# Where Learning Takes Shape.

Young minds need more than just standard, run-of-the-mill seating to stay creative and engaged.

Whether it's the first day of school or the last, Tangram is the missing puzzle piece that connects today's learners and tomorrow's leaders in meaningful, inventive ways.

## Learning Shapes

### SERPENTINE *Socialize*

Tangram's unique serpentine shape maximizes the number of seats - now anyone can join the group without scrambling for a place to perch.

Pg. 4

### PODS *Gather*

When a more structured learning environment is needed, Tangram's Pod arrangements are ideal for both project privacy and smaller group connection.

Pg. 6

### ROW *Focus*

Sometimes the key to focus is personal space - Tangram's Row arrangements offer students the ability to concentrate in classroom perimeters and breakout areas without distraction.

Pg. 8

### ZIGZAG *Focus*

Open spaces are often collaborative areas, but Tangram's Zigzag arrangement encourages students to focus on their own despite the buzz of a shared environment.

Pg. 9

### BUILDING BLOCKS *Create*

Whether it's a quiet study session or a quick meet up with friends, students can build their own creative, cozy study space with Tangram's Building Blocks arrangement.

Pg. 10

### CAMPFIRE *Lecture & Listen*

Not all learning takes place in the classroom. With Tangram's Campfire arrangement, students can gather around a speaker or instructor for a relaxed and playful exchange of ideas and stories.

Pg. 12

### ISLAND *Study*

Tangram's high-back Island arrangement gives young learners an oasis of their own to sit and study alone or with a buddy.

Pg. 14

# Smarten up your socialization solutions.

## PUT YOUR FEET UP

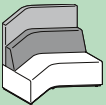

Studying doesn't have to be stiff - now students can stretch out with a pull-away ottoman that will keep them comfortable while they cram for exams.

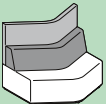

## CONNECTION SECTION

With handy power grommets for laptops and mobile devices, digital learning is just a plug-in away.

# Bring more to the table.

## TRUST IN THE BUDDY SYSTEM

Like a dependable teammate, Tangram plays and works well with others. Paired with an adaptable, easy-to-clean Birk™ table, Tangram turns a non-descript shared space into a comfortable, productive, non-traditional learning – or social! – environment.

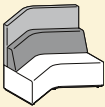

## CONCENTRATION IS KEY

Teamwork is terrific, but sometimes a little privacy encourages focus and creativity. Tangram's high-back option allows for a structured environment that lets students concentrate even in energetic shared spaces.

## STORE YOUR STUFF

Personal belongings have a place to call home, too – with Tangram's perfectly situated nooks, students have easy access to the things they need.

**HCWTRND42**  
42" Round Top with Flat Edge

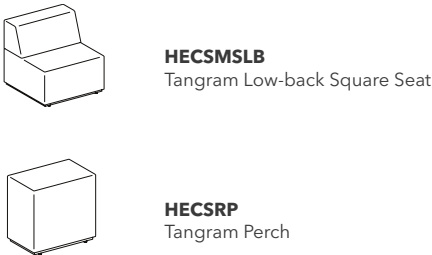

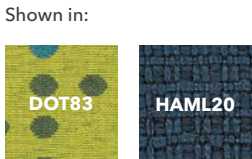

# Line up for learning.

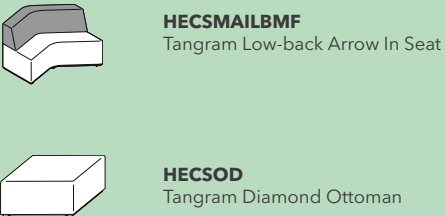

**GET SOME SPACE**  
Sometimes students need to branch out on their own to study - Tangram's "perch" feature makes it easy to add a bit of distance when focus is key.

**KEEP IT CLEAN**  
Shoo those dust bunnies away with an easily cleanable - yet highly durable - raised base.

**ADAPTABILITY MADE EASY**  
Keep personal belongings out from underfoot with a convenient, mobile ottoman that can also double as an extra seat for someone late to the study session.

# Build on ideas and inspiration, one step at a time.

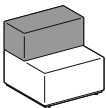

## A POWERFUL CONNECTION

Tangram's in-line table is an ideal workspace for a social hub - and let's face it, these days a seating solution for shared spaces isn't complete without a place to charge a laptop or smartphone.

## STEP UP TO SMART SEATING

Whether they're listening to a lecture or simply hanging out before class, Story Step seating allows every student a perfect view and instant connection.

## A COOL COMPOSITION

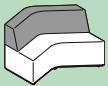

We're taking non-traditional school seating to a whole new level! With vibrant single or multi-fabric choices and unique shape options, Tangram energizes and inspires students and spaces to be their creative best.

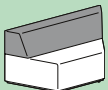

## ROOM TO MOVE

Tangram makes the grade when it comes to adaptability - check out the mobile ottomans that double as seating and surface!

# Corner some quiet time.

### PULL UP A SEAT

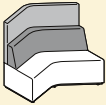

Fun mobile poufs make the most of a space by letting learners kick their feet up after a busy day of science projects and math tests - plus, they work as an extra seat when a friend stops by or as an easy landing pad for personal items.

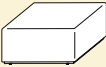

### GET SOME "ME" TIME

Peace and quiet is sometimes necessary to stay centered. With Tangram's high-back arrow option, students can still learn independently in social spaces - without feeling isolated.

"One of the first things we learn as children are basic shapes and how these shapes apply to the environments that surround us. The development of Tangram started by taking inspiration from geometric shapes and how using them together can facilitate education. As learning environments evolve from static to more flexible team learning, the need for adaptive seating has grown. Tangram offers seating elements designed to provide solutions for a variety of educational settings -- large scale pieces suitable for open environments, small scale pieces appropriate for classroom settings, and modular building blocks for tiered seating -- whether being used as standalone or ganged together. Tangram fills the void for a flexible seating solution in any educational space."
