Property Team Present:
Date: October , 2020
Meeting Called to Order: No Meeting Held
September/October Updates

Even though there was no official meeting held again this month, many things continue to get done. We have only had a couple of small items come up that have been handled by the Church mice or myself.

- We had our annual fire alarm inspection done this past month. All systems are working and fire extinguishers were inspected and retagged. The batteries were replaced in the system which has stopped the periodic beeping.
- The Fire department came and held a fire drill for the children and all systems worked for that as well.
- I am currently replacing burned out bulbs in the Exit lights.
- Leaky toilet in the women's bathroom in the narthex-Repaired
- Clogged sewer line from the preschool bathrooms to street. Had a Rooter company come out and run the line to the street and cleared the line. $95 cost.
- Cleaning of Sanctuary--the Church Mice(Donita and Gayle) have gone in and vacuumed and dusted and wiped down with a disinfectant cleaner everything in the Sanctuary including all the church pews. Thank you so much to all of the Mice for this effort as we move potentially closer to indoor services.
- Fall Fest was held this past Saturday. We had about 10 people there to help clean up the outside of the church. Lots of raking(more will need to be done as all of the leaves are not down yet), tree trimming, weeding, fertilizing, treating the trees, cleaning the parking lots. A lot of work was done and very much appreciated, helping to keep our building grounds looking good waiting for all of us to return. The Place looks Gooood.

Action Item for Council:
- Discuss finishing the LED lighting project for the East end of the church, to include the Narthex lighting and the East entrance lighting.

- Potential reopening of the Sanctuary in regards to restarting the custodial service for the East End. When restarted will cost an additional $500 per month.

Next meeting: Not sure at this time???
