IHOP defines gluten-friendly as menu items prepared without gluten-containing ingredients based on information from our approved suppliers. We do not claim that items marked as gluten-friendly are "gluten free" because we cannot confirm that they meet Health Canada's definition of "gluten free" (<20 parts per million of gluten). Because we have multiple sources of gluten in our shared cooking and prep areas, including common fryer oil, we are unable to guarantee that any menu item can be completely free of gluten. Due to supply constraints, some items may not be available as they are listed on the menu. Certain ingredients may be substituted for comparable ingredients.
