

Creating A Road Map To Success

Our Mission

Renaissance South LA (RSLA) was created to help those most in need overcome the hardships of substance abuse and addiction by developing their own individual road map to success. We embark on this holistic journey by providing quality service in the areas of training, mentoring and counseling, assisting our youth and adults from Los Angeles County with parenting, drug rehabilitation, career preparation, health and medical services, all in the hopes of improving their quality of life and self-reliance through treatment and empowerment.

Our Focus

RSLA's dedicated staff has over 50 years of career development & substance abuse counseling and we aim to transform lives by treating the physical, mental and spiritual abuses associated with addiction, then creating actionable and attainable career growth plans for the individual. We teach our clients how to become the most qualified candidate for whatever goals they set in life whether they aspire to work in government, private sector, education or corporate America. Additionally we create a treatment plan that includes intervention by a certified counselor along with preparing our clients to compete on a local, national and global level in a professional career of their choosing.
