment and most favoured nation treatment obligations'.

When a reservation under point (a) or (b) only includes Member State-specific reservations, Member States not mentioned therein undertake the obligations of Article 144 paragraph 2 of this Agreement in the sector concerned without reservations. The absence of Member State-specific reservations in a given sector is without prejudice to horizontal reservations or to sectoral EU-wide reservations that may apply.

2. In accordance with Article 141 paragraph 3 of this Agreement, the list below does not include measures concerning subsidies granted by the Parties.
3. The rights and obligations arising from the list below shall have no self-executing effect and thus confer no rights directly on natural or juridical persons.
4. In accordance with Article 144 of this Agreement, non-discriminatory requirements, such as those concerning the legal form or the obligation to obtain licences or permits applicable to all providers operating on the territory without distinction based on nationality, residency or equivalent criteria, are not listed in this Annex as they are not prejudiced by this Agreement.
5. Where the European Union maintains a reservation that requires that a service supplier be a national, permanent resident or resident of its territory as a condition to the supply of a service in its territory, a reservation listed in the list of commitments in Annex VIII-B or the reservations listed in Annexes VIII-C and VIII-D shall operate as a reservation with respect to establishment under this Annex, to the extent applicable.
6. For greater certainty, for the European Union, the obligation to grant national treatment does not entail the requirement to extend to nationals or juridical persons of the other Party the treatment granted in a Member State to the nationals and juridical persons of another Member State pursuant to the Treaty on the Functioning of the European Union, or to any measures adopted pursuant to that Treaty, including their implementation in the Member States. Such national treatment is granted only to legal persons of the other Party established in accordance with the law of another Member State and having their registered office, central administration or principal place of business in that Member State, including those legal persons established within the EU which are owned or controlled by nationals of the other Party.

Horizontal reservations

Public utilities

Types of establishment

EU: Treatment accorded to subsidiaries (of Armenian companies) formed in accordance with the law of the Member States of the European Union and having their registered office, central administration or principal place of business within the Union is not extended to branches or agencies established in the Member States of the European Union by Armenian companies ⁽²⁾. However, this does not prevent a Member State from extending this treatment to branches or agencies established in another Member State by a third-country company or firm, as regards their operation in the first Member State's territory, unless such extension is explicitly prohibited by EU law.

ANNEX VIII-B

COMMITMENTS ON CROSS-BORDER SERVICES OF THE EUROPEAN UNION

1. The list of commitments below indicates the economic activities liberalised by the European Union pursuant to Article 151 of this Agreement and, by means of reservations, the market access and national treatment limitations that apply to services and service suppliers of the Republic of Armenia in those activities. The lists are composed of the following elements:

(a) a first column indicating the sector or sub-sector in which the commitment is assumed by the Party, and the scope of liberalisation to which the reservations apply; and

(b) a second column describing the applicable reservations.

When the column referred to in point (b) only includes Member State-specific reservations, Member States not mentioned therein undertake commitments in the sector concerned without reservations.

The absence of Member State-specific reservations in a given sector is without prejudice to horizontal reservations or to sectoral EU-wide reservations that may apply.

Sectors or sub-sectors not mentioned in the list below are not committed.

2. The list below does not include measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures when they do not constitute a market access or a national treatment limitation within the meaning of Articles 149 and 150 of this Agreement. Those measures (e.g. need to obtain a licence, universal service obligations, need to obtain recognition of qualifications in regulated sectors, need to pass specific examinations, including language examinations, non-discriminatory requirement that certain activities may not be carried out in environmental protected zones or areas of particular historic and artistic interest), even if not listed, apply in any case to investors of the other Party.

3. The list below is without prejudice to the feasibility of Mode 1 in certain services sectors and sub-sectors and without prejudice to the existence of public monopolies and exclusive rights as described in the list of commitments on establishment.

4. In accordance with Article 141, paragraph 3 of this Agreement, the list below does not include measures concerning subsidies granted by the Parties.

5. The rights and obligations arising from this list of commitments shall have no self-executing effect and thus confer no rights directly to individual natural persons or juridical persons.

6. For greater certainty, for the European Union, the obligation to grant national treatment does not entail the requirement to extend to nationals or juridical persons of the other Party the treatment granted in a Member State to the nationals and juridical persons of another Member State pursuant to the Treaty on the Functioning of the European Union, or to any measure adopted pursuant to that Treaty, including their implementation in the Member States. Such national treatment is granted only to legal persons of the other Party established in accordance with the law of another Member State and having their registered office, central administration or principal place of business in that Member State, including those legal persons established within the European Union which are owned or controlled by nationals of the other Party.

ANNEX VIII-C

RESERVATIONS ON KEY PERSONNEL, GRADUATE TRAINEES AND BUSINESS SELLERS OF THE EUROPEAN UNION

1. The reservations below indicate the economic activities liberalised pursuant to Article 151 of this Agreement for which limitations apply on key personnel and graduate trainees in accordance with Article 154 of this Agreement and on business sellers in accordance with Article 155 of this Agreement and specifies such limitations. The list below is composed of the following elements:

- (a) the first column indicating the sector or sub-sector in which limitations apply; and
- (b) the second column describing the applicable limitations.

When the column referred to under (b) only includes Member State-specific reservations, Member States not mentioned therein undertake commitments in the sector concerned without reservations (the absence of Member State-specific reservations in a given sector is without prejudice to horizontal reservations or to sectoral EU-wide reservations that may apply).

The European Union does not undertake any commitment for key personnel, graduate trainees and business sellers in economic activities which are not liberalised (remain unbound) pursuant to Article 144 of this Agreement.

- 2. Commitments on key personnel, graduate trainees, business service sellers and sellers of goods do not apply in cases where the intent or effect of their temporary presence is to interfere with, or otherwise affect the outcome of, any labour or management dispute or negotiation.
- 3. The list below does not include measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures when they do not constitute a limitation within the meaning of Articles 154 and 155 of this Agreement. Those measures (e.g. need to obtain a licence, need to obtain recognition of qualifications in regulated sectors, need to pass specific examinations, including language examinations, and need to have a legal domicile in the territory where the economic activity is performed), even if not listed below, apply in any case to key personnel, graduate trainees and business sellers of the Republic of Armenia.
- 4. All other legal requirements of the European Union and its Member States regarding entry, stay, work and social security measures continue to apply, including regulations concerning period of stay, minimum wages as well as collective wage agreements.
- 5. In accordance with Article 141, paragraph 3 of this Agreement, the list below does not include measures concerning subsidies granted by a Party.
- 6. The list below is without prejudice to the existence of public monopolies and exclusive rights as described in the list of commitments on establishment.
- 7. In the sectors where economic needs tests are applied, their main criteria will be the assessment of the relevant market situation in the Member State of the European Union or the region where the service is to be provided, including with respect to the number of, and the impact on, existing services suppliers.
- 8. The rights and obligations arising from the list below shall have no self-executing effect and thus confer no rights directly on natural or juridical persons.
- 9. For greater certainty, for the European Union, the obligation to grant national treatment does not entail the requirement to extend to nationals or juridical persons of the other Party the treatment granted in a Member State to the nationals and juridical persons of another Member State pursuant to the Treaty on the Functioning of the European Union, or to any measure adopted pursuant to that Treaty, including their implementation in the Member States. Such national treatment is granted only to legal persons of the other Party established in accordance with the law of another Member State and having their registered office, central administration or principal place of business in that Member State, including those legal persons established within the EU which are owned or controlled by nationals of the other Party.

Part B

Elements for registration, control and protection of geographical indications

Each Party shall ensure that its system for registration, control and protection of geographical indications includes:

- (1) a register listing geographical indications protected in its territory;
- (2) an administrative process verifying that geographical indications identify a good as originating in a territory, region or locality of one of the Parties where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin;
- (3) a requirement that a registered name corresponds to a specific product or products for which a product specification is laid down, which can only be amended by due administrative process;
- (4) control provisions applying to production;
- (5) enforcement of the protection of registered geographical indications by appropriate administrative action by the public authorities;

-
- (6) legal provisions providing that a registered geographical indication:
- (a) may be used by any operator marketing the agricultural product or foodstuff conforming to the corresponding specification; and
 - (b) is protected against:
 - (i) any direct or indirect commercial use of a registered geographical indication in respect of products not covered by the registration in so far as those products are comparable to the products registered under that geographical indication or in so far as using the geographical indication exploits the reputation of the protected geographical indication;
 - (ii) any misuse, imitation or evocation, even if the true origin of the product is indicated or if the protected geographical indication is translated or accompanied by an expression such as 'style', 'type', 'method', 'as produced in', 'imitation' or similar;
 - (iii) any other false or misleading indication as to the provenance, origin, nature or essential qualities of the product, on the inner or outer packaging, advertising material or documents relating to the product concerned, and the packing of the product in a container likely to convey a false impression as to its origin; and
 - (iv) any other practice likely to mislead the consumer as to the true origin of the product;
- (7) a rule that protected names may not become generic;
- (8) provisions concerning the registration, which may include refusal of registration, of terms homonymous or partly homonymous with registered terms, terms customary in common language as the common name for goods and terms comprising or including the names of plant varieties and animal breeds. Such provisions shall take into account the legitimate interests of all persons concerned;
- (9) rules concerning the relationship between geographical indications and trademarks providing for a limited exception to the rights conferred under trademark law to the effect that the existence of a prior trademark shall not be a reason to prevent the registration and use of a name as a registered geographical indication, except where, by reason of the trademark's renown and the length of time it has been used, consumers would be misled by the registration and use of the geographical indication on products not covered by the trademark;
- (10) a right for any producer who is established in the geographical area and subject to the relevant control to produce the product labelled with the protected name, provided that that producer complies with the product specifications; and
- (11) an objection procedure that allows the legitimate interests of prior users of names, whether those names are protected as a form of intellectual property or not, to be taken into account.
-
